The Waveney Valley History Landscape And People:

Waveney Valley Christopher Reeve, 2015-04 A tour along this beautiful river valley providing a comprehensive profile of this charming part of East Anglia **Secret Bungay** Christopher Reeve, 2018-10-15 Explore Bungay's secret hidden history through a fascinating selection of stories facts and photographs *Waveney Valley Studies: Gleanings from Local History* Eric Pursehouse, 1966 **Down By the River** Benjamin Gearey, Andy Howard, Henry Chapman, 2016-05-31 East Anglia has long been known for its internationally significant cultural and environmental Palaeolithic archaeology often overshadowing the potential of its Holocene resource This volume details the results of 8 years of palaeoenvironmental archaeological and geoarchaeological investigations focused on the post glacial history and evolution of the Suffolk river valleys funded by Historic England and a number of commercial developers The volume illustrates the largely untapped research potential of the region and provides information concerning the timing pattern and process of alluvial development landscape change and human activity The highlight of these investigations was the excavation and associated analyses of three well preserved later prehistoric timber alignments and their environmental records discovered during flood alleviation works on the floodplain of the lower Waveney Valley As well as documenting these internationally significant remains the research described includes innovative approaches to wetland archaeological and palaeoenvironmental study highlighting important methodological considerations with respect to radiocarbon dating and chronology applying novel geophysical approaches to site prospection and recording wooden artefacts using 3 D laser scanning The volume also discusses the results of groundwater monitoring of sediments containing the late prehistoric timber alignment at Beccles and considers the longer term preservation potential of these fragile remains which as with other wetland archaeological sites are at ever increasing risk from development pressures as well as the longer term impacts of climate and environmental change **A Vanishing Landscape:**

Archaeological Investigations at Blakeney Eye, Norfolk Naomi Field, 2021-09-09 This volume presents a report on the archaeological excavation of a small building on the Norfolk coast locally known as Blakeney Chapel in advance of expected coastal erosion at Blakeney Eye The investigations produced evidence for multi period occupation with abandonments driven by the ever changing climate *Parson and People in a Suffolk Village* Wortham Research Group, 2007 **The Ancient Ways of Wessex** Alexander Langlands, 2019-11-30 The Ancient Ways of Wessex tells the story of Wessex's roads in the early medieval period at the point at which they first emerge in the historical record This is the age of the Anglo Saxons and an era that witnessed the rise of a kingdom that was taken to the very brink of defeat by the Viking invasions of the ninth century It is a period that goes on to become one within which we can trace the beginnings of the political entity we have come to know today as England In a series of ten detailed case studies the reader is invited to consider historical and archaeological evidence alongside topographic information and ancient place names in the reconstruction of the networks of routeways and communications that served the people and places of the Anglo Saxon kingdom of Wessex Whether you were a peasant

pilgrim drover trader warrior bishop king or queen travel would have been fundamental to life in the early middle ages and this book explores the physical means by which the landscape was constituted to facilitate and improve the movement of people goods and ideas from the seventh through to the eleventh centuries What emerges is a dynamic web of interconnecting routeways serving multiple functions and one perhaps even busier than that in our own working countryside A narrative of transition one of both of continuity and change provides a fresh and alternative window into the everyday workings of an early medieval landscape through the pathways trodden over a millennium ago *Nature Cure* Richard Mabey,2007 Richard Mabey is the author of numerous books on Britain s ecology including the best selling *Flora Britannica* and the Whitbread Prize winning *Gilbert White Virginia* Medieval Suffolk Mark Bailey,2007 In this book Mark Bailey provides a comprehensive survey of the economy and society of late medieval Suffolk **Landscape History** ,1998

