Pandemonium Warren Fahy, 2013-03-19 What do you get when you cross Jurassic Park with an ancient underground city The answer is Pandemonium an exciting read Steve Alten New York Times bestselling author of Meg Deep beneath the Ural Mountains in an underground city carved out by slave labor during the darkest hours of the Cold War ancient caverns hold exotic and dangerous life forms that have evolved in isolation for countless millennia Cut off from the surface world an entire ecosystem of bizarre subterranean species has survived undetected until now Biologists Nell and Geoffrey Binswanger barely survived their last encounter with terrifying invasive creatures that threatened to engulf the planet They think the danger is over until a ruthless Russian tycoon lures them to his underground metropolis where they find themselves confronted by a vicious menagerie of biological horrors from their past and by entirely new breeds of voracious predators Now they're rising up from the bowels of the Earth to consume the world as we know it Warren Fahy's Pandemonium is pure genius an otherworldly wonder as creative as the best of Jules Verne Here is riveting scientific speculation paired with bravado storytelling I want more James Rollins 1 New York Times bestselling author Warren Fahy's new novel Pandemonium is probably the best high tech thriller I've read since The Mote in God's Eye My heart was pounding literally from page one Can't wait for his next tale David Hagberg New York Times bestselling author *Is Anyone Listening?* Denise L. Herzing, 2024-11-14 From a leading researcher on dolphin communication a deep dive into the many ways animal species communicate with their kin their neighboring species and us If you could pose one question to a dolphin what would it be And what might a dolphin ask you For forty years researcher and author Denise L. Herzing has investigated these and related questions of marine mammal communication With the assistance of a friendly community of Atlantic spotted dolphins in the Bahamas Herzing studies two way communication between different dolphin species and between humans and dolphins using a variety of cutting edge experiments But the dolphins are not the only ones talking and in this wide ranging and accessible book Herzing explores the astonishing realities of interspecies communication a skill that humans currently lack Is Anyone Listening connects research on dolphin communication to findings from Jane Goodall on chimpanzees Dian Fossey on mountain gorillas Cynthia Moss on African elephants and others driving today's exploration of possible animal languages Although humans have long attempted to crack animal communication codes only now do we have the advanced machine learning tools to help As Herzing reveals researchers are finding fascinating hints of language in nonhuman species including linguistic structures vowel equivalents and complex repeated sequences By looking at the many ways animals use and manipulate signals we see that we've only just begun to appreciate the diversity of animal intelligence and the complicated and subtle aspects of animal communication Considering dolphins and other nonhuman animals as colleagues instead of research subjects Herzing asks us to meet animals as both speakers and listeners as mutually curious beings and to listen to what they are saying *National Association for Girls & Women in Sport: Aquatics, Tips and*
