Urban Commons Rethinking The City Space Materiality And The Normative:

Urban Commons Christian Borch, Martin Kornberger, 2015 This book rethinks the city by examining its various forms of collectivity their atmospheres modes of exclusion and self organization as well as how they are governed on the basis of a critical discussion of the notion of urban commons The idea of the commons has received surprisingly little attention in urban theory although the city may well be conceived as a shared resource Urban Commons Rethinking the City offers an attempt to reconsider what a city might be by studying how the notion of the commons opens up new understandings of urban collectivities addressing a range of questi

Law, Art and the Commons Merima Bruncevic, 2017-10-12 The concept of the cultural commons has become increasingly important for legal studies Within this field however it is a contested concept at once presented as a sphere for creativity democratic access and freedom of speech but one that denies property rights and misappropriates the public domain In this book Merima Bruncevic takes up the cultural commons not merely as an abstract notion but in its connection to physical spaces such as museums and libraries A legal cultural commons can she argues be envisioned as a lawscape that can quite literally be entered and engaged with Focusing largely on art in the context of the copyright regime but also addressing a number of cultural heritage issues the book draws on the work of Deleuze and Guattari in order to examine the realm of the commons as a potential space for overcoming the dichotomy between the owner and the consumer of culture Challenging this dichotomy it is the productive and creative potential of law itself that is elicited through the book s approach to the commons as the empirical basis for a new legal framework which is able to accommodate a multitude of interests and values

Spatial Justice in the City Sophie Watson, 2019-11-04 In the context of increasing division and segregation in cities across the world along with pressing concerns around austerity environmental degradation homelessness violence and refugees this book pursues a multidisciplinary approach to spatial justice in the city Spatial justice has been central to urban theorists in various ways Intimately connected to social justice it is a term implicated in relations of power which concern the spatial distribution of resources rights and materials Arguably there can be no notion of social justice that is not spatial Philippopoulos Mihalopoulos has argued that spatial justice is the struggle of various bodies human natural non organic technological to occupy a certain space at a certain time As such urban planning and policy interventions are always to some extent at least about spatial justice And as cities become ever more unequal it is crucial that urbanists address questions of spatial justice in the city To this end this book considers these questions from a range of disciplinary perspectives Crossing law sociology history cultural studies and geography the book s overarching concern with how to think spatial justice in the city brings a fresh perspective to issues that have concerned urbanists for several decades The inclusion of empirical work in London brings the political social and cultural aspects of spatial justice to life The book will be of interest to academics and students in the field of urban studies sociology geography planning space law and cultural studies

Controlling Urban Events Andrea Pavoni, 2017-12-06 How does order emerge out of the

multiplicity of bodies objects ideas and practices that constitute the urban This book explores the relation between space law and control in the contemporary city and particularly in the context of urban mega events through a combined geographical and normative analysis Informed by the recent spatial affective and material turns in the humanities and social sciences Andrea Pavoni addresses this question by pursuing an innovative and trans disciplinary approach capable of accounting for the emergence of order in urban space both at the conceptual and empirical levels Two overarching objectives are pursued First to account for the increasing convergence of logics techniques and technologies of law security and marketing into novel potentially oppressive spatial configurations Second to envisage a consistent ethico political strategy to counter this evolution by rethinking originally and in radically spatial terms the notion of justice Forging a sophisticated and original analysis this book offers an analysis that will be of considerable interest to those working in critical urban geography critical legal studies critical event studies surveillance and control studies

A Jurisprudence of Movement Olivia Barr, 2016-02-22

Law moves whether we notice or not Set amongst a spatial turn in the humanities and jurisprudence more specifically this book calls for a greater attention to legal movement in both its technical and material forms Despite various ways the spatial turn has been taken up in legal thought questions of law movement and its materialities are too often overlooked This book addresses this oversight and it does so through an attention to the materialities of legal movement Paying attention to how law moves across different colonial and contemporary spaces this book reveals there is a problem with common law s place Primarily set in the postcolonial context of Australia although ranging beyond this nationalised topography both spatially and temporally this book argues movement is fundamental to the very terms of common law s existence How then might we move well Explored through examples of walking and burial this book responds to the challenge of how to live with a contemporary form of colonial legal inheritance by arguing we must take seriously the challenge of living with law and think more carefully about its spatial productions and place making activities Unsettling place this book returns the question of movement to jurisprudence

Spatial Justice Andreas Philippopoulos-Mihalopoulos, 2014-10-30

There can be no justice that is not spatial Against a recent tendency to despatialise law matter bodies and even space itself this book insists on spatialising them arguing that there can be neither law nor justice that are not articulated through and in space Spatial Justice presents a new theory and a radical application of the material connection between space in the geographical as well as sociological and philosophical sense and the law in the broadest sense that includes written and oral law but also embodied social and political norms More specifically it argues that spatial justice is the struggle of various bodies human natural non organic technological to occupy a certain space at a certain time Seen in this way spatial justice is the most radical offspring of the spatial turn since as this book demonstrates spatial justice can be found in the core of most contemporary legal and political issues issues such as geopolitical conflicts environmental issues animality colonisation droning the cyberspace and so on In order to ague this the book employs the lawscape as the tautology between law and space and the concept of atmosphere in

its geological political aesthetic legal and biological dimension Written by a leading theorist in the area Spatial Justice Body Lawscape Atmosphere forges a new interdisciplinary understanding of space and law while offering a fresh approach to current geopolitical spatiale legal and ecological issues **Spacing Law and Politics** Leif Dahlberg,2016-04-20 Examining the inherent spatiality of law both theoretically and as social practice this book presents a genealogical account of the emergence and the development of the juridical In an analysis that stretches from ancient Greece through late antiquity and early modern and modern Europe and on to the contemporary courtroom it considers legal and philosophical texts artistic and literary works as well as judicial practices in order to elicit and document a series of critical moments in the history of juridical space Offering a more nuanced understanding of law than that found in traditional philosophical political or social accounts of legal history Dahlberg forges a critical account of the intimate relations between law and politics that shows how juridical space is determined and conditioned in ways that are integral to the very functioning and malfunctioning of law

