Urban Economics Policy Challenging Conventional:

Urban Economics and Urban Policy Paul C. Cheshire, Max Nathan, Henry G. Overman, 2014-05-30 This groundbreaking book will prove to be an invaluable resource and a rewarding read for academics practitioners and policymakers interested in the economics of urban policy urban planning and development as well as international studies and innov Rethinking Neighborhoods William A.V. Clark, 2024-05-02 Although neighborhoods are sometimes perceived as just a backdrop to our lives there is considerable evidence that they are central to our sense of wellbeing and in the functioning of the city Rethinking Neighborhoods is about these areas of geography what we know about how neighborhoods function why they matter and how we chose where to live *The Globalization of Regional Clusters* Dirk Fornahl, Nils Grashof, 2021-04-30 Addressing the role of regional clusters in the context of ongoing globalization this timely book investigates the two seemingly competing trends of globalization and localization from both quantitative and qualitative perspectives International case studies offer pioneering insights into the internationalization process of regional clusters and the effect of this on regional as well as firm performance *The UK Regional-National Economic Problem* Philip McCann, 2016-03-10 In recent years the United Kingdom has become a more and more divided society with inequality between the regions as marked as it has ever been In a landmark analysis of the current state of Britain s regional development Philip McCann utilises current statistics examines historical trends and makes pertinent international comparisons to assess the state of the nation The UK Regional National Economic Problem brings attention to the highly centralised top down governance structure that the UK deploys and demonstrates that it is less than ideally placed to rectify these inequalities The North South divide in the UK has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity incomes employment status and wealth Whilst the traditional economic dominance of London and its hinterland has continued along with relative resilience in the South West of England and Scotland in contrast the Midlands the North of England Northern Ireland and Wales lag behind by most measures of prosperity This inequality is greatly limiting national economic performance and the fact that Britain has a below average standard of living by European and OECD terms has been ignored The UK s economic and governance inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends although this definitive study suggests that some areas of improvement are possible if they are well implemented This pivotal analysis is essential reading for postgraduate students in economics and urban studies as well as researchers and policy makers in local and central government **The City Reader** Richard T.
