Unmanned Aircraft Systems Uas Manufacturing Trends:

Unmanned Aircraft Systems (UAS) Glennon J. Harrison, Library of Congress. Congressional Research Service, 2013

Unmanned aircraft systems UAS represent a bright spot for the technology intensive aerospace manufacturing sector but military and civil government agencies will likely be the predominant customers for an extended period while such systems are integrated into the U S National Airspace System national airspace Airspace access by commercial UAS users is projected to be much slower than for governmental entities The U S Department of Defense DOD the major user of such systems has demonstrated their effectiveness in Iraq and Afghanistan but continued development of new systems and capabilities depends on access to the national airspace The development and manufacture of UAS for use by public entities i e federal state or local governments and by public universities and commercial users are expected to grow over the next few years but numerous regulatory and technical issues remain to be resolved before government agencies or commercial operators can begin routine flight operations in the national airspace Concerns about the safety of unmanned aircraft and UAS operations in congested airspace and over populated areas may slow industry growth A major issue for all UAV operations whether in crowded commercial airspace or contested battlefield airspace is the development of sense detect and avoid technologies that will provide the same level of collision avoidance as manned aircraft Privacy concerns have also been raised about the widespread use of UAV by government and business

Valavanis, Les A. Piegl, 2008-11-14 Commercial interest for unmanned aircraft systems UAS has seen a steady increase over the last decade Nevertheless UAS operations have remained almost exclusively military This is mainly due to the lack of a regulatory framework that allows only limited public and civil UAS operations with usually crippling restrictions Although efforts from the Federal Aviation Administration and its partners are already underway to integrate UAS in the National Airspace System NAS the appropriate regulation will not be ready for several more years In the meantime UAS developers need to be aware of the current operational restrictions as well as make informed decisions on their research and development efforts so that their designs will be airworthy when the regulatory framework is in place This monograph aims to present an overview of current aviation regulation followed by an investigation of issues and factors that will affect future regulation
