The Three Ages Of The Italian Renaissance Richard Lectures For 1968 1969:

The Three Ages of the Italian Renaissance Robert Sabatino Lopez, 1970 Mr Lopez reinterprets the civilization of the High Renaissance in Italy as a dramatic succession of three ages Youth 1454 1494 Maturity 1494 1527 Decline 1527 1559 In the first period political and economic stabilization brings forth a mood of confident expectation which expresses itself in literature art and philosophy all reaching for a goal of self centered aesthetic harmony In the second period a series of foreign invasions shatters the political and economic well being of the Italian elite but does not slow down the artistic and literary drive Whether in hope or in sorrow in response to shock or in escape from reality the Renaissance attains its glorious climax The third period is torn between conflicting tendencies The political battle is lost but there is a second economic revival art and literature give out despondent notes but successfully explore new channels philosophic permissiveness comes to an end but scientific research comes into its own Mr Lopez's tripartition of an age which is usually described as a single sweep adds depth to the definition of the Italian Renaissance It is enhanced by his fresh translations of Renaissance poems and by twenty four illustrations which pick out from the incomparable wealth of Renaissance art a few historically significant works All the famous names are there from Lorenzo de Medici to Ariosto Machiavelli and Cardano from Botticelli to Leonardo Michelangelo and Palladio but one also meets a large number of minor figures and anonymous people in the street America is discovered new diseases appear anti-Semitism reawakens religious unity is destroyed these and other events form the backdrop The sparkling narration is thoroughly grounded in contemporary sources

its character and context have long been a topic of discussion among scholars. Some date its beginnings to the fourteenth-century work of Giotto; others to the generation of Masaccio, Brunelleschi, and Donatello that flourished from around 1400. The close of the Renaissance has also proved elusive. Mannerism, for example, is variously considered to be an independent but subsidiary late aspect of Renaissance style or a distinct style in its own right.
