What Every Environmentalist Needs To Know About Capitalism:

What Every Environmentalist Needs to Know about Capitalism Fred Magdoff, John Bellamy Foster, 2011 Praise for Foster and Magdoff's *The Great Financial Crisis* In this timely and thorough analysis of the current financial crisis Foster and Magdoff explore its roots and the radical changes that might be undertaken in response This book makes a valuable contribution to the ongoing examination of our current debt crisis one that deserves our full attention Publishers Weekly There is a growing consensus that the planet is heading toward environmental catastrophe climate change ocean acidification ozone depletion global freshwater use loss of biodiversity and chemical pollution all threaten our future unless we act What is less clear is how humanity should respond The contemporary environmental movement is the site of many competing plans and prescriptions and composed of a diverse set of actors from militant activists to corporate chief executives This short readable book is a sharply argued manifesto for those environmentalists who reject schemes of green capitalism or piecemeal reform Environmental and economic scholars Magdoff and Foster contend that the struggle to reverse ecological degradation requires a firm grasp of economic reality Going further they argue that efforts to reform capitalism along environmental lines or rely solely on new technology to avert catastrophe misses the point The main cause of the looming environmental disaster is the driving logic of the system itself and those in power no matter how green are incapable of making the changes that are necessary **What Every Environmentalist Needs To Know about Capitalism** tackles the two largest issues of our time the ecological crisis and the faltering capitalist economy in a way that is thorough accessible and sure to provoke debate in the environmental movement *The Globalization and Environment Reader* Pete Newell, J. Timmons Roberts, 2016-06-13 *The Globalization and Environment Reader* features a collection of classic and cutting edge readings that explore whether and how globalization can be made compatible with sustainable development Offers a comprehensive collection of nearly 30 classic and cutting edge readings spanning a broad range of perspectives within this increasingly important field Addresses the question of whether economic globalization is the prime cause of the destruction of the global environment or if some forms of globalization could help to address global environmental problems Features carefully edited extracts selected both for their importance and their accessibility Covers a variety of topics such as the marketization of nature debates about managing and governing the relationship between globalization and the environment and discussions about whether or not globalization should be greened Systematically captures the breadth and diversity of the field without assuming prior knowledge Offers a timely and necessary insight into the future of our fragile planet in the 21st century *The Carbon Farming Solution* Eric Toensmeier, 2016 Agriculture is rightly blamed as a major culprit of our climate crisis But in this groundbreaking new book Eric Toensmeier argues that agriculture specifically the subset of practices known as carbon farming can and should be a linchpin of a global climate solutions platform **Corporate Social Responsibility and Environmental Affairs in the British Press** Martina Topić, 2021-10-27 An ecofeminist criticism of

neoliberalism this book uses economic growth CSR and the press coverage of environmental affairs as a case study The author argues that CSR is part of a wheel of neoliberalism that continually perpetuates inequality and the exploitation of women and Nature Using an ecofeminist sense making analysis of media coverage of food waste global warming plastic economic growth and CSR the author shows how the press discourse in writing is always similar and serves to preserve the status quo with CSR being just a smokescreen that saved capitalism and just one cog in the wheel of neoliberalism While available research offers perspectives from business and public relations studies looking at how CSR is implemented and how it contributes towards the reputation of businesses this book explores how the media enforce CSR discourse while at the same time arguing for environmental preservation The book presents a combination of quantitative and qualitative methods to explain how and why CSR is being pushed forward by the news media and how the media preserves the status quo by creating moral panic on environmental issues while at the same time pushing for CSR discourse and economic growth which only contributes towards environmental degradation The original research presented in the book looks at how the media write about economic growth plastics food waste CSR and global warming This interdisciplinary study draws on ecofeminist theory and media feminist theory to provide a novel analysis of CSR making the case that enforcing CSR as a way to do business damages the environment and that the media enforce a neoliberal discourse of promoting both economic growth and environmentalism which does not go together Examining the UK media as a case study a detailed methodological account is provided so that the study can be repeated and compared elsewhere The book is aimed at academics and researchers in business and media studies as well as those in women s studies It will also be relevant to scholars in business management and marketing

Into the Fire: The Intersection of Race and Communication Leland Harper, 2025-10-14

Through the presentation of various perspectives this collection of essays addresses some of the intersections of race and communication The topics addressed include but are not limited to how we communicate about race what our race communicates to others how we can do a better job of educating others on race related issues and how we can better define certain terms often utilized in conversations about race The perspectives shared in this volume contribute much needed depth to the discussion of the philosophical and practical considerations of race and communication broadly

