Enlightenment and Ecology Tarinski Yavor Tarinski, 2021-02-20 Throughout his life prophetic American philosopher Murray Bookchin created social ecology as a comprehensive social program for the challenges of our present era Through tireless teaching speaking organizing and writing Bookchin presented a humanist vision of ecology based on community direct democracy and the better promises of the Enlightenment showing how we could transform our society into one that is free and egalitarian *Enlightenment and Ecology* is an international collection of commemorative essays by scholars and

activists who have each incorporated the ideas of social ecology into their own work This book also examines how the Kurdish freedom movement is using the Bookchin's utopian ideas In a time of urgent need for radical change these essays provide both precious historical lessons and a transformative road map Democratic by Design Gabriel Metcalf, 2015-11-17 Americans have since our founding participated in a variety of alternative institutions self organized projects that work outside the traditional structures of government and business to change society From the town meetings that still serve as our ideal of self governance to the sustainable food movement that is changing the way we think about farming the land and feeding our families these secondary structures have given rise to many of our most exciting and important innovations Yet most people still know little about them even as their numbers and their influence increase In today's climate of widespread economic inequity political gridlock and daunting environmental challenges we sorely need a fresh approach to social and political change In Democratic by Design Gabriel Metcalf sketches out a strategy that starts with small scale living examples of a better society that can ultimately scale up to widespread social transformation Using examples like car sharing organizations community land trusts credit unions workers co ops citizen juries community supported agriculture farms mission driven corporations and others Democratic by Design shows how alternative institutions can be the crucial spark for a broad new progressive movement

A Materialist Theory of Justice George Sotiropoulos, 2019-03-13 A Materialist Theory of Justice offers an innovative re reading of justice that draws from diverse theoretical currents tracing in the process an age old tradition of critical thought Raising the banner of materialism against idealist conceptions justice is conceived as a multiple process which emerges in the dynamic reproduction and interaction of material bodies Mapping out its presence on non human fields justice is then shown to attain in human beings the status of a contentious problem and a productive desire which is related to the pursuit of a good life and is also determinative of human history The theorization enlarges the scope of the notion by incorporating a wide spectrum of phenomena from animal forms of sociality and activity to revolution empire civil war up to and including the riots that spread out in the world today In this way the book also manages to extend beyond the disciplinary boundaries of normative political theory within which theories of justice are usually logged and enter a productive discussion with various currents of critical thought
