Ensuring Quality in Professional Education Volume II Karen

Trimmer, Tara Newman, Fernando F. Padró, 2019-01-11 This book examines quality teaching in professional education in the fields of engineering and international knowledge structures. The second of a two-volume series, the editors and contributors structure the book around case studies which highlight the elements constituting good practice within professional education. While there is no one specific route to prepare well-qualified professionals, this volume explores the decisions the academics responsible for delivering this education make to ensure quality curricula. Ultimately, the key to effective preparations rests with the value employers place on the focus, emphasis and balance between the academic and practical in relation to their own expectations for skills that graduates must have. The second volume in this collection will appeal to students and scholars of professional pedagogy and engineering pedagogy more specifically.

Wicked Valuations Michael

McDermott, 2018-07-16 Traditional valuation approaches are increasingly recognised as being insufficient to address the wicked valuation problems of the diverse peoples and groups that inhabit the globe from north to south, east to west. This book demonstrates the limitations of science and, in particular, economics as the foundation on which valuations are traditionally based. It demonstrates the importance of and provides justification for the personal cultural values and norms which underpin our assessment of value and the fact that these vary across the world. In *Wicked Valuations*, Michael McDermott develops a means of engaging with highly complex valuation problems. His autoethnography provides a lens to draw on knowledge and experience from his 40 years in land valuation in Africa and the Asia Pacific, while documentary analysis is used to draw in
