The Foundations of Human Experience Rudolf Steiner, 1996-07 7 Lectures various cities Nov 29 1917 Oct 16 1918 CW 182 Death as Metamorphosis of Life is a brilliant exceptional collection The lectures are intimate existential profound and transformative they address us in our soul lives where we live and where we strive for spiritual experience They make clear the necessary and living bond that must unite the inner work of Anthroposophists the day to day inner spiritual work in our ordinary lives and the outer work of Anthroposophy the manifestation of spirit in life that is the tasks of service that we take on in the world Steiner understood that if Anthroposophy or spiritual wisdom does not live and grow as a spiritual reality in the souls of those who claim to practice it then the practical wisdom their actions in the world as called for by the spirit of the times will come to nothing Christopher Bamford introduction The lectures in Death as Metamorphosis of Life address us in our soul life and speak to our hearts They make clear the bond that must unite our inner spiritual work and the outer work of manifesting spirit in life For if spiritual wisdom does not live and grow as a reality in the souls of those who practice it then the practical wisdom of service called for by the spirit of the times will come to nothing The particular realities that Rudolf Steiner focuses on are twofold working with the dead and the spiritual hierarchies and coming to know the Christ What these two have in common is that they are both Earth centered They teach us the fundamental importance of everyday human destiny and earthly life not just for humanity but also for divinity and the cosmos We learn not only what the dead can teach us about the spiritual world and the working of the hierarchies but also what it means to be human in a spiritual sense We learn of the importance of working with the

dead and the angelic worlds both for our own and for their development as well as for the future evolution of the Earth The Mystery of Golgotha is equally important we must understand it spiritually As Steiner says It is the will of the gods that the most important event on Earth must compel us to spirituality The Christ must be experienced inwardly not historically At the same time he must be found on Earth for instance in human destiny The more we become aware of what is secretly invisibly and unconsciously working in our lives the closer we will come to working with the dead and to the kingdom of Christ How can we find the Christ Steiner quotes the seventeenth century mystic Angelus Silesius The Cross on Golgotha cannot save you from evil if it is not also raised within you The Cross is raised within us by the polarity of the powerlessness of our body and the resurrection of our spirit There is no need for supersensory capacities to realize this experience only humility and sincerity in seeking are required Resurrection from the soul death of powerlessness is the true Christ experience that opens the soul to the presence of Christ Truly these are astonishing lectures to be treasured to be read reread to be thoroughly understood as something living to be meditated and made one's own and to be carried as a transformative gift into the world Christopher Bamford introduction *Death as Metamorphosis of Life* is translated for the first time in its entirety from the German of *Der Tod als Lebenswandlung* GA 182 Individual lectures have appeared in *Angels Selected Lectures* *Evil Selected Lectures* and *Staying Connected*

The Education of the Child and Early Lectures on Education Rudolf Steiner, 1996 It is necessary for human beings to remember not only what they already understand but to come to understand what they already know that is what they have acquired by memory in the way the child acquires language In a certain sense understanding things through concepts should proceed from the stored up treasures of the memory The more children know in memory before they begin to understand through intellectual concepts the better p 31 As early as 1884 while tutoring a boy with special needs Steiner began a lifelong interest in applying spiritual knowledge to the practical aspects of life Steiner originally published the essay at the core of this book in 1907 It represents his earliest ideas on education in which he lays out the soul spiritual processes of human development describing the need to understand how the being of a child develops through successive births beginning with the physical body's entry into earthly life and culminating in the emergence of the I being with adulthood Also included are several early lectures on education ranging from 1906 to 1911 well before the birth of the Waldorf movement in 1919

The Child's Changing Consciousness and Waldorf Education Rudolf Steiner, 1988-01-01

Rhythms of Learning Rudolf Steiner, 1998 Key lectures on children and education have been thoughtfully chosen from the vast amount of material by Steiner and presented in a context that makes them approachable and accessible In his many discussions and lectures Steiner shared his vision of an education that considers the spirit soul and physiology in children as they grow

The Kingdom of Childhood Rudolf Steiner, 1995 These seven intimate aphoristic talks were presented to a small group on Steiner's final visit to England Because they were given to pioneers dedicated to opening a new Waldorf school these talks are often considered one of the best introductions to Waldorf education Steiner

