The Transformation of Rural Life Jane H. Adams, 1994

The Transformation of Rural Life Jane Adams, 2000-11-09

Jane Adams focuses on the transformation of rural life in Union County Illinois as she explores the ways in which American farming has been experienced and understood in the twentieth century Reconstructing the histories of seven farms she places the details of daily life within the context of political and economic change Adams identifies contradictions that on a personal level influenced relations between children and parents men and women and bosses and laborers and that more generally changed structures of power within the larger rural community In this historical ethnography Adams traces two contradictory narratives one stresses plenitude rich networks of neighbors and kin the ability to supply families from the farm the generosity shown to those in need while the other stresses the acute hardships and oppressive class gender and age inequities that characterized farm life The New Deal and World War II disrupted both patterns as the increased capital necessary for successful farming forced many to move from agriculture to higher paid nonfarm work This shift also changed the structure of the farm household as homes modernized and women found work off the farm Adams concludes that large scale bureaucracies leveled existing class distinctions and that community networks eroded as farmers came to realize an improved standard of living

Putting the Barn Before the House Grey Osterud, 2012-03-27 *Putting the Barn Before the House* features the voices

and viewpoints of women born before World War I who lived on family farms in south central New York As she did in her previous book *Bonds of Community* for an earlier period in history Grey Osterud explores the flexible and varied ways that families shared labor and highlights the strategies of mutuality that women adopted to ensure they had a say in family decision making Sharing and exchanging work also linked neighboring households and knit the community together Indeed the culture of cooperation that women espoused laid the basis for the formation of cooperatives that enabled these dairy farmers to contest the power of agribusiness and obtain better returns for their labor Osterud recounts this story through the words of the women and men who lived it and carefully explores their views about gender labor and power which offered an alternative to the ideas that prevailed in American society Most women saw putting the barn before the house investing capital and labor in productive operations rather than spending money on consumer goods or devoting time to mere housework as a necessary and rational course for families who were determined to make a living on the land and if possible to pass on viable farms to the next generation Some women preferred working outdoors to what seemed to them the thankless tasks of urban housewives while others worked off the farm to support the family Husbands and wives as well as parents and children debated what was best and negotiated over how to allocate their limited labor and capital and plan for an uncertain future Osterud tells the story of an agricultural community in transition amid an industrializing age with care and skill

The Changing American Countryside Emery N. Castle, Barbara Baldwin, 1996 **Cultivating Community** Jodey Nurse, 2022-02-15 For close to two hundred years families and individuals across Ontario have travelled down country roads and gathered to enjoy seasonal agricultural fairs Though some features of township and county fairs have endured for generations these community events have also undergone significant transformations since 1850 especially in terms of women's participation *Cultivating Community* tells the story of how women's involvement became critical to agricultural fairs growth and prosperity By examining women's diverse roles as agricultural society members fair exhibitors performers volunteers and fairgoers Jodey Nurse shows that women used fairs manifold nature to present different versions of rural womanhood Although traditional domestic skills and handicrafts such as baking needlework and flower arrangement remained the domain of women throughout this period women steadily enlarged their sphere of influence on the fairgrounds By the mid twentieth century they had staked out a place in venues previously closed to them including the livestock show ring the athletic field and the boardroom Through a wealth of fascinating stories and colourful detail *Cultivating Communities* adds a new dimension to the social and cultural history of rural women placing their activities at the centre of the agricultural fair *Annals of Iowa*, 1996 *America, History and Life*, 1999 Provides historical coverage of the United States and Canada from prehistory to the present Includes information abstracted from over 2 000 journals published worldwide **If Not Me, Who?** Jacquelyn Ann Lowman, 2004 **The Rural Midwest Since World War II** Joseph Leslie Anderson, 2014 J L Anderson seeks to change the belief that the Midwest lacks the kind of geographic coherence historical

issues and cultural touchstones that have informed regional identity in the American South West and Northeast The goal of this illuminating volume is to demonstrate uniqueness in a region that has always been amorphous and is increasingly so Midwesterners are a dynamic people who shaped the physical and social landscapes of the great midsection of the nation and they are presented as such in this volume that offers a general yet informed overview of the region after World War II The contributors most of whom are Midwesterners by birth or residence seek to better understand a particular piece of rural America a place too often caricatured misunderstood and ignored However the rural landscape has experienced agricultural diversity and major shifts in land use Farmers in the region have successfully raised new commodities from dairy and cherries to mint and sugar beets The region has also been a place where community leaders fought to improve their economic and social well being women redefined their roles on the farm and minorities asserted their own version of the American Dream The rural Midwest is a regional melting pot and contributors to this volume do not set out to sing its praises or by contrast assume the position of Midwestern modesty and self deprecation The essays herein rewrite the narrative of rural decline and crisis and show through solid research and impeccable scholarship that rural Midwesterners have confronted and created challenges uniquely their own
