Jiang, 2013-01-28 This book grew out of a series of my doctoral essays and discussion with Fulbright scholar Mr Tasawar Baig and Professor David Earnest at Old Dominion University Some ideas and thoughts were also inspired by Professor Robert Putnam at the Harvard University John F Kennedy School of Government and Professor Zbigniew Kazimierz Brzezinski former US National Security Advisor when they did lectures and special discussion with me at Old Dominion University in 2009 and 2012 respectively In *The Third Wave* 1991 Samuel Huntington explains various sociopolitical factors caused radical political changes in developing countries His analysis shows that for Africa the main obstacle for building democracy is economy While for East Asia and the Middle East the major obstacle are culture and religion Huntington s analysis oversimplified the driving factors of democratization in specific case such as China a hybrid of Capitalist economy and communist politics This paper measures the current democratization of Chinese politics from three perspectives social capital rapid economic development and radical social movement Thus the grand question is whether these factors can lead to a regime change in China The author draws a conclusion that the radical political change is possible but not desirable in Chinese politics In the eyes of rising Chinese middle Class a Singaporean political transformation or South Korean democratization is more favored than radical democratization Following the US Presidential election China went through a one week meeting of the 18th National Congress starting on November 8 2012 Without much surprise Xi replaced Hu becoming the core of Chinese communist power The power transition seems to be smooth in Chinese media coverage However anecdotes rumors unofficial reports and foreign news exposed the political battle behind the stage President Xi is

now facing a stark different situation compared to Hu Today China is the world's second largest economy At the same time China is experiencing rising mass disturbance every year As a non democracy leaders past experience network and personality can greatly influence state policies With more people getting rich and educated the mass claim the mismatch between Chinese politics and economy Other than changing domestic Chinese politics China has drawn much attention internationally China's presence in Africa and the Middle East tightens the nerves of U S policy makers Is China a peaceful or benign riser Where is China heading toward What interests are Chinese companies pursuing and what strategies are they using globally The book investigates these questions in different chapters Globalization is the current trend As a propeller China's participation in global trade greatly shapes world order In return global trade also produced effects on China's domestic labor market particularly on the traditional Chinese women labors This book is a sound recipe integrating both faces of China domestically and internationally

When China Rules the World Martin Jacques, 2009 For over two hundred years we have lived in a western made world one where the very notion of being modern was synonymous with being western This original and ground breaking new book argues that the twenty first century will be different With the rise of increasingly powerful non Western countries the west will no longer be dominant and there will be many ways of being modern In this new era of contested modernity the central player will be China Far from becoming a western style society China will remain highly distinctive Continental in size and mentality and accounting for one fifth of humanity China is a civilization state whose characteristics attitudes and values long predate its existence as a nation state China is already having a far reaching and much discussed economic impact but its influence will be far greater than this China s rise signals the end of the global dominance of the western nation state and the rise of a world which it will shape in a host of different ways As it rapidly reassumes its traditional position at the centre of East Asia the old tributary system will be resurface in a modern form contemporary ideas of racial hierarchy will be redrawn and China s ages old sense of superiority will reassert itself China s rise will change the world as we know it from one made in the west to one increasingly shaped by China This profound and far sighted book explains for the first time the deeper meaning of China s arrival as a global power

The Dragon's Hidden Wings Sheng Ding, 2008-07-17 The Dragon s Hidden Wings is the first comprehensive study on China s use of soft power Sheng Ding

provides the reader with an insightful empirical study that details China's economic and political rise on the global scene over the course of the last three decades. This book not only endeavors to examine the connections between the ongoing rise of China and what Joseph Nye defines as soft power but also attempts to give readers a more complete understanding of China's national power and modernization process. The main questions addressed are: What are the theoretical and empirical connections between the soft power concept and the rise of China? What are China's own soft power resources? How has Beijing used soft power to become a major player in the world? What opportunities and challenges does the use of soft power present to China? This study is essential reading for scholars of Chinese politics and foreign policy and for scholars of international relations interested in the concept and application of soft power. Understanding Contemporary China Robert E. Gamet, 2008 The third edition of *Understanding Contemporary China* retains all the useful features of the previous editions but has been thoroughly updated to reflect such current issues and challenges as China's dynamic economic growth, its changing social and political culture, its growing international presence as a mediator, investor, and disburser of foreign aid, recent developments in the standoff with Taiwan, and the ever-growing impact of environmental degradation. Assuming no prior knowledge on the part of the reader, the book was designed as a core text for Introduction to China courses and can also be used effectively in a variety of discipline-oriented curriculums, especially political science and sociology. Numerous maps and photographs enhance the text. **The PLA at Home and Abroad** Roy Kamphausen, David Lai, Andrew Scobell, 2010 Papers from the conference sponsored by the George H. W.
