The Way Of Knowledge Managing The Unmanageable:

The Way of Knowledge Stowe Boyd, 2000 Learning and knowledge in business is undergoing a dramatic and necessary revolution Business leaders are redefining the concept of leadership and reevaluating the basic premises of management in the knowledge driven company Knowledge management is a slippery concept Knowledge is a set of related beliefs and experiences in the mind of an individual not a physical asset like capital equipment How can we manage that which resides with the minds of others intangible and invisible How can we manage the unmanageable Rather than a how to manual for mounting knowledge management initiatives in this book Stowe Boyd examines the new realities for business The value of a business is no longer principally based on tangible assets but on intangibles Information technology is the prime mover of the new economy and those who master IT increase their chances of success Our ways of management a largely leftover from the industrial era of the immediate past and are not naturally workable in the new business context In exploring the contradictions posed by the old and the new economic order business leaders learn to balance the apparently opposing interests of delivering value to customer and encouraging the development and sharing of knowledge in the firm

The Spectacle of Violence Gail Mason, 2003-09-02 Drawing on in depth interviews with women reflecting a range of experiences of verbal hostility physical violence and sexual violence Spectacle of Violence explores the issues surrounding violence and hostility towards lesbians and gay men Challenging current thinking Gail Mason highlights the ways in which different identities bodes and systems of through interact and asks fundamental questions Where does violence come from What effects does it have How do lesbians and gay men manage the risk of violence What is the relationship between violence and power She argues for the importance of thinking about homophobic violence in the context of other core issues such as gender and race Focusing on real life experiences of violence The Spectacle of Violence is an important contribution to current thought about violence Moving beyond issues of causation and prevention it offers new ways of theorizing the relationship between identity knowledge and power

Hate Crimes Barbara Perry, 2009-03-05 This book offers a comprehensive approach to understanding hate crime its causes consequences prevention and prosecution Hate crimes continue to be a pervasive problem in the United States The murder of Matthew Shepard the lynching of James Byrd the murderous rampage of Benjamin Smith and anti Muslim violence remind us that incidence of deadly bigotry is not only a recurring chapter in U S history but also a part of our present day world Contrary to common belief hate mongers who commit crimes are rarely members of the Ku Klux Klan or a skinhead group In fact fewer than 5 percent of identifiable offenders are members of organized hate groups Yet rather than being an individual crime hate crime represents an assault against all members of stigmatized and marginalized communities To fully understand the phenomenon of hate crime and reduce its incidence it is necessary to clearly define the term itself to examine the victims and the offenders and to evaluate the consequences and harms of hate crimes This comprehensive five volume set carefully addresses the disturbing variety

and incidence of hate crimes exposing their impacts on the broader realms of crime punishment individual communities and society The contributing authors and editors pay critical attention to cutting edge topics such as online hate crimes hate based music anti Latino hostilities Islamaphobia hate crimes in the War on Terror school based anti hate initiatives and more The final volume of Hate Crimes provides valuable food for thought on possible legislative educational social policy or community organizational responses to the varied forms of hate crime

The Open Knowledge Society Miltiadis D. Lytras, John M. Carroll, Ernesto Damiani, Robert D. Philosophy, Rhetoric, and the End of Knowledge Steve Fuller, James H. Collier, 2003-12-08 In this second edition of Steve Fuller's original work *Philosophy Rhetoric and the End of Knowledge A New Beginning for Science and Technology Studies* James Collier joins Fuller in developing an updated and accessible version of Fuller's classic volume The new edition shifts focus slightly to

balance the discussions of theory and practice and the writing style is oriented to advanced students. It addresses the contemporary problems of knowledge to develop the basis for a more publicly accountable science. The resources of social epistemology are deployed to provide a positive agenda of research teaching and political action designed to bring out the best in both the ancient discipline of rhetoric and the emerging field of science and technology studies (STS). The authors reclaim and integrate STS and rhetoric to explore the problems of knowledge as a social process, problems of increasing public interest that extend beyond traditional disciplinary resources. In so doing, the differences among disciplines must be questioned; the exercise of STS and the disciplinary boundaries must be renegotiated; the exercise of rhetoric. This book innovatively integrates a sophisticated theoretical approach to the social processes of creating knowledge with a developing pedagogical apparatus. The thought questions at the end of each chapter, the postscript and the appendix allow the reader to actively engage the text in order to discuss and apply its theoretical insights. Creating new standards for interdisciplinary scholarship and communication, the authors bring numerous disciplines into conversation in formulating a new kind of rhetoric geared toward greater democratic participation in the knowledge making process. This volume is intended for students and scholars in rhetoric of science, science studies, philosophy and communication and will be of interest in English sociology and knowledge management arenas as well.
