Urban China Toward Efficient Inclusive And Sustainable Urbanization:

Urban China World Bank,2014-07-29 In the last 30 years China's record economic growth lifted half a billion people out of poverty with rapid urbanization providing abundant labor cheap land and good infrastructure While China has avoided some of the common ills of urbanization strains are showing as inefficient land development leads to urban sprawl and ghost towns pollution threatens people's health and farmland and water resources are becoming scarce With China's urban population projected to rise to about one billion or close to 70 percent of the country's population by 2030 China's leaders are seeking a more coordinated urbanization process **Urban China** is a joint research report by a team from the World Bank and the Development Research Center of China's State Council which was established to address the challenges and opportunities of urbanization in China and to help China forge a new model of urbanization The report takes as its point of departure the conviction that China's urbanization can become more efficient inclusive and sustainable However it stresses that achieving this vision will require strong support from both government and the markets for policy reforms in a number of areas The report proposes six main areas for reform first amending land management institutions to foster more efficient land use denser cities modernized agriculture and more equitable wealth distribution second adjusting the hukou household registration system to increase labor mobility and provide urban migrant workers equal access to a common standard of public services third placing urban finances on a more sustainable footing while fostering financial discipline among local governments fourth improving urban planning to enhance connectivity and encourage scale and agglomeration economies fifth reducing environmental pressures through more efficient resource management and sixth improving governance at the local level **Urban China** ,2014 Urban China ,2014 China Urban ,2014 This joint report by the World Bank and the Development Research Center of China's State Council includes six priority areas for a new model of urbanization i Reforming land management and institutions ii Reforming the hukou household registration system to provide equal access to quality services for all citizens and create a more mobile and versatile labor force iii Placing urban finances on a more sustainable footing while creating financial discipline for local governments iv Reforming urban planning and design v Managing environmental pressures vi Improving local governance The performance evaluation system of local officials could be adjusted to give greater incentives for a more efficient inclusive and sustainable urbanization process Extracted from World Bank website *Report to Congress of the U.S.-China Economic and Security Review Commission* U.S.-China Economic and Security Review Commission,2013 *China's Economy* Arthur R. Kroeber,2016-03-01 China's Economy What Everyone Needs to Know is a concise introduction to the most astonishing economic growth story of the last three decades In the 1980s China was an impoverished backwater struggling to escape the political turmoil and economic mismanagement of the Mao era Today it is the world's second biggest economy the largest manufacturing and trading nation the consumer of half the world's steel and coal the biggest source of international tourists and one of the most influential investors in

developing countries from southeast Asia to Africa to Latin America China's growth has lifted 700 million people out of poverty It has also created a monumental environmental mess with smog blanketed cities and carbon emissions that are a leading cause of climate change Multinational companies make billions of dollars in profits in China each year but traders around the world shudder at every gyrations of the country's unruly stock markets Most surprising of all its capitalist economy is governed by an authoritarian Communist Party that shows no sign of loosening its grip How did China grow so fast for so long Can it keep growing and still solve its problems of environmental damage fast rising debt and rampant corruption How long can its vibrant economy co exist with the repressive one party state What do China's changes mean for the rest of the world China's Economy What Everyone Needs to Know answers these questions in straightforward language that you don't need to be an economist to understand but with a wealth of detail drawn from academic research interviews with dozens of company executives and policy makers and a quarter century of personal experience Whether you're doing business in China negotiating with its government officials or a student trying to navigate the complexities of this fascinating and diverse country this is the one book that will tell you everything you need to know about how China works where it came from and where it's going *Slums* Eugenie L. Birch, Susan M. Wachter, Shahana Chattaraj, 2016-04-18 *Slums How Informal Real Estate Markets Work* shows that unauthorized settlements in rapidly growing cities are not divorced from market forces rather they must be understood as complex environments where state policies and market actors play a role

Authoritarian Legality in China Mary E. Gallagher, 2017-09-07 Can authoritarian regimes use democratic institutions to strengthen and solidify their rule The Chinese government has legislated some of the most protective workplace laws in the world and opened up the judicial system to adjudicate workplace conflict emboldening China's workers to use these laws This book examines these patterns of legal mobilization showing which workers are likely to avail themselves of these new protections and find them effective Gallagher finds that workers with high levels of education are far more likely to claim these new rights and be satisfied with the results However many others left disappointed with the large gap between law on the books and law in reality reject the courtroom for the streets Using workers narratives surveys and case studies of protests Gallagher argues that China's half hearted attempt at rule of law construction undermines the stability of authoritarian rule New workplace rights fuel workers rising expectations but a dysfunctional legal system drives many workers to more extreme options including strikes demonstrations and violence Regional Development Dialogue, 2014 An international journal focusing on third world development problems **Urbanization and Development**, 2016 The analysis of urban development of the past twenty years presented in this maiden edition of the World Cities Report shows with compelling evidence that there are new forms of collaboration and cooperation planning governance finance and learning that can sustain positive change The Report unequivocally demonstrates that the current urbanization model is unsustainable in many respects It conveys a clear message that the pattern of urbanization needs to change in order to better respond to

