University Of Limpopo Prospectus:

Cartographies of Nature Maano Ramutsindela, 2014-06-19 The ascendancy of border studies in the last two decades or so and the burgeoning work on nature and society neither drew attention to ecological theories of borders nor capitalised on nature as a useful avenue through which border research could be advanced This volume fills this void by engaging with the following key questions What insights can be drawn from species borders to broaden understandings of bordering What sorts of borders are engendered by various types of conservation areas What border stories does each of these areas tell us What do conservation related borders teach us about multiple lines that divide societies Answers to these questions help researchers understand a typology of nature related borders The primary objectives of this volume are twofold The first objective is to expand and deepen the links between nature conservation and border studies by bringing species borders into conversation with border studies while at the same time paying attention to diverse conservation areas and conservation practices The second objective is to highlight forms of borders associated with various types of conservation areas and the protection of certain types of natural resources The manner in which nature conservation produces borders and the forms those borders take has the potential to enrich the conceptualisation of borders The point of departure in this volume is that conservation practices produce feedback loops on social reality Authors in the volume variously show that concerns with environmental protection and management offer possibilities for exploring and even disrupting borders within society and those between society and nature Conservation areas in particular are crucial for a meaningful analysis of nature's borders and the discourses and narratives related to them and how such discourses influence conservation practice This volume is an invaluable resource for research and upper level courses on border studies political ecology conservation and biodiversity management and environmental change and social impact

Sustainable Agriculture Reviews 45 Praveen Guleria, Vineet Kumar, Eric Lichtfouse, 2020-09-07

Legumes are a major constituent of vegetarian diets and alleviate malnutrition because they are protein rich and easily digestible Moreover a legume based diet is much more sustainable than a meat based diet Recent research has disclosed major advances in legume agriculture and biotechnology leading to improved health benefits from nutrients antioxidants polyphenolic phytochemicals phenolic acids flavonoids and tannins This book reviews bioactive compounds and their applications and conventional breeding and biotechnology for legume sustainability and nutritional enhancement

Creative Activities for Group Therapy Nina W. Brown, 2013-04-02 Leading a group is a delicate balancing act of tasks and dynamic group and individual factors and the group leader's expertise and skill are fundamental to maintaining this balance However no matter how competent and well prepared the group leader is there can be situations that present challenges that are not easily addressed defy conventional interventions or call for a different approach The material presented in this book is intended to give group leaders evidence based creative and inspirational tools techniques intervention strategies and the like to address these dilemmas and difficult situations They can also enhance members

growth and development stimulate self exploration assist to soothe and calm and deepen and broaden thoughts and feelings The creative activities included were selected because they do not require specialized training are easy to implement do not follow a particular theoretical perspective and can be effective for both the individual and group as a whole The major categories of expressive processes presented are fairy tales drawing writing imagery and mindfulness music movement exercise dance drama and role play and collage flats and scrapbooks Each chapter will focus on one of these activities and is designed so that they can be completed in one session The closing chapters will present applications for member s concerns group level challenges and case examples of group dilemmas and suggested activities to address them **Guide to**

The Academy ,1878 *Proceedings of the 1st International Conference on Indigenous Vegetables and Legumes Prospectus for Fighting Poverty, Hunger and Malnutrition* M. L. Chadha,G. Kuo,C. L. L. Gowda,2007 Academy and Literature ,1878 Placing Critical Geography Lawrence D. Berg,Ulrich Best,Mary Gilmartin,Henrik Gutzon Larsen,2021-11-29 This book explores the multiple histories of critical geography as it developed in 14 different locations around the globe whilst bringing together a range of approaches in critical geography It is the first attempt to provide a comprehensive account of a wide variety of historical geographies of critical geography from around the world Accordingly the chapters provide accounts of the development of critical approaches in geography from beyond the hegemonic Anglo American metropolises Bringing together geographers from a wide range of regional and intellectual milieus this volume provides a critical overview that is international and illustrates the interactions or lack thereof between different critical

geographers working across a range of spaces The chapters provide a more nuanced history of critical geography suggesting that while there were sometimes strong connections with Anglo American critical geography there were also deeply independent developments that were part of the construction of very different kinds of critical geography in different parts of the world Placing Critical Geographies provides an excellent companion to existing histories of critical geography and will be important reading for researchers as well as undergraduate and graduate students of the history and philosophy of geography
