Lovejoy, 2021-08-01 The Atlantic and Africa breaks new ground by exploring the connections between two bodies of scholarship that have developed separately from one another On the one hand the second slavery perspective that has reinterpreted the relation of Atlantic slavery and capitalism by emphasizing the extraordinary expansion of new frontiers of slave commodity production and their role in the economic social and political transformations of the nineteenth century world economy On the other hand Africanist scholarship that has established the importance of slavery and slave trading in Africa to the political economic and social organization of African societies during the nineteenth century Taken together these two movements enable us to delineate the processes forming the capitalist world economy establish its specific geographical and historical structure and reintegrates Africa into the transformations in the world economy This volume explores this paradigm at diverse levels ranging from state formation and the reorganization of world markets to the creation of new social roles and identities

Contemporary Africa T. Falola, E. Mbah, 2014-08-20 60 years after independence African nations still find it difficult to face a number of challenges from establishing meaningful democratic institutions to establish social structures centered on the advancement of gender equality This volume approaches these contemporary African challenges while combating a reflexive and facile Afro Pessimism *Colonial and Postcolonial Africa* Rosina Beckman, 2016-12-14 *Encyclopedia of the Developing World* Thomas M. Leonard, 2006 A comprehensive work on the historical and current status of developing countries **Encyclopedia of Anthropology** H. Rebel Financing and Terrorism in Civil Wars Margherita Belgioioso, 2023-08-17 This book investigates the ways in which the lethality of terrorist violence depends on how rebel organizations finance their rebellion The leaders of rebel groups make calculated decisions on the intensity of terrorism killings considering the benefits and costs of targeting non combatants against the financing needs of their organization The study specifically focuses on analyzing the effects of

different external financing options available to rebel groups and takes into account the role of local populations in making financing available. This comparative approach to external financing reveals new hypotheses that are empirically verified and differ from the expectations and findings of prior research. The book's findings are relevant to policy discussions on counterinsurgency strategies that prioritize protecting populations from human rights abuses. Existing doctrines tend to overlook the potential impact of targeted efforts to isolate insurgents from specific financing sources on the capacity to secure local populations. This book will be of interest to students of civil wars, terrorism studies, political violence, and security studies.
