KURT WILK

Ostpolitik, Völkerrecht und Grundgesetz. By Rolf Quist. (Starnberg, Germany: Werner Raith Verlag, 1972. pp. 265. Index.) This slim volume on the treaties and agreements which embody West Germany's present Eastern policy was written during the German controversy over ratification last year and sets out to refute the objections which the treaties' opponents sought to derive from legal considerations. It does so on a broad foundation, analyzing first the issues surrounding the legal framework of Germany's status since World War II, from the Potsdam Agreement to the Paris Agreements of 1954 and beyond. Proceeding from there to review West Germany's treaties of 1970 with the Soviet Union and Poland, its contemplated treaty with Czechoslovakia, and the Berlin Agreement complex of 1971, the author finds valid objections in neither German constitutional nor international law. Specifically, in international law, he concludes that the Reich became extinct through dismemberment, that self-determination can yield no right of return for German expellees, that no distinct right to a homeland exists, and that a rule against annexation by conquest cannot be invoked against counter-annexations responding to aggression or against annexations receiving consent from the dispossessed state.

The author's wide-ranging argumentation is succinct, even summary, leaving nearly half the volume to documentation and references. His approach is realistic, his style frequently polemical. He clearly favors a policy based on full acceptance of the present situation, even beyond the stand now taken by the Bonn Government. Essentially a critique of the extensively cited German legal literature in its own conceptual terms, the book can serve readers outside Germany as a comprehensive introduction to the ongoing debate in Germany on these issues.

KURT WILK

The Turkish Straits and NATO. By Ferenc A. Váli. (Stanford: Hoover Institution Studies, 1972, pp. xiii, 348. Appendix. Index. \$9.50.) This book provides a comprehensive historical treatment of the regime covering the Turkish Straits with particular attention focused on Russia's attainment of many of her long standing goals in the area. Late in the 15th Century the Black Sea was a "Turkish lake" under Ottoman control. From that time Russia has wanted (1) Istanbul restored to Christianity, (2) the strategic and commercial advantage of securing complete freedom for both its naval and merchant vessels to pass the Straits to the Mediterranean, and (3) national control of the Straits and forward positions which would protect its defenses against any aggressor. All but the last of these goals has been obtained.

In addition, the author traces Turkey's entrance into NATO, NATO's involvement with the Straits, Turkey's relations with United States, the Soviet Union's use of the straits, and the application of the Montreux regime in international practice. Finally the author subjects to detailed analysis the possibility that the present status of the Montreux Convention may be altered by the Soviet Union or another party for deviation or denunciation.

This well-written book is of considerable general interest to the international practitioner. It is particularly helpful to the international lawyer