Seabed Prehistory Louise Tizzard,Andrew Bicket,Dimitri De Loecker,Jonathan Benjamin,2015-05-07 Archaeological investigation of Early Middle Palaeolithic flint tools including hand axes and faunal remains in the North Sea This volume also examines submerged and buried landscapes The methods used to recover artifacts and other remains and to explore these buried landscapes are also described The results are placed into the context of the British and European Early Middle Palaeolithic *Proceedings of the Suffolk Institute of Archaeology and Natural History* Suffolk Institute of Archaeology and Natural History,1933 Excavations at Wixoe Roman Small Town, Suffolk Rob Atkins,Rachel Clarke,2018 The first major excavation within a Roman small town in Suffolk for over 20 years showed that Wixoe was a post Boudican planned town established at the same time as others in the region Analysis of the significant pottery assemblage identified supply patterns similar to other civilian Roman borderland settlements especially Great Chesterford **The History of the Study of Landforms: Geomorphology before Davis** Richard J. Chorley,1964 In the Nature of Landscape David Matless,2014-08-11 In the Nature of Landscape presents regional cultural landscape as a new direction for research in cultural geography Represents the first cultural geographic study of the Norfolk Broads region of eastern England Addresses regional cultural landscape through consideration of narratives of landscape origin debates over human conduct the animal and plant landscapes of the region and visions of the ends of landscape through pollution and flood Draws upon in depth original research spanning almost two decades of archival work interviews and field study Covers a great diversity of topics from popular culture to scientific research folk song to holiday diaries planning survey to pioneering photography and ornithology to children s literature Features a variety of illustrative material including original photographs paintings photography advertising imagery scientific diagrams maps and souvenirs The Norfolk Broads Tom Williamson,1997 Describing how the diverse environments of Broadland were first shaped in the Middle Ages this book explains how they were constantly modified in succeeding centuries by changing forms of economy and by changing patterns of social organisation **Iron Age Fortification Beside the River Lark** Tim Havard,Timothy Havard,Mary Alexander

(Post-excavation manager), Ray Holt, 2019 Excavations by Cotswold Archaeology at Mildenhall produced evidence for human activity from the Late Bronze Age to the medieval period A Late Bronze Age waterhole backfilled with domestic refuse was excavated on the higher ground above the floodplain of the River Lark The Middle Iron Age was a period of intense activity on the site when a pair of massive ditches defined the eastern part of an enclosure possibly built to dominate the crossing point of the River Lark A third ditch of comparable size may date to the Middle or Late Iron Age Numerous pits were found inside the enclosure and a pair of very large post settings were located between the paired ditches A possible focus for settlement beyond the excavated area was suggested by the greater density of pits towards the west The ditches fell out of use before the Roman period when a farmstead occupied the higher ground In this period the flood plain was utilised with a series of field ditches although the area was prone to flooding in the later Roman period Throughout the Saxon period the higher ground was farmed and use of the flood plain was limited by the wet environment The evidence suggests there was a process of deliberate land reclamation on the floodplain during the medieval period after which the area was divided into fields On the higher ground a large ditch running north to south may have marked the medieval town boundary but this association is uncertain Excavated evidence from this period represented activities undertaken on the periphery of settlement including crop processing animal husbandry and iron working A well preserved kiln base may have been used for the production of lime using chalk quarried from the edge of the higher ground There was a rapid decline in use of the area from the 14th century onwards and it remained farmland until recent times There was good preservation of environmental evidence from all periods and the sizeable assemblages of animal bone and crop waste allowed comparisons to be made in farming practices over time The assemblage of decorated Middle Iron Age pottery from the site is the largest found in the region to date

Sisters in the Wilderness Charlotte Gray, 2001 Susanna Moodie and Catharine Parr Traill were writers and artists who left England for Canada during the great wave of emigration that saw over twelve million Britons abandon their homeland for the Colonies in the 19th century Against the odds the sisters carved successful careers for themselves as writers and their despatches about the harsh realities of pioneer life were avidly read in England In this book award winning author Charlotte Gray vividly brings her subjects to life and draws a brilliantly clear picture of life in the backwoods of Canada Using the women's correspondence and personal papers as well as their published works this meticulously researched beautifully told biography is a compelling read and valuable addition to literary history

East Anglia Peter Sager, 1996

The Impact of the Railway on Society in Britain Jack Simmons, 2003 The essays that comprise this festschrift reflect the belief held by Jack Simmons that Britain's railways affected all aspects of civilised life from engineering and travel to the visual impact the railways had on the whole environment
