Alan Wallace,2011-12-06 A scholar of both spirituality and science proposes a radical approach to studying the mind with the goal of restoring human nature and transcending it Renowned Buddhist philosopher B Alan Wallace reasserts the power of shamatha and vipashyana traditional Buddhist meditations to clarify the mind s role in the natural world Raising profound questions about human nature free will and experience versus dogma Wallace challenges the claim that consciousness is nothing more than an emergent property of the brain with little relation to universal events Rather he maintains that the observer is essential to measuring quantum systems and that mental phenomena however conceived influence brain function and behavior Wallace embarks on a two part mission to restore human nature and to transcend it He begins by explaining the value of skepticism in Buddhism and science and the difficulty of merging their experiential methods of inquiry Yet Wallace also proves that Buddhist views on human nature and the possibility of free will liberate us from the metaphysical constraints of scientific materialism He then explores the radical empiricism inspired by William James and applies it to Indian Buddhist philosophy s four schools and the Great Perfection school of Tibetan Buddhism Since Buddhism begins with the assertion that ignorance lies at the root of all suffering and that the path to freedom is reached through knowledge Buddhist practice can be viewed as a progression from agnosticism not knowing to gnosticism knowing acquired through the maintenance of exceptional mental health mindfulness and introspection Wallace discusses these topics in detail identifying similarities and differences between scientific and Buddhist understanding and he concludes with an explanation of shamatha and vipashyana and their potential for realizing the full nature origins and potential of consciousness His range and depth of knowledge is astounding and his linking of this knowledge to the practices and views of science is unique Arthur Zajonc author of *Catching the Light* **The Sacred Books of the East: The Dhammapada, translated by F.