Spaces of Justice Chris Butler,Edward Mussawir,2017-02-10 This collection is inspired by the transdisciplinary possibilities posed by the connections between space and justice Drawing on a variety of theoretical influences that include Henri Lefebvre Gilles Deleuze and Felix Guattari Doreen Massey Gillian Rose Walter Benjamin Elias Canetti Antonio Negri and Yan Thomas the contributors to this book conduct a series of jurisprudential aesthetic and political inquiries into just modes of occupying space and the ways in which space comes under the signs of law and justice Bringing together leading critical legal scholars with theorists and practitioners from other disciplines within the humanities Spaces of Justice investigates unexplored associations between law and architectural theory the visual arts geography and cultural studies The book contributes to the ongoing destabilisation of the boundaries between law and the broader humanities and will be of considerable interest to scholars and students with an interest in the normative dimensions of law s spatial turn **Border Security** Peter Chambers,2017-09-27 What kind of a world is one in which border security is understood as necessary How is this transforming the shores of politics And why does this seem to preclude a horizon of political justice for those affected Border Security responds to these questions through an interdisciplinary exploration of border security politics and justice Drawing empirically on the now notorious case of Australia the book pursues a range of theoretical perspectives including Foucault s work on power the systems theory of Niklas Luhmann and the cybernetic ethics of Heinz Von Foerster in order to formulate an account of the thoroughly constructed and political nature of border security Through this detailed and critical engagement the book s analysis elicits a political alternative to border security from within its own logic thus signaling at least the beginnings of a way out of the cost cruelty and devaluation of life that characterises the enforced reality of the world of border security **Commoning the City** Derya Özkan,Güldem Baykal Büyüksaraç,2020-03-10 This collection seeks to expand the limits of current debates about urban commoning practices that imply a radical will to establish collaborative and solidarity networks based on anti capitalist principles of economics ecology and ethics The chapters in this

volume draw on case studies in a diversity of urban contexts ranging from Detroit USA to Kyrenia Cyprus on urban gardening and land stewardship collaborative housing experiments alternative food networks claims to urban leisure space migrants appropriation of urban space and workers cooperatives collectives The analysis pursued by the eleven chapters opens new fields of research in front of us the entanglements of racial capitalism with enclosures and of black geographies with the commons the critical history of settler colonialism and indigenous commons law as a force of enclosure and as a strategy of commoning housing commons from the urban scale perspective solidarity economies as labour commons territoriality in the urban commons the non territoriality of mobile commons the new materialist and post humanist critique of the commons debate and feminist ethics of care Sociological Abstracts Leo P. Ferguson,2014 **Urban Commons** Mary Dellenbaugh,Markus Kip,Majken Bieniok,Agnes Müller,Martin Schwegmann,2015-06-16 Urban space is a commons simultaneously a sphere of human cooperation and negotiation and its product Understanding urban space as a commons means that the much sought after productivity of the city precedes rather than results from strategies of the state and capital This approach challenges assumptions of urbanization as capital driven an idea which resonates with a range of recent urban social movements from the Arab Spring and the Occupy movement to the Right to the City alliance However commons exist in a tense relationship with state and market both of which continually seek to exploit and control them Initiatives to create commons are welcomed and even facilitated by governments in order to re valorize urban space and lessen the impacts of economic restructuring while at the same time the creative and reproductive potential of the urban commons is undermined by continuing attempts to commodify them This volume examines these topics theoretically and empirically through a wide spectrum of international case studies providing

perspectives from a variety of cities as diverse as Berlin Hyderabad and Seoul A wider discussion of commons in current scientific and activist literature from housing public space to urban infrastructure is explored through the lens of the urban condition

Make Shift City Francesca Ferguson, 2014 Makeshift implies a temporary or expedient substitute for something else something missing Make Shift City extends the term to embrace urban design strategies Make Shift City implies a condition of insecurity the inconstant the imperfect and the indeterminate It also implies the designing act of shifting or reinterpretation as a form of urban d tournament Austerity urbanism and the increasing scarcity of resources among the cities and boroughs of Europe in particular has far reaching consequences for civic space Where there is a lack of regular planning processes gaps arise as open spaces that enable an ad hoc informal urban design What often results is a process of urban commoning the renegotiation of shared spaces and shared resources This urbanism of small acts is an emancipatory practice a re imagining of the city space and its potentialities

Common Space Associate Professor Stavros Stavrides, 2016-02-15 Space is both a product and a prerequisite of social relations it has the potential to block and encourage certain forms of encounter In Common Space activist and architect Stavros Stavrides calls for us to conceive of space as commons first to think beyond the notions of public and private space and then to understand common space not only as space that is governed by all and remains open to all but that explicitly expresses encourages and exemplifies new forms of social relations and of life in common Through a fascinating global examination of social housing self built urban settlements street trade and art occupied space liberated space and graffiti Stavrides carefully shows how spaces for commoning are created Moreover he explores the connections between processes of spatial transformation and the formation of politicised subjects to reveal the hidden emancipatory potential of contemporary metropolitan life
