The Territorial Cohesion In Europe:

The Territorial Cohesion in Europe, 2010 *From Territorial Cohesion to the New Regionalized Europe* Luisa Pedrazzini, Renata Satiko Akiyama, 2011 *Services of General Interest and Territorial Cohesion* Heinz Faßmann, Daniel Rauhut, Eduarda Marques da Costa, Alois Humer, 2015-10-28 European societies and economies continue to rely on Services of General Interest SGI to produce legitimacy Fair access to basic services such as transport energy and communication infrastructures education and health care is regarded as a cornerstone of the European Model of Society as a way to promote Territorial Cohesion and lastly as a right held by every EU citizen These collective regional and individual perspectives on Services of General Interest are in the focus of this edited volume In the light of postmodern societies demographic aging migratory patterns globalization and economic crises territorially sensitive challenges arise and targeted solutions are needed accordingly *Uncovering the Territorial Dimension of European Union Cohesion Policy* Eduardo Medeiros, 2017-07-14 This book examines the territorial dimension of EU Cohesion Policy specifically assessing territorial impacts at the various spatial levels engaging theoretically and empirically with the notion and role of the territorial dimension within a strongly fragmented EU policymaking process Territorial Cohesion Dietmar Scholich, 2009-11-04 Preface Introduction 1 Dietmar Scholich The various regions within the European Union are marked by a high degree of disparity with regard to economic performance and productivity and with respect to their labour markets The intention underlying the EU s concept of territorial cohesion is to reduce these differences and imbalances and at the same time to ensure more balanced spatial development throughout the EU Territorial cohesion for which the German language uses two slightly different terms territoriale Koh sion and territorialer Zusammenhalt has to be seen as a general term encompassing a number of different components In addition to redressing disparities and spatial imbalances this concept aims to improve territorial integration and to promote co operation among EU regions In striving to bring about territorial cohesion due account must be taken of the diversity of the European continent and consideration should be given to the advantages and disadvantages each area exhibits Among the special challenges to be faced are the concentration of population and economic activity in what has come to be known as the Pentagon the process of EU enlargement and the severe imbalances which exist between the major centres of population and other parts of the EU territory Against this background it was only right and proper that territorial cohesion should be included in the draft of the Treaty establishing a Constitution for Europe Article I 3 which lists economic social and territorial cohesion as being among the Union s objectives **The Process of Territorial Cohesion in Europe** Luisa Pedrazzini, 2006 **Territorial Cohesion in Europe** Committee of the Regions, 2003 EU common regional policy seeks to reduce regional disparities and prevent further social and economic imbalances by transferring Community resources to regions undergoing problems using the Structural Funds This study seeks to provide technical advice to the Committee of the Regions on this matter based on a literature review of regional development issues

and on official EU documents such as periodic reports statistical yearbooks and cohesion reports It examines the major socio economic challenges to regional cohesion in the EU 15 considers the impact of enlargement and makes recommendations for a more balanced regional development policy **Public Policies for Territorial Cohesion** Eduardo Medeiros,2023-03-07

This book introduces a comprehensive and updated analysis of the role of public policies to promote territorial cohesion processes and trends in a given territory By being the first book taking a reflective and holistic approach on how public policies can lead to more cohesive and balanced territories it advances theoretical avenues for academics and showcases current academic research to policymakers and practitioners by focusing on how public policies being implemented in different territorial scales urban local regional national and European can actively contribute to foster territorial cohesion trends in a given territory This reflective approach provides an opportunity for thinking about what lessons can be learned from past and ongoing experiences and how they can improve future implementation of public policies more effectively and efficiently toward territorial cohesion since all existing analyses show that at the national level no European country has achieved territorial cohesion trends over the past decades As such this book acts as a valid and useful policy manual that effectively contributes to inverting current territorial exclusion trends at the national level by highlighting best policy practices and a comprehensive introduction to contemporary thinking about how public policies can play a decisive role in boosting territorial cohesion processes in a given territory *Territorial Development, Cohesion and Spatial Planning* Neil Adams,Giancarlo Cotella,Richard Nunes,2011 This study examines some of the evolving challenges faced by EU regional policy in light of enlargement and assesses some of the approaches and trends in terms of territorial development policy and practice The chapters reflect on the diversity of approaches to spatial planning and the politics of policy formation

