Teaching, Learning & Researching Roberto Rocco, Gregory Bracken, Caroline Newton, Marcin Dabrowski, 2022-09-22 This book is composed of a general introduction followed by 18 chapters written by teachers and researchers from TU Delft as well as frequent collaborators each describing an issue or tool used in Spatial Planning as it is taught and researched at our university The book aims to give readers around the world an introduction to how spatial planning is conceived at TU Delft Spatial planning is a highly idiosyncratic discipline and is conceived differently around the world In most places spatial planning is part of an architectural approach to the city in which design exists almost autonomously while in other places it is part of a political economical approach to the city What distinguishes Delft is the bridge we have managed to build between design and politics and the way we understand space as foundational for the understanding of socio economic processes This is anchored on a Dutch tradition of city making in which issues of *maakbaarheid* roughly translated by feasibility a guiding concept in Dutch society which was built upon an exceedingly difficult territory to plan design and manage Spatial planning in the Netherlands is hence a combination of planning design and management that is unique Simultaneously spatial planning as a discipline in the Netherlands is rather forward thinking and uniquely equipped to deal with the great societal challenges of our time climate change pandemics growing inequality etc and may be useful for students and teachers elsewhere seeking to learn from other traditions Each chapter addresses issues that we see as central to the way of teaching and researching spatial planning

City and Regional Planning Richard LeGates, 2022-12-30 City and Regional Planning provides a clearly written and lavishly illustrated overview of the theory and practice of city and regional planning With material on globalization and the world city system and with examples from a number of countries the book has been written to meet the needs of readers worldwide who seek an overview of city and regional planning Chapters cover the history of cities and city and regional planning urban design and placemaking comprehensive plans planning politics and plan implementation planning visions and environmental transportation and housing planning The book pays special attention to

diversity social justice and collaborative planning Topics include current practice in resilience transit oriented development complexity in planning spatial equity globalization and advances in planning methods It is aimed at U S graduate and undergraduate city and regional planning geography urban design urban studies civil engineering and other students and practitioners It includes extensive material on current practice in planning for climate change Each chapter includes a case study a biography of an important planner lists of concepts and important people and a list of books articles videos and other suggestions for further learning

The Efficacy of Architecture Tahl Kaminer, 2016-12-08 A significant ideological transition has taken place in the discipline of architecture in the last few years Originating in a displeasure with the starchitecture system and the focus on aesthetic innovation a growing number of architects emboldened by the 2007 8 economic crisis have staged a rebellion against the dominant mode of architectural production Against a disinterested position emulating high art they have advocated political engagement citizen participation and the right to the city Against the fascination with the rarefied architectural object they have promoted an interest in everyday life play self build and personalization At the centre of this rebellion is the call for architecture to re assume its social and political role in society The Efficacy of Architecture supports the return of architecture to politics by interrogating theories practices and instances that claim or evidence architectural agency It studies the political theories animating the architects revisits the emergence of reformist architecture in the late nineteenth century and brings to the fore the relation of spatial organization to social forms In the process a clearer picture emerges of the agency of architecture of the threats to as well as potentials for meaningful societal transformation through architectural design

Shen, 2024-09-23 Future Challenges in Sustainable Development within the Built Environment stimulates and reinterprets the demands of Responsible and Sustainable Development in the Built Environment for future action and development It examines the methods of evaluation the use of technology the creation of new models and the role of human factors for examining and developing the subject over the next twenty years

Contracting with Citizens E.W. (Michiel) Stapper, 2025-06-17 This book demonstrates that contracts community intermediaries and participatory processes are closely interlinked and they can change urban politics In participatory processes residents negotiate with policymakers about the future of their neighborhood In the last few decades this happened increasingly in co creation sessions where citizens are deemed to have an equal position vis a vis developers and civil servants The goal of this book is to understand and theorize how these negotiations affect collective action The book will scrutinize the role of contracts community intermediaries and participatory processes in development projects and planning policies Using a comparative case study of Amsterdam Hamburg and New York this book reveals how seemingly fresh and novel planning practices are used to justify processes of capital accumulation and reveals how morals politics and law can create institutional change The book presents a novel theoretical approach to studying urban politics putting

emphasis on private law and the material arrangements of participatory processes It will be of interest to researchers and students of planning geography sociology public administration and law and will provide valuable lessons for practitioners interested in understanding the effects of contractual governance on neighborhoods **Agroubanism** Enrico Gottero, 2018-08-03 This book provides a much needed overview of the agroubanism topic in the context of territorial studies It carefully looks at rural urban periurban farming in both professional and unprofessional capacities as one of the main sustainable forms of land use and management This cutting edge text explores the various forms of agricultural and urban planning as well as the main innovations that the agro urban approach entails in terms of governance spatial dimensions and functions Agroubanism provides a breadth of information and serves as a practical study of concerns facing policy and decision makers planners and landscape managers as well as farmers managers of protected areas local authorities and local action groups As such this book is suitable as a course accompaniment to provide an overview of the complexity of agro urban issues
