Religion and the Specter of the West Arvind-Pal S. Mandair, 2009-10-23 Arguing that intellectual movements such as deconstruction postsecular theory and political theology have different implications for cultures and societies that live with the debilitating effects of past imperialisms Arvind Mandair unsettles the politics of knowledge construction in which the category of religion continues to be central Through a case study of Sikhism he launches an extended critique of religion as a cultural universal At the same time he presents a portrait of how certain aspects of Sikh tradition were reinvented as religion during the late nineteenth and early twentieth centuries India's imperial elite subtly recast Sikh tradition as a sui generis religion which robbed its teachings of their political force In turn Sikhs began to define themselves as a nation and a world religion that was separate from but parallel to the rise of the Indian state and global Hinduism Rather than investigate these processes in isolation from Europe Mandair shifts the focus closer to the

political history of ideas thereby recovering part of Europe's repressed colonial memory Mandair rethinks the intersection of religion and the secular in discourses such as history of religions postcolonial theory and recent continental philosophy Though seemingly unconnected these discourses are shown to be linked to a philosophy of generalized translation that emerged as a key conceptual matrix in the colonial encounter between India and the West In this riveting study Mandair demonstrates how this philosophy of translation continues to influence the repetitions of religion and identity politics in the lives of South Asians and the way the academy state and media have analyzed such phenomena

Why Philosophy Matters for the Study of Religion—and Vice Versa Thomas A. Lewis, 2015-12-18 Work in philosophy of religion is still strongly marked by an excessive focus on Christianity and to a lesser extent Judaism almost to the exclusion of other religious traditions Moreover in many cases it has been confined to a narrow set of intellectual problems without embedding these in their larger social historical and practical contexts Why Philosophy

Matters for the Study of Religion and Vice Versa addresses this situation through a series of interventions intended to work against the gap that exists between much scholarship in philosophy of religion and important recent developments that speak to religious studies as a whole. This volume takes up what in recent years has often been seen as a fundamental reason for excluding religious ethics and philosophy of religion from religious studies: their explicit normativity. Against this presupposition, Thomas A. Lewis argues that normativity is pervasive, not unique to ethics and philosophy of religion, and therefore not a reason to exclude them from religious studies. Lewis bridges more philosophical and historical subfields by arguing for the importance of history to the philosophy of religion. He considers the future of religious ethics, explaining that the field as a whole should learn from the methodological developments associated with recent work in comparative religious ethics, and comparative religious ethics should no longer be conceived as a distinct subfield. The concluding chapter engages broader post-9/11 arguments about the importance of studying religion, arguing that prominent contemporary notions of religious literacy actually hinder our ability to grasp religion's significance and impact in the world today.

Religion and the Secular Timothy Fitzgerald, 2014-12-05 Religion has dominated colonialism since the 16th century. Religion and the Secular critically examines how religion has been used to subject indigenous concepts to the needs of colonial powers. Essays present the colonial relationship from the perspective of colonized cultures, including Mexico, Guatemala, Vietnam, India, Japan, South Africa, and Canada, and colonizing powers, namely England, Germany, and the United States. The volume offers a historical and ethnographical analysis of the relationship between the sacred and the secular, examining religion in relation to politics, economics, and civil power.

Violence, Religion, Peacemaking Douglas Irvin-Erickson, Peter C. Phan, 2016-09-09 This volume explores how religious leaders can contribute to cultures of peace around the world. The essays are written by leading and emerging scholars and practitioners who have lived, taught, or worked in the areas of conflict, about which they write. Connecting the theory and practice of religious peacebuilding to illuminate key challenges facing interreligious dialogue and interreligious peace work, the volume is explicitly interreligious, intercultural, and global in perspective. The chapters approach religion and peace from the vantage point of security studies, sociology, ethics, ecology, theology, and philosophy. A foreword by David Smock, the Vice President of Governance, Law, and Society, and Director of the Religion and Peacebuilding Center at the United States Institute of Peace, outlines the current state of the field.

What is Religion? Nigel Ajay Kumar, 2014-01-15 What Is Religion is one of those questions rarely asked by Christian theologians who engage in interreligious discourse. Nigel Ajay Kumar makes the case, however, that to answer this question is critical for Christian scholars who want to negotiate multiple religious identities, as well as for those who want a clearer understanding of their own faith as religion. Kumar takes a historical and theological approach to answering this question. The history of the concept of religion is traced from biblical times to the Indian independence era. Then a theological answer is offered, not only by looking at the classical Indian theologian Pandipedi Chenchiah, but also by listening to other contemporary secular and

theological voices This is the South Asian Edition of the original Wipf Stock edition 2013 with the same name *The Life and Work of Ernesto De Martino* Flavio A.
