Toxic Waste and Environmental Policy in the 21st Century United States Dianne Rahm, 2017-08-24 A major problem confronting the United States in the 21st century is the 20th century s legacy of toxic waste The weapons that fought the Cold War the facilities that manufactured those weapons and the factories that fueled a prosperous economy left

behind a trail of pollution Seven previously unpublished essays examine the problem of toxic waste in the United States what is being done about it and what should be done about it W Henry Lambright and Agnes Gereben Schaefer Dianne Rahm Sevim Ahmedov Charles Davis Robert A Simons and Kimberly Winson Santa Falcone and Toddi A Steelman and JoAnn Carmin write about such issues as community based environmental management regional EPA offices and the regulation of hazardous wastes brownfields nuclear and chemical weapons destruction environmental contamination and the nuclear weapons complex the privatization of nuclear waste clean up and WIPP Yucca and hazardous waste transport The future of humanity demands careful thought about these matters Instructors considering this book for use in a course may request an examination copy here *Riparian Areas of the Southwestern United States* Peter F. Ffolliott, Leonard F.

DeBano, 2003-07-28 The demand for water resulting from massive population and economic growth in the southwestern U S overwhelmed traditional uses of riparian areas As a consequence many of these uniquely structured ecosystems have been altered or destroyed Within recent years people have become increasingly aware of the many uses and benefits of riparian zones a **Collaborative Environmental Management** Tomas M. Koontz, Toddi A. Steelman, JoAnn Carmin, Katrina Smith Korfmacher, Cassandra Moseley, Craig W. Thomas, 2010-09-30 Collaboration has become a popular approach to environmental policy planning and management At the urging of citizens nongovernmental organizations and industry government officials at all levels have experimented with collaboration Yet questions remain about the roles that governments play in collaboration whether they are constructive and support collaboration or introduce barriers This thoughtful book analyzes a series of cases to understand how collaborative processes work and whether government can be an equal partner even as government agencies often formally control decision making and are held accountable for the outcomes Looking at examples where government has led encouraged or followed in collaboration the authors assess how governmental actors and institutions affected the way issues were defined the resources available for collaboration and the organizational processes and structures that were established Cases include collaborative efforts to manage watersheds rivers estuaries farmland endangered species habitats and forests The authors develop a new theoretical framework and demonstrate that government left a heavy imprint in each of the efforts The work concludes by discussing the choices and challenges faced by governmental institutions and actors as they try to realize the potential of collaborative environmental management
