chosen an appropriate time to create a companion publication to the first Handbook on Teaching Social Issues published in 1996. During the last few years, social studies teachers have been confronted by student inquiries on a plethora of historical and contemporary issues that implore for the implementation of an interdisciplinary approach to the teaching of anthropology, economics, geography, government, history, sociology, and psychology in order for students to make sense of the world around them and develop their own voices. This demands a student-centered focus in the classroom where problematic questions must be addressed and investigated in depth in order to increase social understanding and active participation toward social progress. This volume provides crucial upgrades to the original handbook, including a greater emphasis on teaching issues in the elementary grades, the inclusion of issues pertaining to human rights, genocide, and sustainability to be addressed in the secondary grades, and addressing issues related to disabilities.
