The Value Of Life The Value Of Life:

Assigning Values to Life , Contingent Valuation, Transport Safety and the Value of Life Nathalie G. Schwab Christe,Nils C. Soguel,1995-05-31 Over the past two decades economic theory has extended its field of application to non market goods such as environmental resources and health Although it is impossible to assign a price to these goods on the basis of market mechanisms alone the fact that they have no price does not mean that they have no value One technique in which economists have shown a marked interest is the contingent valuation method CVM which has mainly been used to assign a monetary value to environmental goods It was first applied to natural resources used for recreational purposes CVM has been applied to health only recently so that studies in this field are relatively more scarce than those dealing with the environment although several valuation methodology surveys are available There has hitherto been no book which has drawn together and analyzed recent contingent valuations in the field of transport accidents Contingent Valuation Transport Safety and the Value of Life provides an overview of the experiments conducted in Europe Denmark France the U K Sweden and Switzerland While a number of contributions are critical others show how the estimates obtained in the area of road transport can be used to assess the adverse health effects of other causes such as public transport accidents or air pollution

Meaning in Life Irving Singer,1992 The nearest thing to a rational discernment of meaning in life Irvin Singer suggests is the discernment of goals and values that we can find gratification and fulfillment in pursuing He offers wise counsel to that end along with rewarding glimpses into a wide range of literature **The Value of Human Dignity. A Socio-cultural Approach to Value Crisis among Igbo People of Nigeria** Chinedu Paul Ezenwa,2020-11-10 Where today is a specific original and stable basis for a Political order to be found What does the human dignity mean in the midst of the general crises of values In the face of the ambivalent achievements of modernity and enlightenment do the values of Christianity which until now have been regarded as the objective norm fail in its contact with the primal culture and the culture of the African communities Where in this classes are the weakening and strengthening and specific challenges of this African People This field of conflict must not only be described but above all to ask about new opportunities to get out of the crisis of the value of human dignity in the Igbo society of Southeastern Nigeria Ezenwas work seeks and aids understanding using the facility of examining the subject of dignity in Igbo culture to throw light that casts much farther than the subject matter begging for further inquiry into other complementary aspects of the culture In other to achieve this interdisciplinary research was needed **Values of Love and Ethical Reflection** Edmund Husserl,2024-12-20 This first volume of Husserlian Legacies Themes for the 21st Century focuses on hitherto underexamined dimensions of Husserl s philosophical thinking and in particular values and love Texts in this series draw from the variety of Husserl s rich original works they are selected and arranged with the support of the Husserl Archives Leuven The texts are made available in English and are primarily targeted to advanced undergraduates graduate students and scholars This volume helps the reader both to investigate the themes of

value and love and to gauge their role in Husserl's reflections on related topics his analysis of philosophy the sciences as vocational tasks the emotions and the community of love as well as his personalistic reformulation of the categorical imperative The texts gathered edited and translated in this volume have far reaching implications ranging from axiology and individual and social ethics to the philosophy of emotions action theory and the philosophy of science

Biotechnology and the Integrity of Life Mr Michael Hauskeller, 2012-10-01 There are things that can be done and are done to life on earth whether it be human animal or plant life which even if they do not involve or produce any suffering are still considered morally wrong by a large proportion of the public Such things include changing the nature of living beings by means of genetic engineering in order to enhance their health or more likely with animals and plants their utility or impairing their ability to live autonomously or unduly instrumentalizing them Yet many scientists are puzzled about the unwillingness of the public to feel much enthusiasm about a technology that in their view promises great benefits to humans and does not seem to cause more harm to animals than other practices which most of us do not question at all In this book Michael Hauskeller takes public fears seriously and offers the idea of biological integrity as a clarifying principle which can then be analyzed to show that seemingly irrational public concerns about genetic engineering are not so irrational after all and that a philosophically sound justification of those concerns can indeed be given

Viable Values Tara Smith, 2000-01-12 Viable Values examines the most basic foundations of value and morality demonstrating the shortcomings of major traditional views and proposing that morality is grounded in the objective requirements of human life Smith argues that human beings need to be moral in order to live explaining how life is the standard of morality how flourishing is the proper end and reward of living morally and how an intelligent egoism is the path to flourishing

The Ground and Goal of Human Life Charles Gray Shaw, 1919

Longevity and Quality of Life Robert N. Butler, Claude Jasmin, 2012-12-06 Nations around the world are experiencing a spectacular increase in longevity Society as a whole is being challenged by issues arising from this revolution in longevity Although the specter of the loneliness and existential suffering of older citizens is such that some people under the age of 65 find it difficult to conceive of a long term future persons over 85 have proven that aging does not necessarily preclude a healthy and productive life Extraordinary progress in both curative and preventive medicine justifies optimism about the quality of life and state of well being that can be enjoyed even in great old age We should look to professionals in diverse fields to develop creative solutions to the inevitable issues that will arise with aging Governments must prepare for the future health of their citizens by making long term investments to educate all sectors of society in the value of good nutrition exercise and lifestyles that enhance well being throughout life Also governments should realize that the main cause of health care expenditure is serious illness which occurs in persons of all ages and not predominantly in older people Early detection can help save lives as well Health and longevity of life will ultimately end as a political issue What is needed is long term government investments necessary for a viable health policy The question arises will world leaders be able to commit to