Territorial Cohesion and the European Model of Society Andreas Faludi,2007 In this second book in a series on European spatial planning the authors examine territorial cohesion as a successor concept to the European Spatial Development Perspective Fundamental ideas about Europe and its distinct model of society lie behind the concept of territorial cohesion which can be understood as a goal of spatial equity that tends to favor development in place over selective migration to locations of greater opportunity This approach contrasts with an American social model that views the equity principle behind territorial cohesion to be diametrically opposed to the efficiency principle based on free mobility of labor **EU Cohesion Policy and Spatial Governance** Rauhut, Daniel,Sielker, Franziska,Humer, Alois,2021-07-31 Discussing the ongoing and future challenges of EU Cohesion Policy this book critically addresses the economic social and territorial challenges at the heart of the EU s policy It identifies the multifaceted and dynamic nature of the policy as well as the cohesions goal interlinkage with other policies and considers unresolved questions of strategic importance in territorial governance urban and regional inequalities and social aspects and wellbeing *Territorial Cohesion* Eduardo Medeiros,2018-12-14 This book offers a comprehensive overview of several urban related aspects that are of central

importance to successful territorial cohesion processes In essence it sheds new light on issues concerning urban polycentrism functional urban regions integrated sustainable urban development and the EU Urban Agenda and on how they can help to achieve territorial cohesion policy goals As an elusive and fairly recent concept territorial cohesion has to date only been vaguely debated in the available literature which for the most part focuses on its historical origins and its relevance for EU policymaking Instead this book synthesizes for the first time a range of perspectives that place urban elements and policies at the core of territorial cohesion analysis As such and given the fact that territorial cohesion is a holistic concept the book will appeal to a broad readership from both the academic and policymaking arenas **The**

Institutionalisation of European Spatial Planning B. Waterhout, 2008-06-05 Intends to clarify the enterprise of European spatial planning This book places emphasis on the need for a understanding of the process of European integration in general It points at the middle range theories that used concepts that were showing similarity to those that academics were accustomed to such as networks discourses and governance **Spatial Planning and the European Union** Eva

Purkarthofer, 2024-07-19 European Union policies are intertwined with all sectors of public administration and governance in the member states including spatial urban and regional planning Legal regulations like the Natura 2000 Directives funding programmes associated with EU Cohesion Policy or strategies such as the Territorial Agenda 2030 all leave their mark on planning yet with considerably different effects in Europe s cities and regions This book serves as a guide to navigate the connection points between EU policies and spatial planning by introducing the logics of EU policymaking and European spatial planning outlining the most important EU policies with relevance for spatial planning and presenting examples from Austria and Finland of how EU policies are applied in domestic contexts By exploring the Europeanisation of spatial planning from within the book acknowledges how differential ideas about what spatial planning is and what role the EU plays therein shape the actualised impacts of EU policies By providing a comprehensive perspective on the relevance of the European Union for spatial planning this book is ideal for students academics and administrators who want to grasp how the EU shapes and affects planning practice in Europe s cities and regions **Territorial Cohesion in Rural Europe** Andrew

