The EU, the US and China _ Towards a New International Order? Jing Men, Wei Shen, 2014-02-28 The interaction between the EU the US and China is of particular importance to the formation of the international order in the 21st century This book

focuses on the latest developments and examines how critical the interactions between these three pl *US-China Foreign Relations* Robert S. Ross, Øystein Tunsjø, Dong Wang, 2020-10-15 This book examines the power transition between the US and China and the implications for Europe and Asia in a new era of uncertainty The volume addresses the impact that the rise of China has on the United States Europe transatlantic relations and East Asia China is seeking to use its enhanced power position to promote new ambitions the United States is adjusting to a new superpower rivalry and the power shift from the West to the East is resulting in a more peripheral role for Europe in world affairs Featuring essays by prominent Chinese and international experts the book examines the US China rivalry the changing international system grand strategies and geopolitics foreign policy geo economics and institutions and military and technological developments The chapters examine how strategic security and military considerations in this triangular relationship are gradually undermining trade and economics reversing the era of globalization and contributing to the breakdown of the US led liberal order and institutions that will be difficult to rebuild The volume also examines whether the adversarial antagonism in US China relations the tension in transatlantic ties and the increasing rivalry in Europe China relations are primarily resulting from leaders ambitions or structural power shifts This book will be of much interest to students of Asian security US foreign policy European politics and International Relations in general **China, the United States, and Global Order** Rosemary

Foot, Andrew Walter, 2010-12-20 The United States and China are the two most important states in the international system and are crucial to the evolution of global order Both recognize each other as vital players in a range of issues of global significance including the use of force macroeconomic policy nonproliferation of nuclear weapons climate change and financial regulation In this book Rosemary Foot and Andrew Walter both experts in the fields of international relations and the East Asian region explore the relationship of the two countries to these global order issues since 1945 They ask whether the behaviour of each country is consistent with global order norms and which domestic and international factors shape this behaviour They investigate how the bilateral relationship of the United States and China influences the stances that each country takes This is a sophisticated analysis that adroitly engages the historical theoretical and policy literature

Responding to China's Rise Vinod K. Aggarwal, Sara A. Newland, 2014-10-29 In this edited volume a set of issue and country experts tackle questions regarding China's current rise to power within the current international economic and political order The current international system is governed by a Western conception of order and based on the primacy of post World War II rules drawn from liberal models of capitalism and democracy practiced in the US and in Western Europe In this context the most important and most uncertain questions facing the West over the next decade concern how the EU and the US will respond to China's rapid growth Will the transatlantic relationship hold and become stronger faced with this new economic and geopolitical challenge Or will the US and the EU an increasingly prominent global player compete for economic and political advantage After a brief introduction laying out the circumstances of China's economic and political

rise and the challenges that this poses to the existing international order the book proceeds in three sections The first section provides competing theoretical perspectives on China's rise in a historical context The second section provides a distinctly Chinese perspective on China's current rise The third section looks at responses from the United States and the European Union focusing on both economic and security issues as well as the implications of China's rise for US EU relations This book is relevant to both scholars and policymakers concerned with Chinese domestic politics and foreign policy US foreign policy EU foreign policy China US relations China EU relations international security international political economy and emerging markets

Power, Perception and Foreign Policymaking Scott Brown, 2017-11-13 This book examines the changing dynamics of power in the international arena since the end of the Cold War Brown engages in analysis of how the United States and the European Union have responded to the so called rise of China through an examination of how policymakers' perceptions of China have changed over time and influenced their policy choices This study undertakes rigorous analysis of how these perceptions have evolved between 1989 and 2009/2016 offering a comparative perspective on the similarities and differences between the policy discourse and behaviour within these two Western powers Brown argues that China's rise is a contested notion with varied perceptions of how the implications of China's ascendancy have shaped policy preferences in ways that are inconsistent with concerns over the threat of an impending power transition Combining concepts and methods derived from IR and FPA the book examines the linkages between great power politics and policymakers' competing interpretations of key international actors and their influence upon foreign policies The main objective of the study is to illuminate the different ways in which the US and the EU have responded to the rise of China through a close analysis of their decision making processes and outcomes across a series of key encounters and events including the transatlantic debate over the EU's proposal to lift its China arms embargo 2003-2005 Undertaking qualitative analysis of the development of American and European policymakers' perceptions of China this book will be of interest to graduates and scholars of post Cold War international politics Foreign Policy Analysis policymaking US China relations and EU China relations