shows the necessity for teachers to work on themselves first in order to transform their own inherent gifts He explains the need to use humor to keep their teaching lively and imaginative Above all he stresses the tremendous importance of doing everything in the knowledge that children are citizens of both the spiritual and the earthly worlds And throughout these lectures he continually returns to the practical value of Waldorf education These talks are filled with practical illustrations and revolve around certain themes the need for observation in teachers the dangers of stressing the intellect too early children s need for teaching that is concrete and pictorial the education of children s souls through wonder and reverence the importance of first presenting the whole then the parts to the children s imagination Here is one of the best introductions to Waldorf education straight from the man who started it all German source Die Kunst des Erziehens aus dem Erfassen der Menschenwesenheit GA 311 SYNOPSIS OF THE LECTURES LECTURE 1 The need for a new art of education The whole of life must be considered Process of incarnation as a stupendous task of the spirit Fundamental changes at seven and fourteen At seven the forming of the new body out of the model body inherited at birth After birth the bodily milk as sole nourishment The teacher s task to give soul milk at the change of teeth and spiritual milk at puberty LECTURE 2 In first epoch of life child is wholly sense organ Nature of child s environment and conduct of surrounding adults of paramount importance Detailed observation of children and its significance In second epoch seven to fourteen fantasy and imagination as life blood of all education e g in teaching of writing and reading based on free creative activity of each teacher The child as integral part of the environment until nine Teaching about nature must be based on this The higher truths in fairy tales and myths How the teacher can guide the child through the critical moment of the ninth year LECTURE 3 How to teach about plants and animals seven to fourteen Plants must always be considered not as specimens but growing in the soil The plant belongs to the earth This is the true picture and gives the child an inward joy Animals must be spoken of always in connection with humans All animal qualities and physical characteristics are to be found in some form in the human being Humans as synthesis of the whole animal kingdom Minerals should not be introduced until twelfth year History should first be presented in living imaginative pictures through legends myths and stories Only at eleven or twelve should any teaching be based on cause and effect which is foreign to the young child s nature Some thoughts on punishment with examples LECTURE 4 Development of imaginative qualities in the teacher The story of the violet and the blue sky Children s questions Discipline dependent on the right mood of soul The teacher s own preparation for this Seating of children according to temperament Retelling of stories Importance of imaginative stories that can be recalled in later school life Drawing of diagrams from ninth year Completion and metamorphosis of simple figures to give children feeling of form and symmetry Concentration exercises to awaken an active thinking as basis of wisdom for later life Simple color exercises A Waldorf school timetable The main lesson LECTURE 5 All teaching matter must be intimately connected with *The Roots of Education* Rudolf Steiner, 1968 We must develop an art of education that will lead us out of our present social chaos By bringing spirituality into human souls through education

humanity can find a way through the spirit itself to further the evolution of civilization These lectures offer deep insight into the mystery of soul and spiritual forces in a child's development They describe the metamorphoses of the child's being as these forces unfold and explain how teaching should relate to these fundamental changes Such an education prepares the child to become a citizen of both the earth and the spiritual world Only through recognizing our spiritual citizenship can we become truly social beings on earth and fully creative in the building of new worlds From the Foundations of Waldorf Education series **British Humanities Index**, 2005 The Child's Changing Consciousness Rudolf Steiner, 1996-10 Translated from the German by Roland Everett and edited by Rhona Everett Waldorf Education and Anthroposophy 1 Rudolf Steiner, 1995 *The Light Course* Rudolf Steiner, 2001-11 11 lectures Stuttgart and Dornach Dec 23 1919 Aug 8 1921 CW 320 Rudolf Steiner's course on light which includes explorations of color sound mass electricity and magnetism presages the dawn of a new worldview in the natural sciences that will stand our notion of the physical world on its head This first course in natural science given to the teachers of the new Stuttgart Waldorf school as an inspiration for developing the physics curriculum is based on Goethe's phenomenological approach to the study of nature Acknowledging that modern physicists had come to regard Goethe's ideas on physics as a kind of nonsense Steiner contrasts the traditional scientific approach which treats phenomena as evidence of natural laws with Goethean science which rejects the idea of an abstract law behind natural phenomena and instead seeks to be a rational description of nature Steiner then corrects the mechanistic reductionism practiced by scientific positivists emphasizing instead the validity of human experience and pointing toward a revolution in scientific paradigms that would reclaim ground for the subject the human being in the study of nature READ BOBBY MATHERNE'S REVIEW OF THIS BOOK German source Geisteswissenschaftliche impulse zur Entwicklung der Physik Erster Naturwissenschaftlicher Kurs Licht Farbe Ton Masse Elektrizität Magnetismus GA 320 **The Foundations of Human Experience** Rudolf Steiner, 1996-08-15 This lecture is part of the collection The Foundations of Human Experience by Rudolf Steiner Steiner 1861-1925 was an Austrian philosopher social reformer architect and esotericist He gained initial recognition as a literary critic and cultural philosopher At the beginning of the 20th century he founded a spiritual movement Anthroposophy He is considered the father of Waldorf education biodynamic agriculture anthroposophical medicine and spiritual science A comprehensive view of cosmic laws as a basis for being a teacher The duality of the human being as the greatest error of modern psychology The misleading law of The Conservation of Energy the formation of new energy and matter in the human being Understanding what is dying in nature through the intellect and what is becoming through the will How perceiving the I is based in the physical body Freedom and sense free thinking Nature without the human being the danger of extinction The function of the human corpse for the development of the Earth The prevalence of death bringing forces in the dead bones and dying nerves and life giving forces in the blood and muscles Rickets The relationship of geometry to the skeleton Geometry as a reflection of cosmic movements The human being is not
