The Undersea Network Sign Storage Transmission:

The Undersea Network Nicole Starosielski, 2015-03-02 In our wireless world it is easy to take the importance of the undersea cable systems for granted but the stakes of their successful operation are huge as they are responsible for carrying almost all transoceanic Internet traffic In *The Undersea Network* Nicole Starosielski follows these cables from the ocean depths to their landing zones on the sandy beaches of the South Pacific bringing them to the surface of media scholarship and making visible the materiality of the wired network In doing so she charts the cable network's cultural historical geographic and environmental dimensions Starosielski argues that the environments the cables occupy are historical and political realms where the network and the connections it enables are made possible by the deliberate negotiation and manipulation of technology culture politics and geography Accompanying the book is an interactive digital mapping project where readers can trace cable routes view photographs and archival materials and read stories about the island cable hubs

Internet Daemons Fenwick McKelvey, 2018-10-30 A complete history and theory of internet daemons brings these little-known but very consequential programs into the spotlight. We're used to talking about how tech giants like Google, Facebook, and Amazon rule the internet, but what about daemons? Ubiquitous programs that have colonized the Net's infrastructure as well as the devices we use to access it, daemons are little-known. Fenwick McKelvey weaves together history, theory, and policy to give a full account of where daemons come from and how they influence our lives, including their role in hot-button issues like network neutrality. Going back to Victorian times and the popular thought experiment Maxwell's Demon, McKelvey charts how daemons evolved from concept to reality, eventually blossoming into the pandemonium of code-based creatures that today orchestrates our internet. Digging into real-life examples like sluggish connection speeds, Comcast's efforts to control peer-to-peer networking, and Pirate Bay's attempts to elude daemon control and skirt copyright, McKelvey shows how daemons have been central to the internet, greatly influencing everyday users. Internet Daemons asks important questions about how much control is being handed over to these automated, autonomous programs and the consequences for transparency and oversight.

Bronfman,2016-09-02 In this media history of the Caribbean Alejandra Bronfman traces how technology culture and politics developed in a region that was wired earlier and more widely than many other parts of the Americas Haiti Cuba and Jamaica acquired radio and broadcasting in the early stages of the global expansion of telecommunications technologies Imperial histories helped forge these material connections through which the United States Great Britain and the islands created a virtual laboratory for experiments in audiopolitics and listening practices As radio became an established medium worldwide it burgeoned in the Caribbean because the region was a hub for intense foreign and domestic commercial and military activities Attending to everyday life infrastructure and sounded histories during the waxing of an American empire and the waning of British influence in the Caribbean Bronfman does not allow the notion of empire to stand solely for domination By the time of the Cold War broadcasting had become a ubiquitous phenomenon that rendered sound and voice central to political mobilization in the Caribbean nations throwing off what remained of their imperial tethers *The Space of*

Boredom Bruce O'Neill,2017-03-09 In *The Space of Boredom* Bruce O'Neill explores how people cast aside by globalism deal with an intractable symptom of downward mobility an unshakeable and immense boredom Focusing on Bucharest Romania where the 2008 financial crisis compounded the failures of the postsocialist state to deliver on the promises of liberalism O'Neill shows how the city's homeless are unable to fully participate in a society that is increasingly organized around practices of consumption Without a job to work a home to make or money to spend the homeless who include pensioners abandoned by their families and the state struggle daily with the slow deterioration of their lives O'Neill moves between homeless shelters and squatter camps black labor markets and transit stations detailing the lives of men and women who manage boredom by seeking stimulation from conversation and coffee to sex in public restrooms or going to the mall or IKEA Showing how boredom correlates with the downward mobility of Bucharest's homeless O'Neill theorizes boredom as an enduring affect of globalization in order to provide a foundation from which to rethink the politics of alienation and displacement Petroleum
