world independently of their makers patrons owners or occupants And often they act badly Treating buildings as bodies Annabel Jane Wharton writes biographies of symptomatic structures in order to diagnose their pathologies The violence of some sites is rooted in historical trauma the unhealthy spatial behaviors of other spaces stem from political and economic ruthlessness The places examined range from the Cloisters Museum in New York City and the Palestine Archaeological Museum renamed the Rockefeller Museum in Jerusalem to the grand Hostal de los Reyes Catolicos in Santiago de Compostela Spain and Las Vegas casino resorts Recognizing that a study of pathological spaces would not be complete without an investigation of digital structures Wharton integrates into her argument an original consideration of the powerful architectures of video games and immersive worlds Her work mounts a persuasive critique of popular phenomenological treatments of architecture Architectural Agents advances an alternative theorization of buildings agency one rooted in buildings essential materiality and historical formation as the basis for her significant intervention in current debates over the boundaries separating humans animals and machines

New Trinitarian Ontologies, Volume I John Milbank, Ryan Haecker, JD Lyonhart, 2025-11-11 The Holy Trinity is the oldest idea of Christian hope The study of being or ontology was once regarded as a seminal preparation for the study of God as the creative cause of all being in theology Yet due to a series of theological mistakes metaphysics came to be separated from the Trinity before God came to be conceived as the supreme being of all beings in general metaphysics natural theology and modern ontology The analytic and continental philosophical traditions have since tended to treat the Trinity as at best superfluous and at worst redundant to modern formal ontologies Yet the postmodern collapse of all such formal ontologies has prepared the path for a renewed study of metaphysics or ontology that shares in participation with the Trinity New Trinitarian Ontologies names a creative response to this pivotal collapse of modern formal ontologies If ontology cannot contain but rather more radically points to God and if all nature thus tends towards the supernatural the angelic and the metaphysical then we should renew the study of the metaphysics or ontology of the Trinity This volume represents a collection of responses to this challenge of rendering ontology in a Trinitarian style
