*Topological Geometrophysics* Matti Pitkanen, 2016-03-03 Topological geometrodynamics TGD is a modification of the theory of general relativity inspired by the problems related to the definition of inertial and gravitational energies in the earlier hypotheses TGD is also a generalization of super string models TGD brings forth an elegant theoretical projection of reality and builds upon the work by renowned scientists Wheeler Feynman Penrose Einstein Josephson to name a few In TGD Physical space time planes are visualized as four dimensional surfaces in a certain 8 dimensional space H The choice of H is fixed by symmetries of standard model and leads to a geometric mapping of known classical fields and elementary particle numbers TGD differs from Einstein s geometrodynamics in the way space time planes or sheets are lumped together Extending the theory based on fusing number concepts implies a further generalisation of the space time concept allowing the identification of space time correlates of cognition and intentionality Additionally zero energy ontology forces an extension of quantum measurement theory to a theory of consciousness and a hierarchy of phases is identified Dark matter is thus predicted with far reaching implications for the understanding of consciousness and living systems Therefore it sets a solid foundation for modeling our universe in geometric terms Topological Geometrophysics An Overview explains basic and advanced concepts about TGD The book covers introductory information and classical TGD concepts before delving into twistor space theory particle physics infinite dimensional spinor geometry generalized number theory Planck constants and the applications of TGD theory in research The book is a valuable guide to TGD theory for researchers and advanced graduates in theoretical physics and cosmology

[The Akashic Experience](#) Ervin Laszlo, 2009-02-12 Firsthand testimonies by 20 leaders in culture and science of their interactions with the Akashic field Provides important evidence for the authenticity of nonmaterial contact that human beings have with each other and with the cosmos Demonstrates that the increasing frequency and intensity of these experiences is evidence of a widespread spiritual resurgence Includes contributions by Alex Grey Stanislav Grof Stanley Krippner Swami Kriyananda Edgar Mitchell and others Knowing or feeling that we are all connected to each other and to the cosmos by more than our eyes and ears is not a new notion but one as old as humanity Traditional indigenous societies were fully aware of nonmaterial connections and incorporated them into their daily life The modern world however continues to dismiss and even deny these intangible links taking as real only that which is physically manifest or proved scientifically Consequently our mainstream culture is spiritually impoverished and the world we live in has become disenchanted In *The Akashic Experience* 20 leading authorities in fields such as psychiatry physics philosophy anthropology natural healing near death experience and spirituality offer firsthand accounts of interactions with a cosmic memory field that can transmit information to people without having to go through the senses Their experiences with the Akashic field are now validated and supported by evidence from cutting edge sciences that shows that there is a cosmic memory field that contains all information past present and future The increasing frequency and intensity of these Akashic

experiences are an integral part of a large scale spiritual resurgence and evolution of human consciousness that is under way today      *Who's Who in Science and Engineering 2008-2009* Who's Who Marquis, Marquis Who's Who, 2007-12
