What Do Patients Want Psychoanalytic Perspectives From The Couch:

What do Patients Want? Christine A. S. Hill, 2018-04-17 This book allows patients to speak for themselves about their psychoanalytic experiences It challenges the preconceived perception that the analytic practitioner knows best when it comes to treatment and responds to the growing sophistication of those seeking the treatment *Psychoanalysis and the Birth of the Self* Mark Leffert, 2018-05-23 This book draws psychoanalysis out of unsubstantiated hermeneutic speculation and into the science and philosophy of the Self Mark Leffert offers a survey of where we as human beings come from going back into prehistory and our development as individuals Psychoanalysis and the Birth of the Self is written to provide psychoanalysts with interdisciplinary information drawn from fields that they may have had little access to Leffert undertakes a novel integration of topics not frequently discussed together resulting in a radical critique of the theorization of psychoanalysis The book begins by setting the story with a short analysis of the history of psychoanalysis A new science has been founded on the recognition of the impossibility of separating evolution from development it is called Evo Devo Applied to the human condition it integrates development with palaeoanthropology and forms the basis for exploring such topics as the neurophilosophy of consciousness the birth of the Self and its neurodevelopment It includes epigenetics in the conversation Leffert then takes a radical turn integrating the biological Evo Devo of the Self with the study of its Existence that is Existentialism and Phenomenology The integration of these two threads Evo Devo and Existentialism offers a powerful and unique tool for exploring the Self The author offers an innovative way of understanding an individual that pulls together their biology their development and the way they choose to exist in the world It steps outside of the traditional ways of clinically understanding an individual not by abandoning them but rather by powerfully supplementing them Psychoanalysis and the Birth of the Self offers a novel interdisciplinary braiding of disparate strands of knowledge that will be of interest to psychoanalysts as well as those in the disciplines of neuroscience existentialism and phenomenology and anthropology

From Id to Intersubjectivity Dianna T. Kenny, 2018-05-01 Psychoanalysis has moved a long way from the techniques of classical psychoanalysis but these changes have not been understood or disseminated to the wider community Even university scholars and students of psychology have an archetypal view of the original form of psychoanalysis and do not appreciate that major changes have occurred This book commences with a detailed outline of the origins of psychoanalysis and an explanation of key terms which are often misinterpreted The second chapter examines the changes that have occurred in theorising and practice over the past 120 years and explores key developments The following chapters contain an interview with a practitioner working in one of each of the four major branches of modern psychoanalysis object relations attachment informed psychotherapy intensive short term dynamic psychotherapy and relational and intersubjective theory There follows textual content conceptual and thematic analyses of the transcripts of interviews and commentaries on a therapy excerpt exploring commonalities and differences among these theoretical approaches *Hippocrates Cried* Michael

A Taylor, 2013-04-01 Hippocrates Cried offers an eye witness account of the decline of American psychiatry by an experienced psychiatrist and researcher Arguing that patients with mental disorders are no longer receiving the care they need Dr Taylor suggest that modern psychiatrists in the U S rely too heavily on the DSM a diagnostic tool that fails to properly diagnose many cases of mental disorder and often neglects important conditions or symptoms American psychiatry has come to reflect simplistic algorithms forged by pharmaceutical companies rather than true scientific methodology Few professionals have a working knowledge of psychopathology outside of what is outlined in the DSM and more mental health patients are being treated by primary care physicians than ever before

Clinical Perspectives on the Supervision of Psychoanalysis and Psychotherapy Leopold Caligor, Phillip M. Bromberg, James D. Meltzer, 1984-02-29 In order to complete training successfully every psychoanalyst has to be a supervisee This experience leads each analyst to want to become a supervisor Until recently very little has been discussed about wh at supervision is how it is done and how it is related to the various theories of psychoanalysis that are held as articles of faith The 1980 1981 program of the William Alanson White Psychoanaly tic Society was devoted to supervision with representatives of various schools demonstrating their ways of doing consultations with ana lysts about patients This book is an extension of that endeavor In it supervisors of various persuasions discuss this topic The editors Leopold Caligor Philip M Bromberg and James D Meltzer are to be congratulated for the high level of discourse repre sented by the various chapters They are to be commended as well about the eloquent statement this book makes namely there are many an swers and approaches and no final answer to the questions raised by the volume

Interview and Indicators in Psychoanalysis and Psychotherapy Antonio Perez-Sanchez, 2018-05-01 The book deals with initial interviews in psychoanalysis and psychotherapy suggesting the idea of special indicators These indicators relate to three main areas Firstly psychoanalytical understanding of initial interviews to evaluate the patient's suitability for a psychoanalytically based treatment discussing the dynamics aims and technique of the interview Three areas to be explored in the interview are considered psychopathological data biographical data and data arising from the interaction of the patient with the therapist in the interview itself Secondly part of the book is devoted to the definition and description of what the author calls indicators for the therapist to build a personality profile showing suitability for psychoanalytic treatment The main theoretical bases of the book are Freud Klein and Bion A third part deals with the controversial issue of the differentiation between psychoanalysis and psychoanalytic psychotherapy The specificity of psychoanalysis is defined in comparison with psychotherapy A specific psychoanalytic method and setting may be created as well as a specific psychotherapeutic method and setting *Advances in Psychodynamic Psychiatry* César A. Alfonso, Richard C. Friedman, Jennifer I. Downey, 2018-11-30 Bringing together important articles from Psychodynamic Psychiatry this volume shows how contemporary practitioners are using a multidimensional biopsychosocial approach to increase the robustness of clinical research and the effectiveness of patient care Chapters review cutting edge approaches to formulating anxiety and mood disorders eating disorders traumatic grief substance use and addictive behaviors obsessive compulsive disorder personality disorders schizophrenia somatic symptom disorders and trauma and stressor related disorders Treatment of specific populations is addressed including infants and parents children spouses of the chronically ill survivors of intimate partner violence criminal offenders and the elderly Featuring rich case illustrations the book integrates psychoanalytic concepts with advances in knowledge about neuroscience gene environment interactions and the physiological impact of adversity *Knowing What Psychoanalysts Do and Doing What Psychoanalysts Know* David Tuckett, Elizabeth Allison, Olivier Bonard, Georg J. Bruns, Anna L. Christopoulos, Michael Diercks, Eike Hinze, Marinella Linardos, Michael Šebek, 2024-01-22 Founded on the in depth discussion of sixteen clinical cases of psychoanalysis this book answers the question of what psychoanalysts do when they are practicing psychoanalysis The authors have collaborated with over a thousand colleagues worldwide to collect a unique dataset of everyday clinical sessions using a new workshop discussion method designed to reveal differences Faced with diversity and wanting to surface and understand it they had to evolve a new theoretical framework This framework covers different approaches to the analytic situation using the metaphors of cinema dramatic monologue theater and immersive theater different sources of data to infer unconscious content differences in the troubles patients unconsciously experience and how to approach them and differences in when about what and how a psychoanalyst should talk Taking the form of eleven very practical questions for psychoanalysts to ask of each session they conduct the framework helps experienced psychoanalysts and students alike determine their intention and independently assess their

progress A final chapter applies the new framework and practical questions to contemporary technical controversies with some surprising results
