The Toaster Project Thomas Thwaites, 2012-03-20 Hello my name is Thomas Thwaites and I have made a toaster So begins *The Toaster Project* the author's nine month long journey from his local appliance store to remote mines in the UK to his mother's backyard where he creates a crude foundry Along the way he learns that an ordinary toaster is made up of 404 separate parts that the best way to smelt metal at home is by using a method found in a fifteenth century treatise and that plastic is almost impossible to make from scratch In the end Thwaites's homemade toaster a haunting and strangely beautiful object cost 250 times more than the toaster he bought at the store and involved close to two thousand miles of travel to some of Britain's remotest locations *The Toaster Project* may seem foolish even insane Yet Thwaites's quixotic tale told with self deprecating wit helps us reflect on the costs and perils of our cheap consumer culture and in so doing reveals much about the organization of the modern world

Real: The Value of Design in the Era of PostCapitalism Giovanni Innella, Marco Petroni, 2019-10-31 In the age of post capitalism what is the value of design Is value defined by economic potential Or is it something far less tangible Now more than ever design has the ability to engage us in economic political and cultural debate to actively resist the monotony of daily life and to counteract the precarious situation on which modern society seems to rest Positioning itself as a lens through which to view the world design allows us and in some cases even forces us to reflect on the many aspects of the societies in which we live Divided into three chapters GOING REAL positions itself in relation to the works of Marc Jongen Maurizio Lazzarato Adam Greenfield and Tiziana Terranova among others However unlike the abovementioned authors this book draws on the works of selected designers and artists to reflect on the economic political and cultural aspects of our post capitalist societies Beginning with an in depth case study of Detroit during the downfall of the industrial era this volume moves on to a timely and provocative insight into the human crises surrounding current migration trends with a particular focus on Calais Finally in the third chapter the human body itself is laid bare as the authors analyse how and why the most personal of spaces became not only the ultimate marketplace for businesses but also an object of control for governments

Design Aesthetics Mads Nygaard Folkmann, 2023-09-19 An original exploration of the role of aesthetics in contemporary design uniquely combining philosophical aesthetics and cultural analysis of design As a product of human ingenuity design functions as an artificial interface through which we meet the world While the ubiquity of design seems to render it imperceptible when we truly reflect on design we see that it is inextricably entwined with our experience of the world In Design Aesthetics Mads Nygaard Folkmann provides an engaging introduction to the field of design aesthetics and its role as a concept Engaging with sensual conceptual and contextual considerations of design aesthetics this book investigates design experience in tandem with design practice objects and perception Part one of Design Aesthetics lays the theoretical foundation by differentiating between sensual conceptual and contextual dimensions of design aesthetics and clarifying what aesthetic experience means in relation to design The second part of the book consists of studies in implications of design aesthetics for design practice design objects with embedded technology and the construction of perception of aesthetic

