Wellness Body Mind Geetha Patel:

Wellness Geetha Patel, 2016-01-04 This book is the product of the author's curiosity regarding the secrets behind good health and well being of a person even after the age of seventy. She was inspired by her neighbor's zest for life and her positive attitude during her advanced years. This prompted her to interview many seniors in Canada and in India to find out the secret to their well being and she found six most common elements. Even though the book starts with these it also reveals interesting natural remedies used to cure some unique and simple ailments, the medicinal value of some herbs and spices, beauty and hair treatments and face masks used when Geetha was growing up and then concludes with some healthy vegetarian and non vegetarian recipes. A fascinating component of this book is the real life stories from the author's experiences. Useful for young and old men and women.

Risky Bodies & Techno-Intimacy Geeta Patel, 2017-08-01 *Risky Bodies and Techno Intimacy* traverses disparate and uncommon routes to explore how people grapple with the radical uncertainties of their lives. In this edgy evocative journey through myriad interleaved engagements including the political economies of cinema, the emergent shapes taken by insurance, debt and mortgages, gender and sexuality and domesticity and nationalism, Geeta Patel demonstrates how science and technology ground our everyday intimacies. The result is a deeply poetic and philosophical exploration of the intricacies of techno intimacy, revealing a complicated and absorbing narrative that challenges assumptions underlying our daily living.

Health and Wellness Measurement Approaches for Mobile Healthcare Gita Khalili Moghaddam, Christopher R. Lowe, 2018-09-22 This book reviews existing sensor technologies that are now being coupled with computational intelligence for the remote monitoring of physical activity and ex vivo biosignatures. In today's frenetic world, consumers are becoming ever more demanding; they want to control every aspect of their lives and look for options specifically tailored to their individual needs. In many cases, suppliers are catering to these new demands, as a result, clothing, food, social media, fitness and banking services are all being democratised to the individual. Healthcare provision has finally caught up to this trend and is currently being rebooted to offer personalised solutions while simultaneously creating a more effective, scalable and cost effective system for all. The desire for personalisation, home monitoring and treatment and provision of care in remote locations or in emerging and

impoverished nations that lack a fixed infrastructure is leading to the realisation that mobile technology might be the best candidate for achieving these goals A combination of several technological healthcare and financial factors are driving this trend to create a new healthcare model that stresses preventative health care rather than sick care and a shift from volume to value Mobile healthcare mhealth which could also be termed the internet of people refers to the integration of sensors and smartphones to gather and interpret clinical data from patients in real time Most importantly with an ageing population suffering multiple morbidities mhealth could provide healthcare solutions to enhance chronically ill patients quality of life
