Educational Leadership in Becoming Nuraan Davids, Yusef Waghid, 2016-08-25 Educational Leadership in Becoming reconsiders educational leadership in its current forms and presents a more plausible form of educational leadership to contend with the complexities currently found in universities and schools Much of the literature in vogue concerning educational leadership ranges from transactional to transformative representations of the concept in relation to educational management and policy curriculum inquiry and pedagogical action The primary aim of this book is to revisit some of the dominant understandings of educational leadership and to offer an extended view of the practice along the lines of potentiality and becoming Davids and Waghid argue that all current forms of educational leadership are insufficient to enact responsible human action particularly when it comes to addressing the combined issues of globalisation and equitable redress and transformation whether in relation to leading schools or universities The primary objective of the book is to draw on the Agambian notion of becoming in order to show that an educational leadership in becoming is better placed to not only address the myriad challenges besetting education but to also enhance the potential of leadership in action The book addresses an international audience by analysing conceptions of transformative leadership and should be read by anyone who is interested in education and educational leadership as well as the impact of neoliberal agendas on education and society It should also appeal to those interested in the philosophy of education

Tackling Trauma Paul A. Barker, 2019-03-14 Trauma is a universal phenomenon that can be caused by international catastrophes or individual personal tragedy. Trauma is also a severely neglected topic in Christian literature, and while it can challenge someone's faith in Christ, God and the ministry of his Word is central to dealing with the emotional and psychological impact of trauma. By his Spirit, through his Word, and through his church, God is available to minister to people suffering from trauma and bring transformation to their lives. In this book, a team of experienced and informed Christian professionals from around the world promote a deep biblical response to trauma through clinical and theological wisdom and their first hand experience of witnessing and experiencing trauma. The contributions provide practical responses to people's trauma rather than mere descriptions of the problems, making it an ideal resource for pastors, counsellors, humanitarian workers, and students.

Probabilistic Finite Element Model Updating Using Bayesian Statistics Tshilidzi

Marwala, Ilyes Boulkaibet, Sondipon Adhikari, 2016-09-23 *Probabilistic Finite Element Model Updating Using Bayesian Statistics: Applications to Aeronautical and Mechanical Engineering* Tshilidzi Marwala and Ilyes Boulkaibet, University of Johannesburg, South Africa; Sondipon Adhikari, Swansea University, UK. Covers the probabilistic finite element model based on Bayesian statistics with applications to aeronautical and mechanical engineering. Finite element models are used widely to model the dynamic behaviour of many systems including in electrical, aerospace, and mechanical engineering. The book covers probabilistic finite element model updating achieved using Bayesian statistics. The Bayesian framework is employed to estimate the probabilistic finite element models which take into account of the uncertainties in the measurements and the modelling procedure. The Bayesian formulation achieves this by formulating the finite element model as the posterior distribution of the model given the measured data within the context of computational statistics and applies these in

aeronautical and mechanical engineering Probabilistic Finite Element Model Updating Using Bayesian Statistics contains simple explanations of computational statistical techniques such as Metropolis Hastings Algorithm Slice sampling Markov Chain Monte Carlo method hybrid Monte Carlo as well as Shadow Hybrid Monte Carlo and their relevance in engineering Key features Contains several contributions in the area of model updating using Bayesian techniques which are useful for graduate students Explains in detail the use of Bayesian techniques to quantify uncertainties in mechanical structures as well as the use of Markov Chain Monte Carlo techniques to evaluate the Bayesian formulations The book is essential reading for researchers practitioners and students in mechanical and aerospace engineering *International symposium on*

Architecture, State Modernism and Cultural Nationalism in the Apartheid Capital Hilton Judin, 2021-04-07 This book is the first comprehensive investigation of the architecture of the apartheid state in the period of rapid economic growth and political repression from 1957 to 1966 when buildings took on an ideological role that was never remote from the increasingly dominant administrative legislative and policing mechanisms of the regime It considers how this process reflected the usurpation of a regional modernism and looks to contribute to wider discourses on international postwar modernism in architecture Buildings in Pretoria that came to embody ambitions of the apartheid state for industrialisation and progress serve as case studies These were widely acclaimed projects that embodied for apartheid officials the pursuit of modernisation but carried latent apprehensions of Afrikaners about their growing economic prospects and cultural estrangement in Africa It is a less known and marginal story due to the dearth of material and documents buried in archives and untranslated documents Many of the documents drawings and photographs in the book are unpublished and include classified material and photographs from the National Nuclear Research Centre negatives of 1960s from Pretoria News and documents and pamphlets from Afrikaner Broederbond archives State architecture became the most iconic public manifestation of an evolving expression of white cultural identity as a new generation of architects in Pretoria took up the challenge of finding form to their prospects and beliefs It was an opportunistic faith in Afrikaners who urgently needed to entrench their vulnerable and contested position on the African continent The shift from provincial town to apartheid capital was swift and relentless Little was left to stand in the way of the ambitions and aim of the state as people were uprooted and forcibly relocated structures torn down and block upon block of administration towers and slabs erected across Pretoria This book will be of great interest to students and scholars of architectural history as well as those with an interest in postcolonial studies political science and social anthropology

University Community Engagement and Lifelong Learning

Julia Preece, 2017-07-13 This book offers a conceptual re think of how university community engagement functions as a lifelong learning resource for communities While having a specific focus on the South African context it has important implications for other universities which are concerned with their communities and makes a compelling argument for the university as a public good in spite of current trends towards marketization and commodification of higher education The book draws on a theoretical framework of capabilities asset based community development and the adult learning concept of dialogue to propose a model whereby the boundary walls of the university become metaphorically porous so that community members feel free to interact with the university as equal members of society A historical outline of African universities is provided as well as an exploration of the evolution of terms for community engagement service learning and learning cities and an examination of the policy and practice implications for the ideological model of a porous university
