Educating America's Military Joan Johnson-Freese, 2013-02-11 This book offers a detailed examination of the professional military education system in the United States from a critical insider's perspective The mission of America's war colleges is to educate senior military officers in both the ways of war and the defence of peace But are these colleges doing the best job possible in carrying out that important mission Military education faces many demands including a lack of preparation by the students uneven quality of the faculty and confusion over the curriculum Many officers attend resident programs at the war colleges programs against the career advice of their leadership despite the fact that they are virtually guaranteed graduation after less than a year of study while others do their best to avoid it entirely As the professional military education system has come under increasing scrutiny and criticism some have even called for closing the war colleges That answer however does not serve the United States well especially in a complex globalized environment where military leaders need the best specialized education to prepare them for their future challenges This volume examines the system that created and supports the perpetuation of this system and why it is imperative that it be fixed Written by a faculty member at a military college with twenty years experience of the PME system this book will be of much interest to students of the US Military US politics and military education in general

The US Military Profession into the 21st Century Sam Sarkesian, Robert Connor, 2006-04-18 This brand new edition of *The US Military Profession into the Twenty First Century* re examines the challenges faced by the military profession in the aftermath of the international terrorist attack on the United States on September 11 2001 While many of the issues facing the military profession examined in the first edition remain the new war and international terrorism have compounded the challenges The US military must respond to the changed domestic and strategic landscapes without diminishing its primary function a function that now many see that goes beyond success on the battlefield Not only has this complicated the problem of reconciling the military professional ethos and *raison d'etre* with civilian control in a democracy it challenges traditional military professionalism This book also studies the notion of a US military stretched thin and relying more heavily on the US Federal Reserves and National Guard These developments make the US military profession increasingly linked to public attitudes and political perspectives In sum the challenge faced by the US military profession can be termed a dual dilemma It must respond effectively to the twenty first century strategic landscape while undergoing the revolution in military affairs and transformation At the same time the military profession must insure that it remains compatible with civilian cultures and the

US political social system without eroding its primary function This is an invaluable book for all students with an interest in the US Military and of strategic studies and military history in general **Military Design Thinking** Aaron P.

Jackson,2024-09-30 This book examines the newly emergent field of military design thinking how it has been developed inside and outside of military doctrine and the paradigms that underlie its key thinkers and methodologies From the emergence of its initial methodologies in the late 1990s military design thinking s development rapidly accelerated in the mid 2000s in response to perceived failures of existing military doctrine and practice to adapt to the wars of the early 21st century To establish a foundation for exploring the significance of the challenge military design thinking presented to dominant approaches to warfare the early chapters in the book examine the ontology and epistemology of military doctrine which is defined as a written expression of a military s institutional belief system regarding how to wage war They also explain how attempts to incorporate military design thinking into doctrine ultimately led to its assimilation into this belief system requiring military design thinkers to continue to explore and develop the field outside of doctrine Since the mid 2010s non doctrinal military design methodologies have become increasingly prominent within several Western militaries including the US Canada UK Australia and several European militaries Later chapters offer an exploration of the paradigms underlying non doctrinal as well as doctrinal design methodologies This book highlights how the field has evolved shows how military design thinking differs from its civilian equivalents developed in fields such as commerce and business management and discusses how it may evolve in the near future This book will be of much interest to students of military studies security studies and international relations as well as to military professionals **Contemporary Military Theory** Jan Angstrom,J.J.

Widen,2014-07-17 The book aims to provide the reader with a state of the art introduction to classic and modern military theory The text accounts for the most important theories within the field by developing and analyzing these theories as well as problematizing both their normative and explanatory aims While focusing on military theory the book does not only reflect a single way of relating to knowledge of war and warfare but furthers learning by introducing contrasting perspectives as well as constantly criticizing the theories There is a clear need for an introductory text for the entire field of military theory that focuses whole heartedly on the theories not on their context or how they are expressed in practice during war This book covers such questions as how we should understand the changing character of war the utility of force and how the pursuit of political ends is achieved through military means It draws upon and illustrates military thought through a wide ranging number of examples from the Napoleonic Wars to the current war in Afghanistan This book will be of great interest for students of military theory strategic studies security studies and defence studies *Quarterly Review of Military Literature* ,1984 *The Dragon Extends its Reach* Larry M. Wortzel,2013-06-15 China has evolved from a nation with local and regional security interests to a major economic and political power with global interests investments and political commitments It now requires a military that can project itself around the globe albeit on a limited scale to secure its interests

