What Am I Made Of Aladdin Basics:

The Seven Basic Plots Christopher Booker, 2005-11-11 This remarkable and monumental book at last provides a comprehensive answer to the age old riddle of whether there are only a small number of basic stories in the world Using a wealth of examples from ancient myths and folk tales via the plays and novels of great literature to the popular movies and TV soap operas of today it shows that there are seven archetypal themes which recur throughout every kind of storytelling But this is only the prelude to an investigation into how and why we are programmed to imagine stories in these ways and how they relate to the inmost patterns of human psychology Drawing on a vast array of examples from Proust to detective stories from the Marquis de Sade to E T Christopher Booker then leads us through the extraordinary changes in the nature of storytelling over the past 200 years and why so many stories have lost the plot by losing touch with their underlying archetypal purpose Booker analyses why evolution has given us the need to tell stories and illustrates how storytelling has provided a uniquely revealing mirror to mankind's psychological development over the past 5000 years This seminal book opens up in an entirely new way our understanding of the real purpose storytelling plays in our lives and will be a talking point for years to come

Aladdin's Lamp John Freely, 2010-03-09 Aladdin's Lamp is the fascinating story of how ancient Greek philosophy and science began in the sixth century B C and during the next millennium spread across the Greco Roman world producing the remarkable discoveries and theories of Thales Pythagoras Hippocrates Plato Aristotle Euclid Archimedes Galen Ptolemy and many others John Freely explains how as the Dark Ages shrouded Europe scholars in medieval Baghdad translated the works of these Greek thinkers into Arabic spreading their ideas throughout the Islamic world from Central Asia to Spain with many Muslim scientists most notably Avicenna Alhazen and Averro's adding their own interpretations to the philosophy and science they had inherited Freely goes on to show how beginning in the twelfth century these texts by Islamic scholars were then translated from Arabic into Latin sparking the emergence of modern science at the dawn of the Renaissance which climaxed in the Scientific Revolution of the seventeenth century
