What Is Urban History What Is History Series:

What is Urban History? Shane Ewen, 2016-09-12 Urban history is a well established and flourishing field of historical research. Written by a leading scholar, this short introduction demonstrates how urban history draws upon a wide variety of methodologies and sources and has been integral to the rise of interdisciplinary and comparative approaches to history since the second half of the twentieth century. Shane Ewen offers an accessible and clearly written guide to the study of urban history for the student, teacher, researcher or general reader who is new to the field and interested in learning about past approaches as well as key themes, concepts and trajectories for future research. He takes a global and comparative viewpoint, combining a discussion of classic texts with the latest literature to illustrate the current debates and controversies across the urban world. The historiography of the field is mapped out by theme, including new topics of interest with a particular focus on space and social identity, power and governance, the built environment, culture and modernity, and the growth and spread of transnational networking. By discussing a number of historic and fast growing cities across the world, *What is Urban History* demonstrates the importance of the history of urban life to our understanding of the world both in the present and the future. As a result, urban history remains pivotal for explaining the continued growth of towns and cities in a global context and is particularly useful for identifying the various problems and solutions faced by fast growing megacities in the developing world.

Urban Space and Urban History in the Roman World Miko Flohr, 2020-05-25 This volume investigates how urban growth and prosperity transformed the cities of the Roman Mediterranean in the last centuries BCE and the first centuries CE, integrating debates about Roman urban space with discourse on Roman urban history. The contributions explore how these cities developed landscapes full of civic memory and ritual, saw commercial priorities transforming the urban environment and began to expand significantly beyond their wall circuits. These interrelated developments not only changed how cities looked and could be experienced but they also affected the functioning of the urban community and together contributed to keeping increasingly complex urban communities socially cohesive. By focusing on the transformation of urban landscapes in the Late Republican and Imperial periods, the volume adds a new, explicitly historical angle to current debates about urban space in Roman studies. Confronting archaeological and historical approaches, the volume presents developments in Italy, Africa, Greece and Asia Minor, thus significantly broadening the geographical scope of the discussion and offering novel theoretical perspectives alongside well documented thematic case studies. *Urban Space and Urban History in the Roman World* will be of interest to anyone working on Roman urbanism or Roman history in the Late Republic and early Empire.

Hein-Kircher, Oliver Hochadel, 2020-10-22 Around 1900 cities in Southern and Eastern Europe were persistently labeled backward and delayed. Allegedly they had no alternative but to follow the role model of the metropolises of London, Paris or Vienna. This edited volume fundamentally questions this assumption. It shows that cities as diverse as Barcelona, Berdyansk, Budapest, Lviv, Milan, Moscow, Prague, Warsaw and Zagreb pursued their own agendas of modernization. In order to solve their pressing problems with respect to urban planning and public health, they searched for best practices abroad. The solutions they gleaned from other cities were eclectic to fit the specific needs of a given urban space and were thus often innovative. This applied urban knowledge was generated through interurban networks and multi-directional exchanges. Yet in the period around 1900, this transnational municipalism often clashed with the forging of urban and national identities, highlighting the tensions between the universal and the local. This interurban perspective helps to overcome nationalist perspectives in historiography as well as outdated notions of center and periphery. This volume will appeal to scholars from a large number of disciplines including urban historians, historians of Eastern and Southern Europe, historians of science and medicine, and scholars interested in transnational connections. *Introduction to the Urban History of China* Chonglan Fu, Wenming Cao, 2019-07-25 This book explores China's urban development, examining the history and culture of Chinese cities and providing a cultural background to the rapid urban development of contemporary China. It offers a new perspective on Chinese urban history, showcasing the traditional culture which underpins the emergence of the modern city and highlighting how traditional Chinese philosophical thought is reflected in the culture of urban planning and architecture in China, notably examining such issues as the integration of man and nature, yin and yang, bagua and the Wu Xing. *Urban Life in Nordic Countries* Heiko Droste, 2023-12-18 Based on empirical studies, this book investigates the particular urban history of the North from the 17th century until today in a comparative Northern perspective. *Urban Life in Nordic Countries* is the result of a conference on Urbanity in the Periphery held in Stockholm on the occasion of the 100th anniversary of the Institute of Urban History at Stockholm University, aimed at establishing the field of the urban history of the North and creating a network of urban historians of the North. With a broad range of contributions from Sweden, Finland, Denmark, Norway and Estonia, the volume seeks to further discourse on the region within national and transnational lenses and to highlight possibilities for new cooperation among researchers. Urban history is a transdisciplinary subject engaging not only historians but also ethnologists, sociologists, urban planners and cultural geographers, and this book targets all scholars whose work requires a historical understanding of the Northern town. European urban historians outside the region will also find this text valuable as one of the few studies to consider the urban history of the continent from a North-centered viewpoint.
