What Does China Think:

What Does China Think? Mark Leonard, 2008-04-29 We know everything and nothing about China We know that China is changing so fast that the maps in Shanghai need to be redrawn every two weeks We know that China has brought 300 million people from agricultural backwardness into modernity in just thirty years and that its impact on the global economy is growing at unprecedented speed We have an image of China as a dictatorship a nationalist empire that threatens its neighbors and global peace But how many people know about the debates raging within China What do we really know about the kind of society China wants to become What ideas are motivating its citizens We can name America's neo-cons and the religious right but cannot name Chinese writers thinkers or journalists what is the future they dream of for their country or for the world Because China's rise like the fall of Rome or the British Raj will echo down generations to come these are the questions we increasingly need to ask Mark Leonard asks us to forget everything we thought we knew about China and start again He introduces us to the thinkers who are shaping China's wide open future and opens up a hidden world of intellectual debate that is driving a new Chinese revolution and changing the face of the world The Rise of Think Tanks in China

Xufeng Zhu, 2013 Despite continuing criticism of the Chinese authoritarian political system the range of participants in the decision making process has widened with different social actors now playing an increasingly important role in the Chinese policymaking process Accordingly the role of think tanks in the policymaking process has generated great interest within and outside China This book explores the behaviour and influence of China's think tanks and explains the reasons and social consequences of the rise of think tanks in China The book raises several questions on the topic How did think tanks emerge in China What are the essential factors that determine think tanks in terms of building their governmental and personal networks How do think tanks work and build their influence in the Chinese policy process What happens to Chinese society when think tanks become important policy participants in the policy process The book goes on to discuss new perspectives on policy processes and elite politics in China and empirically with comparative case study and data from nationwide questionnaire surveys provides a comprehensive picture of think tanks in the current political system of the country **The**

China's Rise and Rethinking International Relations Theory Chengxin Pan, Emilian Kavalski, 2022-02-16 Bringing together leading scholars from Asia and the West, this book investigates how the dynamics of China's rise in world politics contributes to theory building in International Relations (IR). The book demonstrates how the complex and transformative nature of China's advancement is also a point of departure for theoretical innovation and reflection in IR more broadly. In doing so, the volume builds a strong case for a genuinely global and post-Western IR. It contends that non-Western countries should not only be considered potential sources of knowledge production but also original and legitimate focuses of IR theorizing in their own right.

The China Dream and the China Path Tianyong Zhou, 2014 Since its reform and opening up, China has experienced unprecedented social and economic development. It is important to understand the biggest and fastest growing economy's policy and strategy. As a key director in Party School of the Central Committee of the Communist Party of China, the author proposes a development path and reform strategies for China in the next three decades. This book suggests reform strategies not only for the economic structure but also for the political system in China. The author makes a sound analysis and exposition of the Chinese dream, which reflects the vision of a better life in the future and the main indicators of social change. China United States. Congress. House. Committee on Armed Services, 2008 **'The Chinese Century'?** D. Scott, 2008-10-23 This book looks ahead to consider the most likely results of the encounter between China and the international system. Environmental, cultural and perceptual matters are considered as well as more traditional economic and military issues. Underpinning the book is the question: will the 21st century be China's Century for China and the world?

Cultivating Global Citizens Susan Greenhalgh, 2010-10-15 Current accounts of China's global rise emphasize economics and politics, largely neglecting the cultivation of China's people. Susan Greenhalgh, one of the foremost authorities on China's one-child policy, places the governance of population squarely at the heart of China's ascent. Focusing on the decade since 2000 and especially 2004-09, she argues that the vital politics of population has been central to the globalizing agenda of the reform state. By helping transform China's rural masses into modern workers and citizens by working to strengthen, technoscientize and legitimize the PRC regime and by boosting China's economic development and comprehensive national power, the governance of the population has been critically important to the rise of global China. After decades of viewing population as a hindrance to modernization, China's leaders are now equating it with human capital and redefining it as a positive factor.

in the nation's transition to a knowledge based economy In encouraging human development the regime is trying to induce people to become self governing self enterprising persons who will advance their own health education and welfare for the benefit of the nation From an object of coercive restriction by the state population is being refigured as a field of self cultivation by China's people themselves
