Topics in Heart Failure Management Giuseppe Rescigno, Michael S. Firstenberg, 2019-06-19 This textbook represents a short update on original aspects of heart failure. It covers topics of heart failure management such as prevention, drug monitoring after heart transplant and the critical care approach. There are also chapters on less common facets of this syndrome such as prevalence and features in a specific African region and the complexity of telemedicine in heart failure. In summary, it will be a valid adjunct to more exhaustive textbooks already available. *Daily Graphic* Ransford

Mboyonga, 2024-12-31 Using a capability approach as an analytical framework, this timely volume examines how access to higher education enabled through private universities can transform students' lives and contribute to human development in low income countries in the Global South. Providing new insights into the contribution of the private higher education sector in Africa's developmental agendas, the book offers an alternative to human capital theory by offering an expansive notion on the value of higher education, emphasising both the economic and the intrinsic societal and social benefits that come from access to university and raised aspirations. The chapters identify and discuss six specific capabilities valued by students that higher education provides. This includes epistemological access, epistemic contribution, aspiration, recognition, respect and belonging, Ubuntu and employability. The book foregrounds the voices of students and lecturers to explore students' aspirations, agency, access and participation. Ultimately promoting a reconsideration of access to higher education beyond numerical terms by focusing on students' access to transformative knowledge as means to promote their freedom to achieve well-being, the book will appeal to scholars, researchers and postgraduate students in higher education, African education studies and international and comparative education more broadly. *2014 Global Synthetic Drugs Assessment*, 2014
