in improving our understanding of the built environment as a diverse complex structure that is the product of ongoing social processes and serves as our own habitat. Conceived as a practical manual of morphological analysis, *The Handbook of Urban Morphology* brings together in one place the core concepts and principles of the discipline, specific up-to-date guidance on analytical methods with clear step-by-step instructions, and case studies demonstrating specific applications in research and professional practice. Illustrative material includes examples from Iran, China, Turkey, Brazil, France, Italy, the UK, and the US, with case studies covering applications in theoretical morphology, environmental performance, historical characterisation, socio-cultural investigations, planning, and design. The result lays the foundation for taking forward and reconciling what might seem to be different views of urban form. It provides a common basis for seeing the built environment as a quasi-natural emergent phenomenon, the material and medium of urban design, a repository of embodied ideas, and the cultural expression of the societies that produce it.

Urban Design: Ornament and Decoration Taner Oc, Steve Tiesdell, 2007-06-07

Urban Design: Ornament and Decoration focuses on decorating the city and how ornament has been used to bring delight to the urban scene. The authors show how the pattern and distribution of street and square and other major elements in the city can be enhanced by the judicious use of decorative surface treatment and by the careful placing of hard and soft landscape features. This second edition, updated by Cliff Moughtin and now available in paperback, includes a new chapter on mud architecture. Case studies of city decoration are also outlined to bring together the ideas discussed and to show how ornament and decoration can be used to emphasize the five components of city form: the path, the node, the edge, the landmark, and the district.

The Roman City and Its Periphery Penelope Goodman, 2006-11-07

The only monograph available on the subject, this book presents archaeological and literary evidence to provide students with a full and detailed treatment of the little investigated aspect of Roman urbanism: the phenomenon of suburban development.

Urban Interactions Michael J. Kelly, Michael Burrows, 2020

This volume is dedicated to eliciting the interactions between localities across late antique and early medieval Europe and the wider Mediterranean. Significant research has been done in recent years to explore how late Roman and post-Roman cities, towns, and other localities communicated vis-à-vis larger structural phenomena such as provinces, empires, kingdoms, institutions, and so on. This research has contributed considerably to our understanding of the place of the city in its context but tends to portray the city as a necessarily subordinate conduit within larger structures rather than an entity in itself or as a hermeneutical object of enquiry. Consequently, not enough research has been committed to examining how local people and communities thought about, engaged with, and struggled against nearby or distant urban neighbors. *Urban Interactions* addresses this lacuna in urban history by presenting articles that apply a diverse spectrum of approaches from archaeological investigation to critical analyses of historiographical and historical biases and developmental consideration of antagonisms between ecclesiastical centers. Through these avenues of investigation, this volume elucidates

the relationship between the urban centers and their immediate hinterlands and neighboring cities with which they might vie or collaborate This entanglement and competition whether subterranean or explicit across overarching political religious or other macro categories is evaluated through a broad geographical range of late Roman provinces and post Roman states to maintain an expansive perspective of developmental trends within and about the city