the challenges of our time to address issues such as inequality climate change informality insecurity and the unsustainable forms of urban expansion *Statistical Yearbook for Asia and the Pacific* United Nations Publications,2016-05-15 The Statistical Yearbook presents data for the 58 regional Economic and Social Commission for Asia and the Pacific ESCAP member countries as well as world regional sub regional and economic aggregates for comparison It offers current trends and emerging topics in the Asia Pacific grouped around the themes of people the environment the economy and connectivity It provides the international and regional community with key indicators objective analyses of the current trends and emerging issues along with data and charts In order to maximize the comparability the Yearbook data is sourced exclusively from international agencies that adhere to the official global statistical standards *Latin American Economic Outlook* Organization for Economic Cooperation and Development,2015 This publication is devoted to the evolving relationship between Latin America and China as well as its prospects in the long term China s transformation involves a gradual shift in its development strategy including the rebalancing process from investment to consumption the demographic transition the structural transformation towards high value added goods and services and a going out policy to approach other regions This report lays the ground for discussing future trends in the relationship between China and Latin America given these changing patterns Based on the analysis of potential transmission channels of China s new model to the region which include issues on trade finance and skills the outlook aims to identify strategies and policy responses for Latin America to overcome development challenges Latin America and China can complement each other further and build a mutually beneficial partnership for development **Report of the Special Rapporteur on Extreme Poverty and Human Rights on His Mission to China** United Nations. General Assembly,2017 *Minerals Yearbook* ,2016 *Peri-Urban China* Li Tian,Yan Guo,2019-04-02 The urban rural relationship in China is key to a sustainable global future This book is particularly interested in peri urbanization in China the process by which fringe areas of cities develop Recent institutional change has helped clarify property rights over collective land facilitating peri urban area development Chapters in this book explore how rural industrialization has changed the landscape and rules about land use in peri urban areas It looks at the role of rural industrialization and provides a detailed exploration of peri urbanization theory policy and its evolution in China Leading discussions find out how fragmented bottom up industrialization urbanization and lax governance have led to a series of social and environmental problems The progress in redevelopment of peri urban areas was initially slow due to the spatial lock in effect This book offers practical solutions to environmental issues and explains how policymakers have the potential to redevelop a future collaborative inclusive and sustainable approach to peri urban areas This in depth approach to urbanization will be useful to academics in urban planning and governmental organizations It will also be advantageous to NGOs and professionals involved in urban planning public administration as well as land use work in China and other developing countries **Asian Development Outlook 2012 Update** Asian Development Bank,2012 *Strategic Options*

for Urbanization in the People's Republic of China Asian Development Bank,2013-09-01 Over the past 30 years rapid urbanization and economic growth have transformed the cities of the People s Republic of China PRC But this unprecedented urbanization has highlighted challenges that demand significant changes to basic urban management and planning policies This report is based on a 2011 2012 policy study for the PRC s forthcoming national urbanization plan that will set out urban development policies and guidelines over the coming decade It examines the PRC s urbanization challenges and suggests actions for improving the urban environment through changes in the design financing administration and social integration of cities

Structural Transformation in Ethiopia Fantu Cheru,2014 *China's New Urbanization* Chuanglin Fang,Danlin Yu,2016-02-25 This book answers the call for New Urbanization and proposes a 5 9 6 national spatial layout plan for the urbanization of the 770 major cities in China This macro pattern is based on a few major metropolises at the center and other cities supporting and benefitting from these metropolises to form a pyramid like urban hierarchical system The book also presents a comprehensive regionalization plan for China s New Urbanization and strategic approaches to improving the quality of this New Urbanization Currently China is aggressively promoting a so called New Urbanization which has been regarded as one of the primary ways to build a moderately prosperous society to address critical issues related to agriculture rural regions and farmers to expand domestic demand and promote industrial innovation and to realize the China Dream From a systematic perspective and using recently released urban data the authors analyze the current status of New Urbanization in China and also investigate the various potential problems and obstacles to its concrete implementation Based on the analyses and investigations the authors propose strategic directions paths and basic principles for China s New Urbanization In addition they clearly identify the three different modes of New Urbanization namely the general mode differentiated mode and gradual mode Today many scholars argue that China s urban regions are experiencing a highly unsustainable mode of development Chinese cities are heavily burdened by the so called urban diseases which are characterized e g by congested traffic polluted water and air and a lack of open and green spaces Traditional urbanization which primarily focuses on economic development must be fundamentally reformed New Urbanization which focuses on integrated economic development social integration and space environmental sustainability or simply put on the quality of urbanization has been called for to provide a potential cure for these urban diseases Due to the vastness of China s population and its rapidly growing economic political and cultural relationships with the rest of the world the book demonstrates that the success of this New Urbanization is critical not only to the future of urban China but also the future of urbanization worldwide The book offers a valuable reference work for all researchers graduate student and policy makers interested in China s urban development

Confronting the Challenges of Urbanization in China Zai Liang,Steven F. Messner,Youqin Huang,Cheng Chen,2016-08-05 Since the late 1970s China has experienced an unprecedented pace of urbanization In 1978 only 17 8% of the population resided in urban areas but by 2013 the level of urbanization had reached

53 8% During the same period China also enjoyed spectacular economic growth China had become the second largest economy in the world by 2012 just behind the United States Despite China's highly acclaimed achievements in urbanization and its economic miracle urban China confronts a set of significant challenges This book provides theoretically informed and empirically rich analyses of some of the key challenges facing China's urbanization The first part deals with new patterns of urbanization focusing on comprehensive measures and environmental dimensions of urbanization The second part of the book focuses on several aspects related to migrants in cities migrant entrepreneurship return migration and local people's attitudes toward migrants The final section examines two key issues important for migrants urban local residents and policy makers that have become quite contentious in China today housing and urban health care This collection presents original cutting edge research on some of the most pressing challenges confronting contemporary urban China conducted by researchers from multiple social science disciplines It will appeal to scholars and advanced students of urban studies and China studies as well as those in sociology anthropology geography and political science
