Handbook of Research on Network-Enabled IoT Applications for Smart City Services Reddy, K. Hemant Kumar, Roy, Diptendu Sinha, Mishra, Tapas Kumar, Hussain, Mir Wajahat, 2023-09-26 The rapid growth of IoT and its applications in smart cities pose significant challenges for academic scholars The increasing number of interconnected devices and the massive amounts of data they generate strain traditional networks leading to inefficiencies and security vulnerabilities Additionally the centralized control plane in Software Defined Networks SDN presents a single point of failure hindering network performance while IoT devices themselves are susceptible to attacks compromising user data and privacy To address these pressing issues Network Enabled IoT Applications for Smart City Services offers a compelling solution Edited by Dr K Hemant Kumar Reddy Dr Diptendu Sinha Roy and Tapas Mishra this book advocates leveraging SDN to handle high frequency data streams effectively It also proposes the integration of blockchain technology to enhance security and reliability in IoT applications offering a roadmap for scholars to improve network efficiency security and reliability in IoT and smart city domains With their extensive expertise the authors provide academic scholars with a comprehensive and innovative resource that inspires further research and development in this evolving field enabling them to make significant contributions to the advancement of IoT and smart city technologies

Scenarios and Indicators for Sustainable Development-Towards A Critical Assessment of Achievements and Challenges Joachim H. Spangenberg, 2019-03-14 Globalization and telecoupling are enhancing the complexity of the coupled socio ecological system constituted by the interaction between the global ecosphere and the anthroposphere As a result the demand for tools to identify transformative innovations assess future risks and support precautionary decisions for

sustainability is growing by the day in business and politics Scenarios are a means of simplification reducing the real world complexity to a limited number of essential factors to analyze their interactions and support policy formulation with indicators as communication and monitoring tools In particular in a time of fake news and alternative truths a critical reflection amongst producers and users of scenarios and indicators is overdue the capability for critical self reflection is what distinguishes science from pseudo science and is a condition of trust The authors of this book test established measurement and modeling approaches against new challenges assess the weaknesses of prevailing innovation theories and the political ideological embedment of archetypical scenarios highlight deficits in taking the physical basics into account and the need to understand global interaction and the stepwise process of energy transitions point out technical as well as conceptual weaknesses in data collection harmonization and indicator generation always with a view to solving problems
