Wetland Restoration Flood Pulsing And Disturbance Dynamics:

Wetland Restoration, Flood Pulsing, and Disturbance Dynamics Beth Middleton, 1999-01-04 While it is generally accepted that flood pulsing and disturbance dynamics are critical to wetland viability there is as yet no consensus among those responsible for wetland restoration about how best to plan for those phenomena or even whether it is really necessary to do so at all In this groundbreaking book Dr Beth Middleton draws upon the latest research from around the world to build a strong case for making flood pulsing and disturbance dynamics integral to the wetland restoration planning process While the initial chapters of the book are devoted to laying the conceptual foundations most of the coverage is concerned with demonstrating the practical implications for wetland restoration and management of the latest ecological theory and research It includes a fascinating case history section in which Dr Middleton explores the restoration models used in five major North American European Australian African and Asian wetland projects and analyzes their relative success from the perspective of flood pulsing and disturbance dynamics planning Wetland Restoration also features a wealth of practical information useful to all those involved in wetland restoration and management including A compendium of water level tolerances seed germination seedling recruitment adult survival rates and other key traits of wetland plant species A bibliography of 1 200 articles and monographs covering all aspects of wetland restoration A comprehensive directory of wetland restoration ftp sites worldwide An extensive glossary of essential terms Wetland Restoration Flood Pulsing and Disturbance Dynamics is a valuable working resource for wetland restoration consultants employees of government agencies and professional land managers as well as ecologists foresters and geologists involved with wetland restoration and management It is also an excellent text for advanced courses in wetland restoration

Flood Pulsing in Wetlands Beth A. Middleton, 2002-10-01 The latest cutting edge research on flood pulsing and wetland restoration in North America Presenting the latest research from leaders in the field of restoration ecology Flood Pulsing in Wetlands reflects the current movement to incorporate flood pulsing into wetland restoration efforts Emphasizing how integral flood pulsing is to successful wetland restoration the book s contributors provide descriptions of restoration projects across North America in which flood pulsing has been primarily used to restore beneficial hydrodynamic conditions to floodplain areas and improve or save vegetation wildlife and terrain Detailing the importance and applicability of recreating flood pulsed conditions on floodplains for successful restoration the first chapter introduces the concept of flood pulse and its unique role in wetland restoration The following chapters detail the strategies and results of individual projects and the impact flood pulsing had on the projects overall goals Case studies detail the history of each region such as the Southwest including the Sonoran Desert communities and the Middle Rio Grande the Missouri River in Montana the Illinois River Valley and the Southeast including Brushy Lake Arkansas Also documented is the most famous case of flood pulsing used in the restoration of an entire landscape the Kissimmee River project Approaches used to restore specific plant and animal populations the unique ecological concerns of

each region and the future outlook for each area are fully described Extensive bibliographies for each chapter make Flood Pulsing in Wetlands Restoring the Natural Hydrological Balance the essential reference for restoration ecologists consultants in wetland restoration government and restoration agency employees land managers ecologists foresters and geologists

Sustainability Science Michael P. Weinstein, R. Eugene Turner, 2012-06-05 The object of this book is to highlight how the nascent field of sustainability science is addressing a key challenges for scientists that is understanding the workings of complex systems especially when humans are involved A consistent thread in the sustainability science movement is the wide acknowledgement that greater degrees of integration across what are now segmented dimensions of extant Science and Technology systems will be a key factor in matching the most appropriate science and technology solutions to specific sustainability problems in specific places Ecological Restoration of Aquatic and Semi-Aquatic Ecosystems in the Netherlands (NW Europe) P.H. Nienhuis, Ramesh D. Gulati, 2013-03-14 This work presents the state of the art of aquatic and semi aquatic ecological restoration projects in The Netherlands Starting from the conceptual basis of restoration ecology the successes and failures of hundreds of restoration projects are described Numerous successful projects are mentioned In general ecological restoration endeavours greatly benefit from the progressive experience achieved in the course of the years Failures mainly occur through insufficient application of physical chemical or ecological principles Spontaneous colonization by plants and animals following habitat reconstruction is preferred However sometimes the re introduction of keystone species e g eelgrass salmon beaver is necessary in case the potential habitats are isolated or fragmented or if a seed bank is lacking thus not allowing viable populations to develop Re introducing traditional management techniques e g mowing without fertilization low intensity grazing is important to rehabilitate the semi natural and cultural landscapes that are so characteristic for The Netherlands

Wetland Techniques James T. Anderson, Craig A. Davis, 2013-10-10 Wetlands serve many important functions and provide numerous ecological services such as clean water wildlife habitat nutrient reduction and flood control Wetland science is a relatively young discipline but is a rapidly growing field due to an enhanced understanding of the importance of wetlands and the numerous laws and policies that have been developed to protect these areas This growth is demonstrated by the creation and growth of the Society of Wetland Scientists which was formed in 1980 and now has a membership of 3 500 people It is also illustrated by the existence of 2 journals Wetlands and Wetlands Ecology and Management devoted entirely to wetlands To date there has been no practical comprehensive techniques book centered on wetlands and written for wetland researchers students and managers This techniques book aims to fill that gap It is designed to provide an overview of the various methods that have been used or developed by researchers and practitioners to study monitor manage or create wetlands Including many methods usually found only in the peer reviewed or gray literature this 3 volume set fills a major niche for all professionals dealing with wetlands **Ecology of Freshwater and**

Estuarine Wetlands Darold P. Batzer, Rebecca R. Sharitz, 2006 Publisher description Wetlands Explained William M.

Lewis Jr.,2001-10-19 This book brings together in compact form a broad scientific and sociopolitical view of US wetlands This primer lays out the science and policy considerations to help in navigating this branch of science that is so central to conservation policy ecosystem science and wetland regulation It gives explanations of the attributes functions and values of our wetlands and shows how and why public attitudes toward wetlands have changed and the political legal and social conflicts that have developed from legislation intended to stem the rapid losses of wetlands The book describes the role of wetland science in facilitating the evolution of a rational and defensible system for regulating wetlands and will shed light on many of the problems and possibilities facing those who quest to protect and conserve our wetlands **Ecological**
