Urban Regeneration And Social Sustainability Best Practice From European Cities:

Urban Regeneration and Social Sustainability Andrea Colantonio, Tim Dixon, 2011-02-02 Urban regeneration is a key focus for public policy throughout Europe This book examines social sustainability and analyses its meaning The authors offer a comprehensive European perspective to identify best practices in sustainable urban regeneration in five major cities in Spain Italy Netherlands Germany and the UK This authoritative overview of the scholarly literature makes the book essential reading for researchers and post graduate students in sustainable development real estate geography urban studies and urban planning as well as consultants and policy advisors in urban regeneration and the built environment *Urban Change and Regional Development at the Margins of Europe* Ignazio Vinci, Paula Russell, 2022-07-28 Since the beginning of the 1990s regions and urban areas have become a primary target of EU Cohesion Policy For a number of European cities especially in the less developed regions this has resulted in a unique opportunity for the implementation of extensive development projects as well as delivering innovations in urban policy and local governance Through the detailed observation of planning processes which took place in four European cities Porto PT Malaga ES Palermo IT and Thessaloniki EL this book explores the different ways that EU intervention can affect the policy process locally from the regeneration of decayed neighbourhoods and the creation of key services for improving the quality of life to the establishment of new governance relations and increasing the institutional capacity in local government The book also provides a critical reflection on the impact of EU urban policy in reducing regional disparities and the extent to which Cohesion Policy has helped cities to open new pathways for local development With a special focus on the EU s marginal regions this book is a guide to understanding how EU policy has affected urban change and local development across Europe The chapters in this book were originally published as a special issue of the journal Urban Research Practice *Cultural Urban Heritage* Mladen Obad Šćitaroci, Bojana Bojanić Obad Šćitaroci, Ana Mrđa, 2019-01-28 This book presents strategies and models for cultural heritage enhancement from a multidisciplinary perspective It discusses identifying historical current and possible future models for the revival and enhancement of cultural heritage taking into consideration three factors respect for the inherited contemporary and sustainable future development The goal of the research is to contribute to the enhancement of past cultural heritage renovation and enhancement methods improve the methods of spatial protection of heritage and contribute to the development of the local community through the use of cultural and in particular architectural heritage Cultural heritage is perceived primarily through conservation but that comes with limitations If heritage is perceived and experienced solely through conservation it becomes a static object It needs to be made an active subject which implies life in heritage as well as new purposes and new life for abandoned heritage Heritage can be considered as a resource that generates revenue for itself and for the sustainability of the local community To achieve this it should be developed in accordance with contemporary needs and technological achievements but on scientifically based and professional criteria and on sustainable

models The research presented in this book is based on the approach of Heritage Urbanism in a combination of experiments case studies and theory *Financial Engineering in Sustainable Funding of Urban Development in the EU* Piotr Idczak, Ida Musiałkowska, 2022-08-22 This theoretically rooted and research based book provides insights on the JESSICA funding model which unlike the traditional non repayable aid focuses on supporting sustainable urban development projects in a repayable and recyclable way Looking through the lens of the JESSICA financial engineering mechanism used in urban transformation it examines the functioning and performance thereof and formulates policy recommendations for the future The aim of this volume is to contribute to a deeper understanding of the JESSICA sustainable funding model by exploring its repayable assistance mechanism to support sustainable urban development projects The authors make several noteworthy contributions to the literature on EU cohesion policy and shed light on the use of the repayable instruments within public interventions while providing for the first time a critical analysis of the JESSICA sustainable funding model from the holistic perspective which is especially relevant for supporting sustainable urban development Financial Engineering in Sustainable Funding of Urban Development in the EU provides policy significant findings that are important for EU cohesion policy in the field of repayable assistance to be reinvested in the long term in urban and regional transformation *The Making of a Smart City in Korea* Jaehyeon Jeong, Hojeong Lee, Joong-Hwan Oh, 2023-05-02 The Making of a Smart City in Korea The Quest for E Seoul displays how the notion of the smart city has been interpreted and applied in Seoul the capital and largest metropolis of South Korea The contributors show how a shift into a digital city has brought about noticeable changes in the governance economics and cultures of Seoul This edited volume on the Seoul Metropolitan Government's quest for e Seoul provides great resources for many cities worldwide seeking to benchmark this particular type of smart city as well as for all those academics in the fields to learn it given that Seoul has systematically pushed different stages and strategies of the smart urbanization **Redeveloping Tehran** Kiavash Soltani, 2022-03-13 This book compares two urban regeneration models namely piecemeal and comprehensive redevelopments Tehran like many cities in the developing world on the one hand faces extensive deterioration in its inner city neighbourhoods and on the other hand faces rapid population growth Urban regeneration is adapted as a policy that not only accommodates urban growth within the city boundaries but also tackles the deterioration problems This book tries to understand how these two redevelopment models operate in run down neighbourhoods of Tehran with a specific focus on developers behaviour regarding these two models Two neighbourhoods that have undergone redevelopments in Tehran one piecemeal and one comprehensive are chosen as case studies Utilising institutional analysis as a qualitative methodological approach this book improves our understanding of the process of built environment production as well as the role of developers and state in the development process The book demonstrates that the development decision making cannot be solely understood as the result of economic rationality as it occurs within institutional contexts structured by dynamic needs and concerns of actors In advancing institutional analysis the research

