Urbanism In The Age Of Climate Change:

Urbanism in the Age of Climate Change Peter Calthorpe, 2013-10-21 *Eco-urbanism in the Age of Climate Change* Robin Croen, 2017 This thesis seeks to examine the intersection of urbanization and climate change and asks how design can play a part in developing sustainable healthy vibrant and adaptive cities More specifically it asks How do we design for growing urban landscapes that are threatened by climate change The city of Sacramento California is a relevant study site for this topic as it is currently experiencing a new era of growth and development while concurrently being threatened by intensifying weather extremes The project focuses on the adaptive reuse of a freight railroad track that cuts through the Midtown neighborhood of Sacramento and proposes re imagining this space as a pedestrian focused promenade layered on top of and integrated with functional urban stormwater infrastructure The project also examines the existing spatial hierarchies of the city's right of way adjacent to the project site and suggests strategies for reallocating space to prioritize interactions activities and designs that make for better urban life in addition to overlaying a network of climate adaptive strategies A survey of relevant literature and precedent projects serves as the theoretical grounding for the design framework and proposed implementations Ultimately the goal of this project is to create a scalable set of strategies that address the thesis question and adhere to the tenets of the framework and apply them to the study site as a neighborhood scale pilot Strategies for scaling the project up to a regional scale and down to an individual scale are examined with the intent to use this project as a catalyst for lasting positive change on the region its inhabitants and other urban environments both local and far afield **Sustainable Urban Development in the Age of Climate Change** Ali

Cheshmehzangi, Ayotunde Dawodu, 2018-09-28 This book considers the impact of climate change on cities advocating that people are the panaceas and antidote to mitigating climate change by enhancing their involvement in achieving sustainable development Goals SDGs This leads to the development of an SDG best practice participation template which is supported by an extensive checklist of the whats and hows in participatory processes Using case studies extensive literature reviews and meta analysis to make a case for a people centric and integrated approach to sustainable urban development it examines the role of governance in climate change focusing on decision making processes policies and regulations as well as focusing on the significance of a people oriented approach on climate change and cities Through an extensive global outlook this book highlights bottom up methods of implementing and achieving sustainable urban development in the age of climate change These highlights should help to develop new mindsets new strategies new directions and new policies through which we can see a more sustainable approach to urbanisation and urban development globally which can start equipping future generations with the tools for them to help their future generations *The Urban Design Reader* Michael Larice, Elizabeth Macdonald, 2013-05-07 The second edition of The Urban Design Reader draws together the very best of classic and contemporary writings to illuminate and expand the theory and practice of urban design Nearly 50 generous selections

include seminal contributions from Howard Le Corbusier Lynch and Jacobs to more recent writings by Waldheim Koolhaas and Sorkin Following the widespread success of the first edition of *The Urban Design Reader* this updated edition continues to provide the most important historical material of the urban design field but also introduces new topics and selections that address the myriad challenges facing designers today The six part structure of the second edition guides the reader through the history theory and practice of urban design The reader is initially introduced to those classic writings that provide the historical precedents for city making into the twentieth century Part Two introduces the voices and ideas that were instrumental in establishing the foundations of the urban design field from the late 1950s up to the mid 1990s These authors present a critical reading of the design professions and offer an alternative urban design agenda focused on vital and lively places The authors in Part Three provide a range of urban design rationales and strategies for reinforcing local physical identity and the creation of memorable places These selections are largely describing the outcomes of mid century urban design and voicing concerns over the placeless quality of contemporary urbanism The fourth part of the Reader explores key issues in urban design and development Ideas about sprawl density community health public space and everyday life are the primary focus here Several new selections in this part of the book also highlight important international development trends in the Middle East and China Part Five presents environmental challenges faced by the built environment professions today including recent material on landscape urbanism sustainability and urban resiliency The final part examines professional practice and current debates in the field where urban designers work what they do their roles their fields of knowledge and their educational development The section concludes with several position pieces and debates on the future of urban design practice This book provides an essential resource for students and practitioners of urban design drawing together important but widely dispersed writings Part and section introductions are provided to assist readers in understanding the context of the material summary messages impacts of the writing and how they fit into the larger picture of the urban design field

