Troublemaker Chester E. Finn, Jr., 2008-02-04 Few people have been more involved in shaping postwar U S education reforms or dissented from some of them more effectively than Chester Finn Assistant secretary of education under Ronald Reagan and an aide to politicians as different as Richard Nixon and Daniel Moynihan Finn has also been a high school teacher an education professor a prolific and best selling writer a think tank analyst a nonprofit foundation president and both a Democrat and Republican This remarkably varied career has given him an extraordinary insider s view of every significant school reform movement of the past four decades from racial integration to No Child Left Behind In *Troublemaker* Finn has written a vivid history of postwar education reform that is also the personal story of one of the foremost players and mavericks in American education Finn tells how his experiences have shaped his changing views of the three major strands of postwar school reform standards driven choice driven and profession driven Of the three Finn now believes that a combination of choice and standards has the greatest potential but he favors this approach more on pragmatic than ideological grounds arguing that parents should be given more options at the same time that schools are allowed more flexibility and held to higher performance norms He also explains why education reforms of all kinds are so difficult to implement and he draws valuable lessons from their frequent failure Clear eyed yet optimistic Finn ultimately gives grounds for hope that the best of today s bold initiatives from charter schools to technology to makeovers of school system governance are finally beginning to make a difference

Excellence for All Jack Schneider,2011 By the early twenty first century a startling consensus had emerged about the overall aim of American school reform In an era of political discord and in a field historically known for contentiousness the notion of promoting educational excellence for all students was a distinct point of bipartisan agreement Shaped by a corps of entrepreneurial reformers intent on finding what works and taking it to scale this hybrid vision won over the nation s most ambitious and well resourced policy leaders at foundations and nonprofits in state and federal government and in urban school districts from coast to coast Excellence for all might at first glance appear to be nothing more than a rhetorical flourish Who after all would oppose the idea of a great education for every student Yet it is hardly a throwaway phrase Rather it represents a surprising fusion of educational policy approaches that had been in tense opposition throughout the twentieth century those on the right favoring social efficiency and those on the left supporting social justice This book seeks to understand why the excellence for all vision took hold at the time it did unpacks the particular beliefs and assumptions embedded in it and details the often informal coalition building that produced this period of consensus Examining the nation s largest urban school districts Los Angeles Chicago and New York the author details three major reform efforts in chapters titled The Right Space The Small Schools Movement The Right Teachers Teach for America and The Right Curriculum Expanding Advanced Placement
