Your Life In Your Hands:

Your Life in Your Hands Jane Plant, 2014-06-24 One out of nine women in the United States will develop breast cancer in her lifetime In fact it is the second leading cause of cancer death for women after lung cancer and the leading overall cause of death in women between the ages of forty and fifty five For too long women have erroneously believed that there is little or nothing they can do to prevent this dread illness Our major medical efforts are directed toward detecting and treating rather than preventing breast cancer Professor Jane Plant one of Britain s most eminent scientists contracted breast cancer in 1987 She had five recurrences and by 1993 the cancer had spread to her lymph system When orthodox medicine gave up and she was told that she only had three months to live she determined to use her extensive scientific training and her knowledge of other cultures to find a way to survive In her research she was startled to find that in China breast cancer affects far fewer women than in Western countries Plant considered that there could be a dietary trigger for the illness As she continued her scientific investigations she became convinced that there was a causal link between consumption of dairy products and breast cancer Jane Plant finally defeated her breast cancer in part because she used her training and knowledge as a natural scientist to understand it and then overcome it Combining the diet her research had led to with traditional medical treatment Professor Plant was not only able to triumph over her own disease but also to pass on what she had discovered to help more than sixty other women successfully fight their breast cancer In this book women will be presented for the first time with a compelling body of evidence strongly suggesting that consumption of dairy products may cause breast cancer It will demonstrate the specific changes that women can make in their day to day lives to help prevent and treat breast cancer With a clear statement of the scientific principles behind her discovery Professor Plant includes detailed suggestions for ways to alter your diet by eliminating or reducing consumption of many suspected cancer causing agents especially dairy products and replacing them with healthful alternatives She offers as well detailed menus and recipes to help you make the transition and enjoy it Your Life in Your Hands is a revolutionary book that will change the lives of millions of women

the sidelines opting out of raising our hands to do learn and engage in ways that could make a difference Why White American women are no monolith Yet as Women s March national organizer Jenna Arnold has learned over the past few years criss crossing the US in conversations with white women about their identity and role in the country we do possess common characteristics ones that get in the way of us becoming more engaged as citizens We re so focused on checking off our to do lists or so afraid of getting it wrong or so busy trying to avoid conflict that we are actively avoiding the urgent conversations we need to have We are confused about how we got here and unsure how to do better Raising Our Hands is the reckoning cry for white women It asks us to step up and join the new frontlines of the fight against complacency in our homes in our behaviors and in our own minds Consider Raising Our Hands your starting place your Intro to Being a White Woman in Today s World freshman year class In these pages Jenna peels back the history that s been kept out of textbooks and the cultural norms that are holding us back so we can finally start really listening to marginalized voices and doing our part to promote progress The American white woman is a powerful force an essential participant to mobilize alongside the rest of humanity on behalf of the world and we can no longer make excuses for why we don t have time or don t know enough