The Oglethorpe Plan Thomas D. Wilson, 2015-02-12 The statesman and reformer James Oglethorpe was a significant figure in the philosophical and political landscape of eighteenth century British America His social contributions all informed by Enlightenment ideals included prison reform the founding of the Georgia Colony on behalf of the worthy poor and stirring the founders of the abolitionist movement He also developed the famous ward design for the city of Savannah a design that became one of the most important planning innovations in American history Multilayered and connecting the urban core to peripheral garden and farm lots the Oglethorpe Plan was intended by its author to both exhibit and foster his utopian ideas of agrarian equality In his new book the professional planner Thomas D Wilson reconsiders the Oglethorpe Plan revealing that Oglethorpe was a more dynamic force in urban planning than has generally been supposed In essence claims Wilson the Oglethorpe Plan offers a portrait of the Enlightenment and embodies all of the major themes of that era including science humanism and secularism The vibrancy of the ideas behind its conception invites an exploration of the plan s enduring

qualities In addition to surveying historical context and intellectual origins this book aims to rescue Oglethorpe's work from its relegation to the status of a living museum in a revered historic district and to demonstrate instead how modern day town planners might employ its principles Unique in its exclusive focus on the topic and written in a clear and readable style The Oglethorpe Plan explores this design as a bridge between New Urbanism and other more naturally evolving and socially engaged modes of urban development

Climate Changes in the Holocene: Eustathios Chiotis, 2018-11-15 This book highlights climate as a complex physical chemical biological and geological system in perpetual change under astronomical predominantly solar control It has been shaped to some degree through the past glaciation cycles repeated in the last three million years The Holocene the current interglacial epoch which started ca 11 700 years ago marks the transition from the Stone Age to the unprecedented cultural evolution of our civilization Significant climate changes have been recorded in natural archives during the Holocene including the rapid waning of ice sheets millennial shifting of the monsoonal fringe in the northern hemisphere and abrupt centennial events A typical case of severe environmental change is the greening of Sahara in the Early Holocene and the gradual desertification again since the fifth millennium before present

Climate Changes in the Holocene Impact Adaptation and Resilience investigates the impact of natural climate changes on humans and civilization through case studies from various places periods and climates Earth and human society are approached as a complex system thereby emphasizing the necessity to improve adaptive capacity in view of the anthropogenic global warming and ecosystem degradation

Features Written by distinguished experts the book presents the fundamentals of the climate system the unparalleled progress achieved in the last decade in the fields of intensified research for improved understanding of the carbon cycle climate components and their interaction Presents the application of paleoclimatology and modeling in climate reconstruction Examines the new era of satellite based climate monitoring and the prospects of reduced carbon dioxide emissions

Inclusive Urbanization Krishna Shrestha, Hemant Ojha, Phil McManus, Anna Rubbo, Krishna Kumar Dhote, 2014-07-25 How do we include and represent all people in cities As the world rapidly urbanizes and climate change creates global winners and losers understanding how to design cities that provide for all their citizens is of the utmost importance *Inclusive Urbanization* attempts to not only provide meaningful practical guidance to urban designers managers and local actors but also create a definition of inclusion that incorporates strategies bigger than the welfare state and tactics that bring local actors and the state into meaningful dialogue Written by a team of experienced academics designers and NGO professionals *Inclusive Urbanization* shows how urbanization policy and management can be used to make more inclusive climate resilient cities through a series of 18 case studies in South Asia By creating a model of urban life and processes that takes into account social spatial cultural regulatory and economic dimensions the book finds a way to make both the processes and outcomes of urban design representative of all of the city's inhabitants

Climate Urbanism Vanesa Castán Broto, Enora Robin, Aidan While, 2020-11-28 This book argues that the

relationship between cities and climate change is entering a new and more urgent phase Thirteen contributions from a range of leading scholars explore the need to rethink and reorient urban life in response to climatic change Split into four parts it begins by asking What is climate urbanism and exploring key features from different locations and epistemological traditions The second section examines the transformative potential of climate urbanism to challenge social and environmental injustices within and between cities In the third part authors interrogate current knowledge paradigms underpinning climate and urban science and how they shape contemporary urban trajectories The final section focuses on the future envisaging climate urbanism as a new communal project and focuses on the role of citizens and non state actors in driving transformative action Consolidating debates on climate urbanism the book highlights the opportunities and tensions of urban environmental policy providing a framework for researchers and practitioners to respond to the urban challenges of a radically climate changed world **News Bulletin** ,2010-07 *‘To Aleppo gone ...’: Essays in honour of Jonathan N.
