The War Scientists The Brains Behind Military Technologies Of Destruction And Defence:

The War Scientists Thomas J. Craughwell,2011 **The War Scientists** Thomas J. Craughwell,2011 Looks at the individuals through history who have invented military technologies the human faces behind life saving and death dealing science It examines their motivations loyalties and passions and sets out to investigate why they used their intellect in the service of war for reasons variously noble patriotic corrupt self serving or cynical This revealing book discusses the scientists personalities their education and their ethics It examines their inventions the use of these technologies in combat their impact at the time and as appropriate their place in scientific progress and their incorporation into mainstream technology

Secret Science Ulf Schmidt,2015-07-09 From the early 1990s allegations that servicemen had been duped into taking part in trials with toxic agents at top secret Allied research facilities throughout the twentieth century featured with ever greater frequency in the media In Britain a whole army of over 21 000 soldiers had participated in secret experiments between 1939 and 1989 Some remembered their stay as harmless but there were many for whom the experience had been all but pleasant sometimes harmful and in isolated cases deadly Secret Science traces for the first time the history of chemical and biological weapons research by the former Allied powers particularly in Britain the United States and Canada It charts the ethical trajectory and culture of military science from its initial development in response to Germany's first use of chemical weapons in the First World War to the ongoing attempts by the international community to ban these types of weapons once and for all It asks whether Allied and especially British warfare trials were ethical safe and justified within the prevailing conditions and values of the time By doing so it helps to explain the complex dynamics in top secret Allied research establishments the desire and ability of the chemical and biological warfare corps largely comprised of military officials scientists and expert civil servants to construct and identify a never ending stream of national security threats which served as flexible justification strategies for the allocation of enormous resources to conducting experimental research with some of the most deadly agents known to man Secret Science offers a nuanced non judgemental analysis of the contributions made by servicemen scientists and civil servants to military research in Britain and elsewhere not as passive helpless victims without voices or as laboratory and desk perpetrators without a conscience but as history's actors and agents of their own destiny As such it also makes an important contribution to the burgeoning literature on the history and culture of memory

The Brain of The Creator of The World's Destruction Einsten Oppenheimer Rudiyan,2023-07-01 The discovery of the atomic bomb is one of the most influential technological breakthroughs in human history However political and military involvement played a role in the development of nuclear weapons including the atomic bomb This raises the question of who should be held responsible for the discovery of the atomic bomb Several scientists worldwide collaborated in the project to develop nuclear weapons during World War II One prominent scientist involved was Robert Oppenheimer a theoretical physicist and one of the main leaders in the Manhattan Project a secret U S project aimed at developing the atomic bomb

Albert Einstein on the other hand made significant theoretical contributions to modern physics including understanding the concept of mass energy equivalence that became the basis for building the atomic bomb However Einstein himself was not actively involved in the development or production of the atomic bomb Meanwhile the decision to use the atomic bomb as a weapon was made by the United States then led by President Harry S Truman Truman was the one who approved the dropping of the atomic bombs on Hiroshima and Nagasaki as part of their efforts to end World War II This decision was based more on political and military considerations including the desire to quickly end the war and avoid a potential ground invasion that could have resulted in even more casualties Thus it is essential to realize that the discovery of the atomic bomb involved various interconnected elements including the contributions of scientists like Einstein and Oppenheimer as well as political and military decisions that ultimately determined the use of the atomic bomb as a weapon of war This history teaches us to always think wisely when dealing with technologies that can have significant impacts on humanity and the importance of maintaining world peace and security The question of who is responsible for the discovery of the atomic bomb This book will reveal the truth about who is truly at fault between these two close friends Not many know their story so it is unfortunate if you miss the facts presented in this book if you want to know the real truth about who is to blame among these two scientists Buku persembahan penerbit LembarLangitGroup LembarLangit