such a policy Two major socioeconomic phenomena may have a regulating effect on this issue The first is the emergence of pressure groups that have come into being in response to a particular health issue such as AIDS The second is the emergence of ethics committees in developed nations that deal solely with health issues Euthanasia, Abortion, Death Penalty and Religion - The Right to Life and its Limitations Hans-Georg Ziebertz, Francesco Zaccaria, 2018-11-16 This book considers how the termination of life might be accepted in the view of a general obligation to protect life It features more than 10 papers written by scholars from 14 countries that offer international comparative empirical research Inside readers will find case studies from such areas as India Chile Germany Italy England Palestine Lithuania Nigeria and Poland The papers focus on three limitations of the right to life the death penalty abortion and euthanasia The contributors explore how young people understand and evaluate the right to life and its limitations The book presents unique empirical research among today's youth and reveals that among other concepts religiosity matters It provides insight into the acceptance perception and legitimation of human rights by people from different religious and cultural backgrounds This investigation rigorously tests for inter individual differences regarding political and judicial rights on religious grounds while controlling for other characteristics It will help readers better understand the many facets of this fundamental yet controversial philosophical question The volume will be of interest to students researchers as well as general readers searching for answers *Value Practices in the Life Sciences and Medicine* Isabelle Dussauge, Claes-Fredrik Helgesson, Francis Lee, 2015-01-29 Many deep concerns in the life sciences and medicine have to do with the enactment ordering and displacement of a broad range of values This volume articulates a pragmatist stance for the study of the making of values in society exploring various sites within life sciences and medicine and asking how values are at play This means taking seriously the work scientists regulators analysts professionals and publics regularly do in order to define what counts as proper conduct in science and health care what is economically valuable and what is known and worth knowing A number of analytical and methodological means to investigate these concerns are presented The editors introduce a way to indicate an empirically oriented research program into the enacting ordering and displacing of values They argue that a research programme of this kind makes it possible to move orthogonally to the question of what values are and thus ask how they are constituted This rectifies some central problems that arise with approaches that depend on stabilized understandings of value At the heart of it such a research programme encourages the examination of how and with what means certain things come to count as valuable and desirable how registers of value are ordered as well as displaced It further encourages a sense that these matters could be and sometimes simultaneously are otherwise *Dreams, Evolution, and Value Fulfillment, Volume Two* Jane Roberts, 2011-07-08 The Seth books present an alternate map of reality with a new diagram of the psyche useful to all explorers of consciousness Deepak Chopra M D author of The Seven Spiritual Laws of Success From the Bestselling Author of Seth Speaks and The Nature of Personal Reality In the first volume of Dreams Evolution and Value

Fulfillment Seth presented an in depth picture of the origin of all life from the inner dream world to the vast display of material creation Here in Volume Two Seth continues his explanation of the physical world as an ongoing self creation a direct and intentional outgrowth of the wisdom of the life forms that inhabit it including humanity He expands upon his vision of a thoroughly animate universe where virtually every possibility not only exists but is constantly encouraged to achieve its highest potential In his typical awe inspiring manner Seth sheds light on many controversial and complex subjects including The ways in which our religions have stifled the human spirit Surprising insight into life s meaning and purpose The genetic basis of faith hope and charity The pursuit of pleasure as a fundamental human need How each species keeps millions of characteristics within its genetic bank for various contingencies Dreams are mental work and play combined psychic and emotionally rich creative dramas They also involve you in the most productive of enterprises as you begin to play with versions of events that are being considered for physical actualization Jane Roberts Speaking for Seth *Encyclopedia of Quantitative Risk Analysis and Assessment* ,2008-09-02 Leading the way in this field the Encyclopedia of Quantitative Risk Analysis and Assessment is the first publication to offer a modern comprehensive and in depth resource to the huge variety of disciplines involved A truly international work its coverage ranges across risk issues pertinent to life scientists engineers policy makers healthcare professionals the finance industry the military and practising statisticians Drawing on the expertise of world renowned authors and editors in this field this title provides up to date material on drug safety investment theory public policy applications transportation safety public perception of risk epidemiological risk national defence and security critical infrastructure and program management This major publication is easily accessible for all those involved in the field of risk assessment and analysis For ease of use it is available in print and online *Ethics and Experience* Lloyd Steffen,2012-08-09 Ethics and Experience introduces students to the key topics in moral theory through provocative moral issues just war abortion physician assisted suicide the death penalty and more Steffen helps students bridge the gap between ethical theory and experience through developing a common agreement ethical system that is applicable to a variety of moral problems and issues with clear language and real life examples **~Theœ Meaning and Value of Life** Rudolf Eucken,1913 *Nietzsche, Truth and Transformation* K. Mitcheson,2015-12-04 Providing a novel interpretation of Nietzsche s philosophical method Nietzsche Truth and Transformation addresses the philosophical problem of on what basis if knowledge is always from a perspective one can criticise modern humanity and culture and how such critique can be actively responded to **What Makes Life Worth Living** Sherwood Sweet Knight,1912 **Incomparable Values** John Nolt,2022-02-10 People tend to rank values of all kinds linearly from good to bad but there is little reason to think that this is reasonable or correct This book argues to the contrary that values are often partially ordered and hence frequently incomparable Proceeding logically from a small set of axioms John Nolt examines the great variety of partially ordered value structures exposing fallacies that arise from overlooking them He reveals various ways in which incomparability is obscured using linear

indices to summarize partially ordered data relying on an inadequately defined concept of parity or conflating incomparability with vagueness Incomparability can enrich and clarify a range of topics including the paradoxes of Derek Parfit rational decision theory and the infinite values of theology Finally Nolt shows how to generalize many of the concepts introduced earlier explores the intricate depths of certain noteworthy partially ordered value structures and argues for the finitude of value Incomparable Values will be of interest to scholars and advanced students working in ethics value theory rational decision theory and logic
