Explaining Inequality the World Round Matthew Higgins, Jeffrey G. Williamson, 1999 Klaus Deininger and Lyn Squire

have recently produced an inequality data base for a panel of countries from the 1960s to the 1990s We use these data to decompose the sources of inequality into three central parts the demographic or cohort size effect the so called Kuznets Curve or demand effects and the commitment to globalization or policy effects We also control for education supply the so called natural resource curse and other variables suggested by the literature While the Kuznets Curve comes out of hiding when the inequality relationship is conditioned by the other two cohort size seems to be the most important force at work We resolve the apparent conflict between this macro finding on cohort size and the contrary implications of recent research based on micro data