Europe and China Roland Vogt, 2012-03-01 This edited volume analyzes the changing nature of the relationship between China and Europe This relationship has been subject to significant shifts and transformations not least because of the enormity of China's social and economic development since 1978 and the political consequences this has brought about in international politics The global financial crisis of 2008-09 and the subsequent sovereign debt emergency in Europe have also altered the nature of the interactions between the two regions China has become a more assertive confident and active player on the global stage Its economic development is now a major pillar of the global economy and its growth has been conducive for a fragile economic recovery to take place in Europe and beyond

European Foreign and Security Policy towards China Claude Zanardi, 2022-11-08 This book explores the foreign and security policies of Germany France and the UK vis vis China Despite the progress made by the Lisbon Treaty and notwithstanding the first EU Global Strategy the European Union does not have

a strategy to address the rise of China Since this strategic deficit does not automatically reflect the level of EU member states this book argues that the vacuum at EU level provides member states with an opportunity to fill this gap By assuming that an increase in national policies on China would eventually lead to a comprehensive European strategy for China the author focuses on the three biggest European countries and looks at the rise of China to understand the development of the EU's Common Foreign and Security Policy vis vis the PRC While the CFSP depends on the contribution of EU member states their role in shaping the CFSP towards China has not been researched yet and this book fills the gap *The Diplomatic System of the European Union* Michael Smith, Stephan Keukeleire, Sophie Vanhoonacker, 2015-06-12 Over the past five years the EU has established a new system of diplomacy centred on the European External Action Service EEAS and the High Representative for Foreign Affairs and Security Policy This new system reflects a process of evolution in a changing context and has been faced by major challenges since its inception This book examines the diplomatic system of the EU locating it within the broader study of diplomacy and the European integration project The volume is structured around the interrelated themes of institutional change and the evolving practices of EU diplomacy It tracks the development of the EU's system of diplomacy with particular reference to the implementation of the Lisbon Treaty the establishment of the EEAS and the emerging practices of EU strategic and structural diplomacy Bringing together contributions from leading experts in the field this book provides an original approach to the development and operation of the EU's diplomatic system This book will be of interest to students and scholars of European Union international relations European Union politics and diplomacy

Awakening to China's Rise Hugo Meijer, 2022-08-01 *Awakening to China's Rise* provides the most comprehensive analysis to date of how Europe's major powers have responded to the re emergence of China as a great power in world politics since the end of the Cold War To do so it puts forward a unique cross regional comparison of how the major European powers France Germany and the United Kingdom have confronted Chinese assertiveness both in the Asia Pacific and in Europe Firstly it analyses their response to China's increasingly muscular regional posture in the Asia Pacific through the development of diplomatic and security initiatives with partners in the region Secondly it delineates how they have confronted China's inroads into Europe looking at the measures that they have taken to tackle Chinese investments in and supply of technologies in strategic sectors such as critical national infrastructures dual use technologies and in the digital domain including Huawei's 5G networks A longstanding assumption in the IR literature has been that European foreign policies toward the People's Republic of China have been driven by a naïve and self interested focus on the economic opportunities presented by such a vast market overlooking security considerations This book challenges such common belief through a detailed examination of the policies of France Germany and the United Kingdom from 1989 to the present Its central argument is that whereas this assessment aptly characterized the first two post Cold War decades Beijing's growing assertiveness after 2009 caused the three major European powers to awaken to China's rise In the 2010s heightened threat

