Urban Sprawl Global Warming And The Empire Of Capital:

Urban Sprawl, Global Warming, and the Empire of Capital George A. Gonzalez, 2009-03-05 Argues that the United States refuses to address global warming because of the reliance of the American economy on urban sprawl **Star Trek**

and the Politics of Globalism George A. Gonzalez, 2018-07-18 The Absolute philosophized most saliently about by Georg Hegel encompasses the entirety of reality The absolute reality is composed of five dimensions height length width time and justice The five dimensions operate dialectically and the normative values of reality inhere within the fifth dimension justice hard soft moral ethical yellow etc ad infinitum The normative values from the fifth dimension justice in combination with the brain comprise the human mind With the issues of climate change world wide biosphere destruction nuclear weapons international trade regimes humanity has created the phenomenon of global politics thereby changing the fifth dimension The argument in this volume is that the broadcast iterations of Star Trek allow us to comprehend significant aspects of justice and the politics of globalism created through the advent of science technology engineering etc The creators of Star Trek hold that nationalism is a psychological pathology and internationalism is rationality **Energy, the Modern State, and the American World System** George A. Gonzalez, 2018-03-01 Energy and the modern state The political economy of energy Urban sprawl in the U S and the creation of the Hitler regime Urban sprawl the Great Depression and the start of World War II U S economic elites nuclear power and solar energy Global oil politics Plutonium and U S foreign policy Conclusion energy and the global order Energy and the Politics of the North Atlantic George A. Gonzalez, 2013-06-20 Since the onset of the Second Industrial Revolution in the second half of the nineteenth century energy has become a key axis of politics and international relations particularly for the United States and Western Europe In Energy and the Politics of the North Atlantic George A Gonzalez documents how the United States thanks to its copious reserves of oil coal and natural gas was able to assume a dominant position in the world system by the 1920s This energy economic imbalance was an important causal factor underlying the eruption of World War II After 1945 and in the context of the Cold War with communism the United States used its access to both fossil fuels and nuclear power as a means to defeat the Soviet Union and its allies Driving American foreign policy Gonzalez argues is a domestic system of urban sprawl based on the automobile and the energy reserves necessary to maintain it The massive consumer demand created by urban sprawl underpins US foreign policy in the Middle East while concerns over access to energy drive the European Union project **The City Reader** Richard T. Towards Continental Environmental Policy? Owen Temby, Peter Stoett, 2017-07-25 What are the most important transnational governance arrangements for environmental policy in North America Has their proliferation facilitated a transition towards integrated continental environmental policy and if so to what degree is this integration irreversible These governance arrangements are diverse and evolving consisting of binational and trilateral organizations created decades ago by treaties and groups of stakeholders with varying degrees of formalization who work together to address issues that no single country can alone Together they provide leadership in numerous areas of environmental concern including invasive species energy efficiency water and terrestrial and aquatic wildlife This book explores these arrangements examining features such as stakeholder inclusion organizational activities and functions and issue comprehensiveness Overall the contributors report an underdeveloped policy architecture consisting of fragmented regional transnational networks of stakeholders and underfunded binational and trilateral organizations They also show evidence of substantial policy entrepreneurship and a vibrant informal underbelly to North American environmental governance which will be vital in the challenging days ahead

The Wrath of Capital Adrian Parr, 2014-09-02 Although climate change has become the dominant concern of the twenty first century global powers refuse to implement the changes necessary to reverse these trends Instead they have neoliberalized nature and climate change politics and discourse and there are indications of a more virulent strain of capital accumulation on the horizon Adrian Parr calls attention to the problematic socioeconomic conditions of neoliberal capitalism

underpinning the world's environmental challenges and she argues that until we grasp the implications of neoliberalism's interference in climate change talks and policy humanity is on track to an irreversible crisis Parr not only exposes the global failure to produce equitable political options for environmental regulation but she also breaks down the dominant political paradigms hindering the discovery of viable alternatives She highlights the neoliberalization of nature in the development of green technologies land use dietary habits reproductive practices consumption patterns design strategies and media She dismisses the notion that the free market can solve debilitating environmental degradation and climate change as nothing more than a political ghost emptied of its collective aspirations Decrying what she perceives as a failure of the human imagination and an impoverishment of political institutions Parr ruminates on the nature of change and existence in the absence of a future The sustainability movement she contends must engage more aggressively with the logic and cultural manifestations of consumer economics to take hold of a more transformative politics If the economically powerful continue to monopolize the meaning of environmental change she warns new and more promising collective solutions will fail to take root

Gonzalez, 2012-09-01 What set the United States on the path to developing commercial nuclear energy in the 1950s and what led to the seeming demise of that industry in the late 1970s Why in spite of the depletion of fossil fuels and the obvious dangers of global warming has the United States moved so slowly toward adopting alternatives In *Energy and Empire* George A Gonzalez presents a clear and concise argument demonstrating that economic elites tied their advocacy of the nuclear energy option to post 1945 American foreign policy goals At the same time these elites opposed government support for other forms of energy such as solar that cannot be dominated by one nation While researchers have blamed safety concerns and other factors as helping to arrest the expansion of domestic nuclear power plant construction Gonzalez points to an entirely different set of motivations stemming from the loss of America's domination control of the enrichment of nuclear fuel Once foreign countries could enrich their own fuel civilian nuclear

power ceased to be a lever the United States could use to economically politically dominate other nations Instead it became a major concern relating to nuclear weapons proliferation