demonstrates the different approaches taken by developers development organisations and planners as they engaged differently with the wider structures set by the government through different policies Community Regeneration Masterplan Francesco Manfredi,Dario Costi,2023-01-01 This book reports on a large research project on community regeneration which integrated the spatial social economic and organizational factors with the dimensions of sustainability resilience and participation Upon providing a detailed review on concepts of community and urban regeneration it analyses a set of successful case studies from 30 European cities which were selected by the authors from different rankings and awards Fifty seven key performance indicators and the results of self assessment questionnaires are here introduced to allow a comparative study of best practices and eventually to outline 20 guidelines and 100 strategic actions for future community regeneration projects All in all this book offers extensive information and a source of inspiration for urban planners economists sociologists public administrators stakeholders and all those involved in the development and management of sustainable cities **Urban Planning for Healthy European Cities** Rosalba D'Onofrio,Elio Trusiani,2018-02-23 This book investigates different aspects of the relationship between healthy cities and urban planning examining various best practices in Europe It uses the above as a starting point and investigates different aspects of healthy cities examining various best practices in Europe Capitalizing on ongoing trials the chapters identify the policies that underlie plans and projects that have caused positive changes in local communities in terms of the quality of life and safety of inhabitants From these best practices the book deduces criteria and guidelines for planning healthy and safe cities Innovative & Sustainable Cities European Foundation for the Improvement of Living and Working Conditions,1997 Indicators for Sustainable Urban Development International Institute for the Urban Environment,1998 **Urban Sustainability in New Zealand** ,1999 This report contains the papers presented at a workshop on urban sustainability in New Zealand held at the Royal Society of New Zealand October 1998 **Regions & Cities of Europe** ,2010-03 Year Book - Royal Society of Edinburgh Royal Society of Edinburgh,1998 Comprises the obituary notices and appendices to Proceedings previously published at the end of each session s volume of Proceedings Cf Foreword 1940 41 **Official Journal of the European Communities** ,1999

Bio-syllabus for European Environmental Education Agni Vlavianos-Arvanitis,2002 **Urban Regeneration** Peter Roberts,Hugh Sykes,1999-12-20 It Urban Regeneration Should make life somewhat easier for practitioners and will offer a further stimulus to the development of taught courses in the not so gentle art of regeneration Urban Studies Providing students and practitioners with a detailed overview of the key theoretical and applied issues this book is a comprehensive and integrated primer on regeneration The various chapters review the history and context of urban regeneration consider funding implications look at environmental social and community issues as well as employment education and training focus on managing urban regeneration consider land use issues and discuss monitoring and evaluation The book concludes with a comparative analysis with examples from America and Europe and a discussion of future trends The book represents the first

systematic overview of urban regeneration in one volume and is set to become the standard reference work As such it will be required reading for practitioners involved in regeneration and students of urban studies planning architecture and estate management **Environment & Planning** ,2006 **Road & Transport Research** ,2001 *Resurgence* ,2000 The Planner ,1992