Therefore as Larry M Wortzel explains the Chinese Communist Party leadership has charged the People's Liberation Army PLA with new and challenging missions that require global capabilities. Advances in technology and the development of indigenous weapons platforms in China combined with reactions to modern conflicts have produced a military force very different from that which China has fielded in the past. Wortzel presents a clear and sobering picture of the PLA's modernization effort as it expands into space and cyberspace and as it integrates operations in the traditional domains of war. This book will appeal to the specialist in security and foreign policy issues in Asia as well as to the person interested in arms control, future warfare and global military strategies. The book puts China's military growth into historical context for readers of recent military and diplomatic history. Security, Strategy and Military Change in the 21st Century Jo Inge Bekkevold, Ian Bowers, Michael Raska, 2015-05-22. This edited volume explores and analyses strategic thinking, military reform and adaptation in an era of Asian growth, European austerity and US rebalancing. A significant shift in policy, strategy and military affairs is underway in both Asia and Europe, with the former gaining increasing prominence in the domain of global security. At the same time, the world's powers are now faced with an array of diverse challenges. The resurgence of great power politics in both Europe and Asia, along with the long-term threats of terrorism, piracy and sustained geopolitical instability, has placed great strain on militaries and security institutions operating with constrained budgets and wary public support. The volume covers a wide range of case studies, including the transformation of China's military in the 21st century, the internal and external challenges facing India, Russia's military modernization program and the USA's reassessment of its strategic interests. In doing so, the book provides the reader with the opportunity to conceptualize how strategic thinking, military reform, operational adaptation and technological integration have interacted with the challenges outlined above. With contributions by leading scholars and practitioners from Europe and Asia, this book provides a valuable contribution to the understanding of strategic and operational thinking and adjustment across the world. This book will be of much interest to students of military and strategic studies, security studies, defence studies, Asian politics, Russian politics, US foreign policy and IR in general. *Professional Journal of the United States Army*, 1990. *The Politics of Civil-Military Cooperation* C. Ankersen, 2014-09-09. Ankersen examines Canada's civil-military cooperation efforts in Kosovo, Bosnia and Afghanistan through the lens of Clausewitz's Remarkable Trinity. The book reveals how military action is the product of influences from the government, the armed forces and the people at home. **When Soldiers Say No** Andrea Ellner, Paul Robinson, David Whetham, 2016-02-11. Traditionally few people challenged the distinction between absolute and selective conscientious objection by those being asked to carry out military duties. The former is an objection to fighting all wars, a position generally respected and accommodated by democratic states, while the latter is an objection to a specific war or conflict, theoretically and practically a much harder idea to accept and embrace for military institutions. However, a decade of conflict not clearly aligned to vital national interests combined with recent acts of selective conscientious objection by members of the military.

have led some to reappraise the situation and argue that selective conscientious objection ought to be legally recognised and permitted Political social and philosophical factors lie behind this new interest which together mean that the time is ripe for a fresh and thorough evaluation of the topic This book brings together arguments for and against selective conscientious objection as well as case studies examining how different countries deal with those who claim the status of selective conscientious objectors As such it sheds new light on a topic of increasing importance to those concerned with military ethics and public policy within military institutions government and academia **Parameters**, 2000 U.S. Military Strategy in the Gulf (Routledge Revivals) Amitav Acharya, 2014-01-02 First published in 1989 this title explores the nature and dimensions of the U S strategy in the Gulf in the formative years that followed the fall of the Shah the Soviet invasion of Afghanistan and the outbreak of the Iran Iraq war It describes the formation of the U S Rapid Deployment Joint Task Force and the U S Central Command their force structure and the network of U S bases and facilities in the region The role of pro Western countries in the wider region in particular Pakistan Egypt Jordan and Israel in the formulation of strategy is discussed in detail along with a more general assessment of the achievements and failures of U S strategy in the Gulf towards the end of the 1980s In light of the persistent struggle for peace within the Middle East this is a timely reissue which will be of great interest to students researching U S military strategy over the past thirty years *Defence Transformation in Europe: Evolving Military Roles* T. Edmunds, M. Malešič, 2005-11-15 Consisting of eight parts this book includes the changing nature of the defence of national territory role expeditionary warfare peacekeeping and humanitarian intervention defence diplomacy domestic military assistance and internal security The authors come from a range of different groups involved in defence transformation processes *Mars Adapting* Francis Hoffman, 2021-03-15 As Clausewitz observed In war more than anywhere else things do not turn out as we expect The essence of war is a competitive reciprocal relationship with an adversary Commanders and institutional leaders must recognize shortfalls and resolve gaps rapidly in the middle of the fog of war The side that reacts best and absorbs faster increases its chances of winning Mars Adapting examines what makes some military organizations better at this contest than others It explores the institutional characteristics or attributes at play in learning quickly Adaptation requires a dynamic process of acquiring knowledge the utilization of that knowledge to alter a unit s skills and the sharing of that learning to other units to integrate and institutionalize better operational practice Mars Adapting explores the internal institutional factors that promote and enable military adaptation It employs four cases drawing upon one from each of the U S armed services Each case was an extensive campaign with several cycles of action counteraction In each case the military institution entered the war with an existing mental model of the war they expected to fight For example the U S Navy prepared for decades to defeat the Japanese Imperial Navy and had developed carrier based aviation Other capabilities particularly the Fleet submarine were applied as a major adaptation The author establishes a theory called Organizational Learning Capacity that captures the transition of experience and knowledge from individuals

into larger and higher levels of each military service through four major steps The learning change cycle is influenced he argues by four institutional attributes leadership organizational culture learning mechanisms and dissemination mechanisms The dynamic interplay of these institutional enablers shaped their ability to perceive and change appropriately
