What Is Your Quest From Adventure Games To Interactive Books:

What Is Your Quest? Anastasia Salter, 2014-11-01 *What Is Your Quest* examines the future of electronic literature in a world where tablets and e readers are becoming as common as printed books and where fans are blurring the distinction between reader and author. The construction of new ways of storytelling is already underway; it is happening on the edges of the mainstream gaming industry and in the spaces between media on the foundations set by classic games. Along these margins, convergent storytelling allows for playful reading and reading becomes a strategy of play. One of the earliest models for this new way of telling stories was the adventure game, the kind of game centered on quests in which the characters must overcome obstacles and puzzles. After they fell out of fashion in the 1990s, fans made strenuous efforts to keep them alive and to create new games in the genre. Such activities highlight both the convergence of game and story and the collapsing distinction between reader and author. Continually defying the forces of obsolescence, fans return abandoned games to a playable state and treat stories as ever-evolving narratives. Similarly, players of massive multiplayer games become co-creators of the game experience, building characters and creating social networks that recombine a reading and gaming community. The interactions between storytellers and readers, between programmers and creators and among fans, turned world-builders, are essential to the development of innovative ways of telling stories. And at the same time that fan activities foster the convergence of digital gaming and storytelling, new and increasingly accessible tools and models for interactive narrative empower a broadening range of storytellers. It is precisely this interactivity among a range of users surrounding these new platforms that is radically reshaping both e-books and games and those who read and play with them.

Forum-Based Role Playing Games as Digital Storytelling Csenge Virág Zalka, 2019-03-28 When people hear the term role playing games, they tend to think of two things: a group of friends sitting around a table playing *Dungeons & Dragons* or video games with exciting graphics. Between those two, however, exists a third style of gaming. Hundreds of online forums offer gathering places for thousands of players, people who come together to role play through writing. They create stories by taking turns describing events through their characters' eyes. Whether it is the arena of the Hunger Games, the epic battles of the Marvel Universe, or love stories in a fantasy version of New York, people build their own spaces of words and inhabit them day after day. But what makes thousands of players, many teenagers among them, voluntarily type up novel-length stories? How do they use the resources of the Internet to gather images, sounds, and video clips to weave them into one coherent narrative? How do they create together through improvisation and negotiation in ways that connect them to older forms of storytelling? Through observing more than a hundred websites and participating in five of them for a year, the author has created a pilot study that delves into a subculture of unbounded creativity.