perceptions of China coupled with increasingly competitive bilateral economic relations with the PRC have gradually and cumulatively caused the hardening of their policy goals which in turn translated into the formulation of new policy instruments to confront such a challenge To substantiate this argument the book relies on a large body of previously undisclosed primary sources including 223 interviews conducted with senior officials in Europe Berlin Brussels London Paris in the United States Washington DC and in Asia Beijing Shanghai New Delhi Seoul declassified archival documents from France the UK and Germany leaked US diplomatic cables and new data on European naval deployments The EU-China Security Paradox Julia Gurol,2022-01-06 EPUB and EPDF versions available Open Access under CC BY NC ND license In this enlightening analysis Julia Gurol unpicks the complex security relations between the European Union EU and China She investigates the principles rationales and shifting dynamics of collaboration on a range of security issues and their consequences for China the EU and other regions She pays particular attention to EU China relations in the realm of anti terrorism anti piracy and energy security and disentangles their cooperation efforts in the context of increasing political and economic tensions Systematic and accessible this is an essential guide to the past present and future of one of the world s most important yet most complicated security relationships *US-Japan-North Korea Security Relations* Anthony DiFilippo,2013-03 This book examines the major security and related issues between the United States Japan and North Korea officially the Democratic People s Republic of Korea DPRK Although focusing mainly on current issues this book also provides sufficient historical background to enable readers to appreciate the many nuances that have been ignored by policymakers analysts and the media Where appropriate the book examines the security interests of other nations in Northeast Asia specifically South Korea China and Russia The central purpose of the book is to objectively analyze the policymaking processes of Washington Tokyo and Pyongyang with respect to the DPRK s nuclear weapons and other important security issues and ultimately to provide practical ways to improve the security environment in Northeast Asia Ongoing security related issues include nuclear missile testing by the DPRK its removal from the U S list of states sponsoring terrorism and the abduction of Japanese nationals by North Korean agents that occurred during the 1970s and 1980s Unlike other books which typically take the position that North Korea is a rogue state run by an irrational belligerent and autocratic leader this book reveals the fundamentals of Pyongyang s security concerns in the region This book will be of great interest to students of North East Asian politics Asian security studies US foreign policy and Security Studies IR in general The United States and Asia Robert G. Sutter,2015-07-01 This book offers a cogent overview of the historical context and enduring patterns of U S relations with Asia Noted scholar Robert G Sutter provides a balanced analysis of post Cold War dynamics in Asia which involve interrelated questions of security economics national identity and regional institution building He demonstrates how these critical concerns manifest a complex mix of realist liberal and constructivist tendencies that define the regional order Sutter weighs how the recent US emphasis on re engagement with the broader Asia Pacific fits within the

context of regional dynamics He assesses how the United States has responded to Asia's growing strength and importance while at the same time trying to maintain its leading position as an Asian power despite China's rising influence The United States and China Dong Wang, 2021-07-28 Now fully revised and updated The United States and China offers a comprehensive synthesis of US Chinese relations from initial contact to the present Balancing the modern 1784 1949 and contemporary 1949 present periods Dong Wang retraces centuries of interaction between two of the world's great powers from the perspective of both sides She examines state to state diplomacy as well as economic social military religious and cultural interplay within varying national and international contexts As China itself continues to grow in global importance so too does the US Chinese relationship and this book provides an essential grounding for understanding its past present and possible futures

The Diplomatic Making of EU-China Relations Lucie Qian Xia, 2024-04-11 This book provides a novel theoretical framework to understand EU China diplomatic relations The existing scholarly literature on EU China relations is characterised by a dichotomous distinction between material and ideational factors and overemphasises the interest versus value motif undergirding EU China relations The diplomacy and future direction of the relationship seem as opaque as their extent remains incalculably complex This book takes us beyond binary motives by introducing a novel theoretical model of diplomatic relationship building that brings to the fore the more nuanced and latent factors to make sense of EU China diplomatic relationship building the new theory captures the relational nature of diplomatic relationship building by integrating the social layer of intentions in understanding international diplomacy This study further sheds light on the opportunities and challenges in enhancing EU China relations through a comparative in depth investigation of the processes practices and politics of EU China climate change and agricultural trade relations over the past two decades The book draws on a rich collection of original data encompassing over 100 interviews with stakeholders of EU China relations conducted from 2015 2023 strengthened by participant observation at EU and Chinese institutional headquarters and in diplomatic fora that has taken place over the past ten years Enriching these data are newly disclosed official minutes and documentation regarding EU China negotiations and cooperation This book will be of much interest to students of diplomacy studies Chinese politics EU politics and international relations in general
