Library/Vendor Relationships Sam Brooks, David H. Carlson, 2014-05-01. A view of the mutual dependence between libraries and vendors. As technology advances, libraries are forced to reach beyond their own resources to find effective ways to maintain accuracy and superior service levels. Vendors provide databases and integrated library systems that perform those functions for profit. *Library Vendor Relationships* examines the increasing cooperation in which libraries find they must participate in, and vice versa with the vendors that provide system infrastructure and software. Expert contributors provide insights from all sides of this unique collaboration, offering cogent perspectives on the give and take process that every librarian, publisher and database provider/producer can use. The symbiosis between libraries and vendors of databases relies heavily upon open communication to achieve each one's beneficial results. *Library Vendor Relationships* explores this partnership between profit and nonprofit entities in detail, focusing on issues of crucial importance for both sides. A variety of diverse types of libraries and vendors give voice to the multitude of issues facing them. Several charts, graphs and other helpful visuals are included.
