Your Invisible Power Genevieve Behrend,2016-07-21 The magic of principle over precedent the power of creative visualization These pages have been written with purpose and hope that their suggestions may furnish you a key to open up the way to the attainment of your desires and to explain that Fear should be entirely banished from your effort to obtain possession of the things you desire This presupposes of course that your desire for possession is based upon your aspiration for greater liberty For example you feel that the possession of more money lands or friends will make you happier and your desire for possession of these things arises from a conviction that their possession will bring you liberty and happiness In your effort to possess you will discover that the thing you most and ultimately need is to Be always not spasmodically your best self that self which understands that the mistakes of those you love are simply misunderstandings Your feeling that greater possessions no matter of what kind they may be will of themselves bring you contentment or happiness is a misunderstanding No person place or thing can give you happiness They may give you cause for happiness and a feeling of contentment but the joy of Living comes from within Therefore it is here recommended rather than otherwise that you should make the effort to obtain the things which you feel will bring you joy provided as previously stated that your desires are in accord with the joy of Living It is also desired in this volume to suggest the possibilities in store for all who make persistent effort to understand the Law of Visualization and make practical application of this knowledge on whatever plane he or she may be The word effort as here employed is not intended to convey the idea of strain All study and meditation should be without strain or tension It has been my endeavor to show that by starting at the beginning of the creative action or the mental picture certain corresponding results are sure to follow While the laws of the Universe cannot be altered they can be made to work under specific conditions thereby producing results for individual advancement which cannot be obtained under the spontaneous working of the law provided by Nature