qualities in objects In its focus on design aesthetics the book is intended for everyone working with design design students designer researchers and designers as well as students and researchers in aesthetics in general **The Knowledge** Lewis Dartnell,2015-03-10 How would you go about rebuilding a technological society from scratch If our technological society collapsed tomorrow what would be the one book you would want to press into the hands of the postapocalyptic survivors What crucial knowledge would they need to survive in the immediate aftermath and to rebuild civilization as quickly as possible Human knowledge is collective distributed across the population It has built on itself for centuries becoming vast and increasingly specialized Most of us are ignorant about the fundamental principles of the civilization that supports us happily utilizing the latest or even the most basic technology without having the slightest idea of why it works or how it came to be If you had to go back to absolute basics like some sort of postcataclysmic Robinson Crusoe would you know how to re create an internal combustion engine put together a microscope get metals out of rock or even how to produce food for yourself Lewis Dartnell proposes that the key to preserving civilization in an apocalyptic scenario is to provide a quickstart guide adapted to cataclysmic circumstances The Knowledge describes many of the modern technologies we employ but first it explains the fundamentals upon which they are built Every piece of technology rests on an enormous support network of other technologies all interlinked and mutually dependent You can't hope to build a radio for example without understanding how to acquire the raw materials it requires as well as generate the electricity needed to run it But Dartnell doesn't just provide specific information for starting over he also reveals the greatest invention of them all the phenomenal knowledge generating machine that is the scientific method itself The Knowledge is a brilliantly original guide to the fundamentals of science and how it built our modern world **Zero to Maker** David Lang,2013-08-26 Are you possessed by the urge to invent design and make something that others enjoy but don't know how to plug into the Maker movement In this book you'll follow author David Lang's headfirst dive into the Maker world and how he grew to be a successful entrepreneur You'll discover how to navigate this new community and find the best resources for learning the tools and skills you need to be a dynamic maker in your own right Lang reveals how he became a pro maker after losing his job and how the experience helped him start OpenROV a DIY community and product line focused on open source undersea exploration It all happened once he became an active member of the Maker culture Ready to take the plunge into the next Industrial Revolution This guide provides a clear and inspiring roadmap Take an eye opening journey from unskilled observer to engaged maker entrepreneur Enter the Maker community to connect with experts and pick up new skills Use a template for building a maker based entrepreneurial lifestyle Learn from the organizer of the first ever Maker Startup Weekend Be prepared for exciting careers of the future **The Tyranny of Experts** William Easterly,2014-03-04 In this bracingly iconoclastic book New York Times Book Review a renowned economics scholar breaks down the fight to end global poverty and the rights that poor individuals have had taken away for generations In The Tyranny of Experts renowned economist William Easterly examines

our failing efforts to fight global poverty and argues that the expert approved top down approach to development has not only made little lasting progress but has proven a convenient rationale for decades of human rights violations perpetrated by colonialists postcolonial dictators and US and UK foreign policymakers seeking autocratic allies Demonstrating how our traditional antipoverty tactics have both trampled the freedom of the world's poor and suppressed a vital debate about alternative approaches to solving poverty Easterly presents a devastating critique of the blighted record of authoritarian development In this masterful work Easterly reveals the fundamental errors inherent in our traditional approach and offers new principles for Western agencies and developing countries alike principles that because they are predicated on respect for the rights of poor people have the power to end global poverty once and for all Three Squares Abigail

Carroll, 2013-09-10 We are what we eat as the saying goes but we are also how we eat and when and where Our eating habits reveal as much about our society as the food on our plates and our national identity is written in the eating schedules we follow and the customs we observe at the table and on the go In Three Squares food historian Abigail Carroll upends the popular understanding of our most cherished mealtime traditions revealing that our eating habits have never been stable far from it in fact The eating patterns and ideals we've inherited are relatively recent inventions the products of complex social and economic forces as well as the efforts of ambitious inventors scientists and health gurus Whether we're pouring ourselves a bowl of cereal grabbing a quick sandwich or congregating for a family dinner our mealtime habits are living artifacts of our collective history and represent only the latest stage in the evolution of the American meal Our early meals Carroll explains were rustic affairs often eaten hastily without utensils and standing up Only in the nineteenth century when the Industrial Revolution upset work schedules and drastically reduced the amount of time Americans could spend on the midday meal did the shape of our modern three squares emerge quick simple and cold breakfasts and lunches and larger sit down dinners Since evening was the only part of the day when families could come together dinner became a ritual as American as apple pie But with the rise of processed foods snacking has become faster cheaper and easier than ever and many fear for the fate of the cherished family meal as a result The story of how the simple gruel of our forefathers gave way to snack fixes and fast food Three Squares also explains how Americans eating habits may change in the years to come Only by understanding the history of the American meal can we help determine its future *Managed By Morons* James

Murphy,2019-11-08 In Markets Against Modernity economist Ryan Murphy documents a clear continuity between the systematic errors people make in their personal lives and the gaps between public opinion and informed opinion These errors cluster around specific divergences between how the modern world s institutions function including global markets pluralistic democracy and even science itself

and how evolution trained our brains to understand the nature of economic relationships social relationships and humanity's relationship to the physical world Murphy calls these systematic divergences Ecological Irrationality Exploring them leads him to even more prickly questions and to conclusions that may challenge the beliefs of those who understand that for instance modern vaccines are safe and effective Do we actually want a less cohesive society Is doing a task yourself financially prudent And if we recognize an expert consensus is there even a way to implement it and achieve the desired effects