Sustainable Economic Development Walter Leal Filho, Diana-Mihaela Pociovalisteanu, Abul Quasem Al-Amin, 2016-09-27 This book introduces the influence and impacts of green economy and green growth on sustainable economic development Combining empirical and theoretical information it provides detailed descriptions of state of the art approaches methods and initiatives from around the globe that illustrate green policies and demonstrate how green growth can be implemented on an international scale It also includes analyses of specific issues such as public policies and sustainable development plans that influence industry and increase trade in environmental goods and services the way to a greener economy green tourism green agriculture green learning and green equilibrium in modern society Matters such as green procurement

environmentally oriented implementation strategies and the importance of employee skills in the development of a sustainable future workforce are described as well as a selection of tools that can be used to foster sustainable growth green economies and green growth The book also offers a timely contribution to the dissemination of approaches and methods that improve the way we perceive and utilize natural resources and the technologies designed to protect them Puts forward new ideas for creating a more sustainable future *The Cambridge Handbook of Material Culture Studies* Lu Ann De Cunzo, Catharine Dann Roeber, 2022-06-09 Material culture studies is an interdisciplinary field that examines the relationships between people and their things the production history preservation and interpretation of objects It draws on theory and practice from disciplines in the social sciences and humanities such as anthropology archaeology history and museum studies Written by leading international scholars this Handbook provides a comprehensive view of developments methodologies and theories It is divided into five broad themes embracing both classic and emerging areas of research in the field Chapters outline transformative moments in material culture scholarship and present research from around the world focusing on multiple material and digital media that show the scope and breadth of this exciting field Written in an easy to read style it is essential reading for students researchers and professionals with an interest in material culture

Democratic Eco-Socialism as a Real Utopia Hans A. Baer, 2017-10-01 As global economic and population growth continues to skyrocket increasingly strained resources have made one thing clear the desperate need for an alternative to capitalism In *Democratic Eco Socialism as a Real Utopia* Hans Baer outlines the urgent need to reevaluate historical definitions of socialism commit to social equality and justice and prioritize environmental sustainability Democratic eco socialism as he terms it is a system capable of mobilizing people around the world albeit in different ways to prevent on going human socio economic and environmental degradation and anthropogenic climate change *The Misery of International Law* John Linarelli, Margot E Salomon, Muthucumaraswamy Sornarajah, 2018-03-23 Poverty inequality and dispossession accompany economic globalization Bringing together three international law scholars this book addresses how international law and its regimes of trade investment finance as well as human rights are implicated in the construction of misery and how international law is producing reproducing and embedding injustice and narrowing the alternatives that might really serve humanity Adopting a pluralist approach the authors confront the unconscionable dimensions of the global economic order the false premises upon which they are built and the role of international law in constituting and sustaining them Combining insights from radical critiques political philosophy history and critical development studies the book explores the pathologies at work in international economic law today International law must abide by the requirements of justice if it is to make a call for compliance with it but this work claims it drastically fails do so In a legal order structured around neoliberal ideologies rather than principles of justice every state can and does grab what it can in the economic sphere on the basis of power and interest legally so and under colour of law This book examines how international law on trade and foreign investment and the

law and norms on global finance has been shaped to benefit the rich and powerful at the expense of others. It studies how a set of principles in the form of a New International Economic Order (NIEO) that could have laid the groundwork for a more inclusive international law without even disrupting its market orientation were nonetheless undermined. As for international human rights law, it is under the terms of global capitalism that human rights operate. Before we can understand how human rights can create more just societies, we must first expose the ways in which they reflect capitalist society and how they assist in reproducing the underlying terms of immiseration that will continue to create the need for human rights protection. This book challenges conventional justifications of economic globalization and eschews false choices. It is not about whether one is for or against international trade, foreign investment or global finance. The issue is to resolve how, if we are to engage in trade, investment and finance, we do so in a manner that is accountable to persons whose lives are affected by international law. The deployment of human rights for their part must be considered against the ubiquity of neoliberal globalization under law and not merely as a discrete benevolent response to it. Work in a Warming World Carla Lipsig-Mummé, Stephen

McBride, 2015-04-15 Global warming is perhaps the greatest challenge facing the twenty-first century. Environmental policies on the one hand and economic and labour market policies on the other often exist in separate silos, creating a dilemma that Work in a Warming World confronts. The world of work, goods, services and resources produces most of the greenhouse gases created by human activity. In engaging essays, contributors demonstrate how the world of work and the labour movement need to become involved in the struggle to slow global warming and the ways in which environmental and economic policies need to be linked dynamically in order to effect positive change. Addressing the dichotomy of competing public policies in a Canadian context, Work in a Warming World presents ways of creating an effective response to global warming and key building blocks toward a national climate strategy.