Copus, Philomena de Lima, 2014-08-13 This book reflects on how the economies social characteristics ways of life and global relationships of rural areas of Europe have changed in recent years This reveals a need to refresh the concepts we use to understand measure and describe rural communities and their development potential This book argues that Europe has outgrown many of the stereotypes usually associated with it with substantial implications for European Rural Policy Rural structural change and its evolving geography are portrayed through regional typologies and the concept of the New Rural Economy Demographic change migration business networks and agricultural restructuring are each explored in greater detail Implications for equality and social exclusion and recent developments in the field of governance are also considered Despite being a subject of active debate interventions in the fields of rural and regional development have failed to adapt to

changing realities and have become increasingly polarized This book argues that rural regional policy needs to evolve in order to address the current complex reality partially reformulating territorial or place based approaches and the New Rural Paradigm following a set of principles termed Rural Cohesion Policy **Planning Cultures in Europe** Frank Othengrafen, 2016-12-05 Bringing together an interdisciplinary team from across the EU this book connects elements of cultural and planning theories to explain differences and peculiarities among EU member states A culturized planning model is introduced to consider the rules of the game how culture affects planning practices not only on an explicit surface but also on a hidden implicit level The model consists of three analytical dimensions planning artifacts planning environment and societal environment This book adopts these dimensions to compare planning cultures of different European countries This sheds light not only on the organizational or institutional structure of planning but also the influence of deeper cultural values and layers on planning and implementation processes *Spatial Planning and Urban Development in the New EU Member States* Uwe Altrock, Simon Güntner, 2017-03-02 Accession to the EU in May 2004 was a historic milestone for the spatial and urban development of the new member states Meanwhile the social and economic transition during the pre accession phase already brought about radical changes in national urban systems and new challenges for regional development In this edited volume a carefully selected and specially commissioned set of articles written by experts from both the new and the old EU member states presents a comprehensive assessment of emerging political and planning solutions at local regional national and EU levels Topics include brownfield redevelopment in the Czech Republic urban sprawl in Hungary the upgrading and integration of marginalized Roma settlements in Eastern Slovakia and sustainable coastal management in Cyprus *Borders and Border Regions in Europe* Arnaud Lechevalier, Jan Wielgohs, 2014-04-15 Focussing European borders The book provides insight into a variety of changes in the nature of borders in Europe and its neighborhood from various disciplinary perspectives Special attention is paid to the history and contemporary dynamics at Polish and German borders Of particular interest are the creation of Euroregions mutual perceptions of Poles and Germans at the border EU Regional Policy media debates on the extension of the Schengen area Analysis of cross border mobility between Abkhazia and Georgia or the impact of Israel's Security Fence to Palestine on society complement the focus on Europe with a wider view Planning for Climate Change Simin Davoudi, Jenny Crawford, Abid Mehmood, 2009-09-02 Climate change is changing the context of spatial planning and shaping its priorities It has strengthened its environmental dimension and has become a new rationale for coordinating actions and integrating different policy priorities This book sets out the economic social and environmental challenges that climate change raises for urban and regional planners and explores current and potential responses These are set within the context of recent research and scholarly works on the role of spatial planning in combating climate change Addressing both mitigation measures for reducing greenhouse gas emissions and adaptation to the effects of climate change the book provides an overview of emerging practice with analysis of the

drivers of policy change and practical implementation of measures It scopes planning issues and opportunities at different spatial scales drawing on both the UK and international experiences and highlighting the need to link global and local responses to shared risks and opportunities **European Dimension of Metropolitan Policies** Carola Fricke, 2019-03-23

This book questions how policies for the metropolis become Europeanised The book analyses how spatial concepts and political ideas permeate the European multi level system Through an interpretive comparison of five contexts the book provides an overview of the European orientation tracing two interdependent developments First the book examines references to Europe in national and subnational policies In French and German policies metropolitan regions are increasingly framed as being central not only for inter municipal coordination but also as nodes within the European space Moreover Europeanised metropolitan regions such as Lyon and Stuttgart develop European strategies The second development shows how metropolitan regions appear as actors and issues in the European policy arena contributing to a tentative and implicit metropolitan dimension This multi scalar analysis is of interest for scholars and practitioners specialised in metropolitan regions European urban and regional policies geography and related areas
